**RPM MOTOR OIL**

### How can a motor oil save gasoline?

Much gasoline loss is caused by gradual ring and cylinder wear. Gas mixtures then "blow-by," compression is reduced, performance gets rough. RPM Motor Oil slows this wear way down—sticks tight on hot or cold metal surfaces, insures cold motors against extra starting wear, protects critical hot spots on long runs. For more mileage, less wear—use Standard's RPM Motor Oil.

Thompson has a finger injured by a closing door, and Ed Frazer was off work a short time with an ankle sprain received last Friday. Oliver Graves is ill and in bed from breathing methyl chloride gas while working on the cooling system at his locker plant last Wednesday.

Paraphrase Columbus when you get discouraged with your old car. Just say, "Roll on, roll on, and on." And see that it does by letting Lee keep an eye on it.
