

Granges Propose Jap Post War Regulations

In the interest of solving the Japanese problem which, in our opinion, involves a threat to the future welfare and safety of the United States, the Masters of the State Granges of Washington, Idaho, Montana, California and Oregon, representing a combined membership of 125,000 farm people, make this following statement:

It is our firm conviction that the failure of the U. S. to deal with the Japanese problem realistically has constituted a threat to our national security and welfare. It has been demonstrated in the present war to be a threat to the peace and security of the United States and we feel that it is time for the United States to deal with this problem in a practical, humane manner to insure that it will not develop into a crisis which the future generations of Americans will be unable to meet.

The basis of the whole economic problem has been the ex-

ploitation of Asiatic territories without any corresponding privilege to Oriental peoples who are entitled by right of race to their own resources.

We are also of the firm conviction that the Japanese are incapable of becoming assimilated in the American community because of inbred racial and religious characteristics.

We therefore recommend to the congress of the United States and to administrative officials concerned as follows:

1. That all persons of Japanese ancestry be permanently excluded from citizenship and permanent residence or control of property in the continental United States; provided that we ask no restriction as to Japanese that we do not expect from the Japanese with respect to American citizens in that country.

2. And that all persons of Japanese ancestry now resident in the United States be deported after the war.

3. That the United States shall not retain any rights of exploitation of Asiatic territories unless they are willing to permit similar exploitation of their own territories.

4. That steps be taken to present to the American people a constitutional amendment prohibiting American born children of Japanese to become citizens, own property or enjoy permanent residence within the continental United States. It is our belief that we should ask no restriction as to citizenship of Japanese in the United States that we would not expect to be applied to citizens of the United States in Japan.

Pilot Is Safe—on Wrong Carrier!

OFFICIAL U. S. NAVY PHOTOGRAPH.

An excited dive-bomber pilot (left) tells of his attack against the Jap fleet at Saipan on June 29. This pilot, attached to another carrier in Task Force 58, landed on the flat-top aboard which this picture was taken when his gas tanks were low, was later transferred back to his own ship.
