

OPA SETS APPLE CEILING PRICES

Apples for home consumption will sell at a season's national retail average of between 10 and 11 cents a pound. Maximum prices for apples were set recently as one of the first steps in OPA's program to extend control over the prices of fresh fruits and vegetables to keep down the cost of living. As in the case of eggs, prices will vary by the month to reflect storage and other charges.

HOUSEHOLD AUCTIONS REGULATED BY OPA

Auctioneers' sales for householders are no longer exempt from the used consumer durable goods price regulation, OPA announced recently. The regulation originally exempted sales of used goods by householders, whether they were sold by the householder himself or by a professional auctioneer for the householder. At the same time, OPA brought used household sewing machines under the price regulation when sold by the auctioneer.

FARM LABOR SITUATION HELPED

Three hundred thousand more men of military age were put to work on farms during the first six months of this year than in the same months of 1942, because of draft deferment and other measures taken to conserve agricultural labor. This number was sufficient to offset net losses of workers of military age from farms during the last half of 1942, according to the department of agriculture.

INFLATION RISE SMALL DURING THIS WAR

Prices in the United States advanced only 12 per cent in the 19 months of the present war compared to 29.5 per cent in the same period in the first world war, Judge Fred M. Vinson, director of economic stabilization, reported on the first anniversary of the stabilization act. "The war against rising prices has been a good example of democracy in action," Judge Vinson declared. "It has not been entirely free from selfishness and pettiness and difficulties of many kinds—perhaps no struggle ever is. Credit for the achievement," he said, "goes to the workers who have abided by the Little Steel formula; to the farmers who have not needed the incentive of the prices witnessed during the last war to break all production records; to the thousands of businessmen, small and large, who have helped hold prices down," and to the American housewife for her cooperation with rationing and price control.

BROOMS TO COST MORE UNDER NEW RULING

Consumers will pay about six cents more for household brooms made wholly or partly of broomcorn, because of a recent OPA order. This increase was granted to reflect recently established ceiling prices for broom corn.

GALS TO GET MORE BOBBIE PINS DUE MORE PRODUCTION

Twice as many bobbin pins and hairpins, "necessary feminine items will be produced during 1944 as at present, under a recent WPB action.

MORE AGRICULTURAL FERTILIZER AVAILABLE

Plans are being made to increase the supply of ammonium nitrate for use as an agricultural fertilizer according to the war production board. The material has been so improved to prevent caking that orders received for September and October exceed the supply. Additional sodium nitrate became available for agricultural fertilizer last April when government capacity to produce it began to exceed the amount needed for military explosives.

WATER SAVING URGED BY GOVERNMENT

Because it usually takes fuel to pump water, the U. S. Government asks water users to repair leaky faucets and other leaky plumbing fixtures. Saving of water may also save on the manpower required to make it available as well as the chemicals required to treat it.

NEEDED SHOES CAN BE OBTAINED

Children who wear out or outgrow their shoes at a particularly fast rate and adults with extra shoe requirements need not suffer hardship because of the longer shoe ration period announced recently by OPA. If a child or adult needs shoes and the family quota or regular ration stamps has been spent, he may get a simple application form for a special shoe stamp from his local rationing board.

WOMEN URGED TO SAVE FATS

Many American housewives have been neglecting to salvage used fats and to turn them into butcher shops promptly, according to Herbert Faust, director of the salvage division of WPB. Preliminary figures for August indicate collection of 7,253,710 pounds, a drop of seven per cent from July figures. Mr. Faust said the fat salvage program must be accelerated to keep pace with increasing demands for the production of glycerine and other war materials.
