### Agent Tells of Pasture Seeding

The seeding of any burned-over pasture lands can be made to best advantage during the month of October and early November. Excellent stands of pasture grasses have been obtained by seedings at this time of year where a good burn has been obtained.

Desirable mixture for this purpose is as follows: English ryegrass, 4 lbs; Tall fescue grass, 4 lbs; Chewings fescue grass, 3 lbs; Alsike clover, 2 lbs; and White clover 1/4 lb. Total 13 1/4 pounds. This mixture should be seeded at the rate of from ten to twelve pounds per acre.

Another grass which can be added if desired is orchard grass. It is quite satisfactory in this mixture.

Lotus major is also a desirable legume to plant if seed can be obtained. Most of the seedings of Lotus major have been principally in the early spring. However, some experimental seedings in the fall are being carried on to determine its possibilities. This is one of the legumes that is showing outstanding promise on pasture lands. It is a high protein legume, is quite an aggressive plant which will grow in the fern lands and in competition with other weeds, and is palatable to livestock.

### Rationing of Bicycles Ends

Rationing of bicycles was ended September 23, Fredric F. Janney, district OPA rationing executive has revealed.

"This action was taken", Janney said, "because so few bicycles are on hand, and so few scheduled for production that rationing now serves little useful purpose."

Bicycle dealers are required to hold all records of rationing sales, and inventories, for six months, Janney emphasized.

**243,848 WAR PRISONERS**  
On September 1 there were 243,848 prisoners of war confined within the geographic limits of the United States.

### "The forest's prime evil"... FIRE!

**VACATIONISTS and HUNTERS... be sure all fires are extinguished before breaking camp!**  
**MOTORISTS... do not toss lighted cigars or cigarettes from car windows!**
