A short lecture on a certain script is an order on the subject. A properly-written pre-apothecary for specially-prepared medicaments and appliances to relieve pain and bring about recovery and, being written in the language of science, is universal, meaning that you can take it down the street to your friendly druggist or you can expect to be able to have it filled at a store in the farthest corner of the domain. This penny-anti procedure of a doctor, as he hands the patient his or her prescription, saying "You'll have to have this filled across the street as the other store can't fill it," or words to that effect, is a lot of "hokey" which is merely a case of selling dignity for a dime and, furthermore, the law says the prescription belongs to the patient until it is filled, and then it belongs to the drug store. BUT, if he or she so desires, the patient is entitled to a copy on request and is at liberty to take it elsewhere. Nance Pharmacy.

TEAMWORK SAVES BOYS LIFE

A two year old Tongan boy swallowed a shiny two-shilling piece and almost choked to death. The British agent and consul appealed to the Allied commander of the area. A special plane manned by a Royal New Zealand Air Force crew was sent to fly the boy to Suva, Fiji Islands. A Scottish doctor there called in a specialist. The specialist, an American Army doctor, came in, borrowed instruments from his Scottish friend, and removed the coin. The boy, minus the coin, will recover. The American doctor kept it as a souvenir.

"Where Your Money Buys More"

THE OLD JUDGE SAYS...

"Somethin' special catch your eye in the paper, Judge?"
"Sure did, Chet... an article here telling about prohibition in India being written off by the Madras government as a dismal failure after a three-year trial. They found out that enforcement was ineffective and that there was a steady increase in bootlegging and other violations of the law which increased penalties failed to check."

"It all goes to prove what I've said time and time again, Chet... prohibition does not prohibit. It's been tried in this country 47 times in the last 33 years and discarded everywhere except in three states. Was found to be a failure and abandoned in Canada, Norway, Sweden, Finland and Russia, too."
"Same thing happens every time... as soon as legal liquor is voted out, bootleg liquor with its crime and corruption moves right in."
