Better—or Just as Good?
MOST of us aren't satisfied with buying—or growing or manufacturing—something that's "just as good." We want something better. And, in most cases, that something better comes through competition. For competition—real competition—is something besides two people making, or offering for sale, the same goods or services. It involves a lot more. And anybody who serves the public prospers because he has something better to offer—whether it's quality, prices, service, or just a clean appearance and a pleasant smile. Real competition doesn't come from punitive taxes, or subsidies, or any other sort of horse-race handicapping to make everybody in business start even. For it isn't equality that's needed; it's the inequalities that are the true measure of progress. Real competition is the kind that encourages the manufacturer, the farmer, or business man to get his quality up, his costs down, and to develop new things his customers want. It's this kind of competition that produces something better rather than something just as good—that insures to the public a steady increase in the value it gets for its money. *General Electric Company, Schenectady, N.
