

BONDS OVER AMERICA

This cupola-capped tower on the state capitol at Lincoln looks out upon one of our important grain and livestock states. Its founders came from the corners of the world and built a great commonwealth.

Cornhusker's Pride

In Europe too, Poland, Czechoslovakia, Belgium, Holland, France, Norway and other countries were striving for better, more peaceful days and then Austria spawned Adolf Hitler.

Health Ass'n Work Discussed

A bi-monthly meeting of the Columbia County Public Health Association was held Monday evening, November 6, in the Rainier Union High School in Rainier to discuss work to be carried on by the association. Jack Murton, president, conducted the meeting which was attended by thirty-eight members and visitors. One of the outstanding features of the meeting was a film shown by Thomas McBride of Rainier on the spread of tuberculosis in a Navejo Indian tribe and what was done to curb the dread disease. This film showed the members clearly what needs to be done to stamp out tuberculosis.

The county nurse, Ruth Pfeiffer, gave a report on the diptheria immunization shots given in the schools. These shots are given as a part of the work of the health association and are paid for partially by the Christ-

mas seal money. Other work done by the association during the past two months has been fixing the teeth of a family with a tuberculosis background, X-rays to detect tuberculosis and nursing. The major work is, of course, case findings.

An educational program will soon be presented over the entire county. This committee is headed by Mrs. C. A. Ramey who plans to carry on a thorough campaign. She and her committee will speak at meetings of various organizations, hold meetings of their own, and distribute informative material in the hope that every person in the county will become conscious of tuberculosis. This campaign is a prelude to the coming of the mobile unit which is equipped to take X-rays at the rate of over one hundred per hour to detect tuberculosis and cancer of the lungs. This mobile unit will visit the county early in the spring and is brought here by the money you spend in purchasing seals.

A new board member, Mrs. Donald Young of St. Helens, was introduced at the meeting. She has been appointed to handle publicity for the county.

The next meeting of the association will be held in Clatskanie on January 8. Everyone is welcome and is urged to attend these meetings.

Fire Department Is Organized

The fire department for the high school was organized last week with Marvin Turner as chief and instructions were given his crew Friday for their duties in case of fire in the building.

Named to the crew are: Joe Enneberg, Richard Thompson, Ralph Sturdevant, Bob Condit, Bob Falconer, Donald Tiffany, Jack Frank, Lynn Michener, Kenneth Anderson and Duane Lane.

Mrs. Ernie Hodgson started work at the mill Mon.

VOTE

So you think we're late with our advice! Not so! For a few minutes, once in every four years is not the way to vote. You vote for good living every time you ask for the things that go to make it possible. Cast your ballot often for pleasure by dropping in at the TAVERN!

A New way to Carve
After the turkey, roasting chicken, or other large fowl has been brought to the table on a platter, breast up and with the legs pointing to the right or left (depending on whether the carver is right or left-handed), the carver turns the turkey on its side so the back is toward him. Then he removes the drumstick by grasping the outer end and pulling gently while the knife cuts through the joint, separating it from the thigh.

Then the carver places the drumstick on a side plate, holding it upright, and slices its meat off, carving parallel with the bone. Next, he cuts thin slices from the thigh, continuing until the thigh bone itself is exposed. Then he loosens the meat on each side of the thigh with tip of his knife, and removes the bone with tines of fork. Remaining thigh meat is sliced off while still attached to the bird.

Slicing breast meat with the grain, the carver takes lengthwise slices from the breast and wing until wing-to-body joint is exposed. Fork is established in wing, and wing is unjointed from body with knife. Thin lengthwise slices are removed until all white meat has been carved from this side of the bird. (All meat, of course, is placed on the side dish as it is cut.)

To get at the dressing, the thin skin under the thigh is slit with tip of the knife, making an opening large enough to allow entrance of serving spoon. "Getting at" the dressing is much simplified by this method.
