Ability and Responsibility

WHEN a particularly tough and important job comes along, it usually lands in the lap of someone who is already doing a lot of other jobs well.

People like this—who are used to getting results—aren't too plentiful. They need to have both ability and a sense of responsibility. One alone won't do—for ability can sometimes be misdirected, and a sense of responsibility without ability can lead to troublesome meddling.

It's men with this combination of talents who have been carrying a heavy load on the home front these past few years. On the farm and in industry they've been meeting—and solving—the difficult wartime problems of production.

After the war is won, somebody must shoulder the equally big job of getting this nation back into peacetime production, of laying the groundwork for the better and more prosperous America we all want. This is a challenge, and an opportunity, for the producers of America—for the men and women who have a sense of responsibility and have shown their ability to get things done. A New Lease On Life

Vernonia Auto recommends an electrical check up to put new life in any car.

New spark plugs, a new set of points, the distributor cleaned and adjusted and all connections and switches cleaned and tightened. Battery checked for charge and terminals cleaned and treated with erosion preventative. Generator cleaned and oiled with an overhaul and polish put on the armature. Tail and headlights all adjusted and inspected, with a general once over for the whole wiring set up. An inexpensive way to revitalize that gas buggy for years of additional service.
