

No Arrest Made For Home Entry

RIVERVIEW—Mr. and Mrs. Robert Wyckoff and daughter, Laurel, were overnight guests at the P. S. Parks home in Medford Wednesday and when they returned to their home here Thursday, found their residence had been broken into and a gorgeous chicken dinner with all the trimmings placed on the table. The housebreakers were her mother, Mrs. G. E. Frazer, a sister, Mrs. G. E. Vorhies and an infant son and Mr. and Mrs. L. Buntzell and son, Richard, all of Portland. No arrests were made.

A full week of visiting was enjoyed by the Oscar Rand family when their son, H. T. Rand, brought his wife and daughters

over from Marysville, Washington, during his vacation from mill work at that place.

Mrs. Ray McAdams is suffering with pleurisy and asthma at present.

An outing at Seaside was enjoyed Sunday of last week by Mr. and Mrs. Harvey Epperson, Mr. and Mrs. Lewis Kono and family and Bertram Wood.

Mrs. Gertrude Davis and son, George, went to Portland Wednesday to meet Mrs. Mary Usitalo, a resident of Bothell, Washington, who came for a week's visit with them. Gertrude and Mary did factory work together nearly 30 years ago and enjoy a lasting friendship.

Two missionary workers of the Northwestern State Mission of the church of Latter Day Saints, Sister Hender and Sister Hatch, came Saturday to labor in Vernonia and Riverview. At present they are with the George Bell family here but expect to be located in Vernonia soon. They plan to spend the summer here.

HOW'LL YOU HAVE YOUR EGGS?

The weather-beaten lineman isn't worrying about your eggs—or whether you want 'em soft boiled, fried, scrambled—or if you like eggs at all.

But he IS worrying about keeping your electric service flowing along as usual. If that means eggs for your breakfast, okay then, that's why he's up on a storm-lashed power pole.

And, he'll STAY there till he gets your line repaired—in spite of hot wires sputtering around him. In spite of rain . . . lightning . . . thunder . . . and spring, summer, winter, or fall.

You don't have to send him a check for his trouble. You won't pay any more on your electric bill—to cover his hard, wet work and the materials he uses.

This kind of service is routine stuff for the trouble-shooter and the electric cooperative he works for. Storms—the repairs and costs—all are prepared for and handled in a businesslike way. But it isn't an easy job. Keeping your electric service dependable and building new lines is the result of careful planning and sound BUSINESS management.

The Board of Directors, the manager, the engineers, the office employees, the line crew and the boys clearing right-of-way are all working to develop a more dependable electric service for all of the consumers and members of:

WEST OREGON ELECTRIC COOPERATIVE, INC.

Hospitalized veterans use thousands of pairs of felt slippers sent them by the American Red Cross. These girls, students at Ogentz college, Philadelphia, Pa., sew the slippers as part of their service in the Red Cross college unit program. They get special instruction in sewing from a member of the Ogentz faculty.

Ample Fertilizer Obtainable Now

A generous supply of nitrogen fertilizer is now assured for Pacific northwest farmers for the first time since the war started, reports Art King, extension soils specialist at Oregon State college. King has represented the extension service in negotiations with the government to manufacture ammonium sulfate at the Columbia Metals Alumina plant at Salem.

This defense plant, built by the RFC, has been authorized to continue and expand production of fertilized throughout the remainder of 1946, King has been notified. Experimental alumina operations are expected to end about July 15, after which the entire plant will be available for fertilizer production.

Plant alterations to permit continuous production of 200 tons per day are planned by Harry Morgan, RFC engineer. Raw materials, anhydrous ammonia and sulfuric acid, are being ordered from various Pacific coast and midwest points.

Present authorized production totaling more than 30,000 tons is much more than the three northwest states can use, King points out, but it is expected that the major part of the output will go to UNRRA for foreign relief purposes.

Northwest growers and fertilizer dealers will have ample supplies available from immediate production, however, if they take advantage at once of the current supply. The output of the plant can probably be kept for local use as long as the material is taken directly from the plant which has no storage facilities. When there is a lag in local demand other arrangements for disposal will have to be made.

Long Time Natal Resident Dies

MIST—With the passing of Dave McMullen last week at the home of his daughter, Mrs. Salmi, in Marshland, another old timer and friend has crossed the bar. Friends prized him for what he really was, a good neighbor, kind and generous, overlooking the faults of others as he hoped to have his overlooked.

He with his family owned a farm at Natal for many years. Recently they sold and went to Bonneville. He had been ill for several months and suffered much pain. He passed away July 3. A good husband and kind father, he leaves a wife, four daughters and one son besides many other near relatives, and friends, who extend sympathy to the family.

He is gone and we shall miss him, Never more his place can fill, God alone knew his sufferings, He was so very ill.

In the home a chair is vacant, He was called, just why we cannot say; Now he's resting Oh so peacefully On a green hill far away.

And we hope some day to meet him Somewhere along the Golden Strand, Where My Lord and I shall walk together, Perhaps then we'll understand.

Rain Injures Hay, Cherries

MIST—A recent guest for a week at the Earl Roper home was Chas. Reid an air pilot in the U.S. army.

The hay and the cherries are suffering from the rain of the past few days.

Mrs. Roper and Mrs. Houry were afternoon callers Friday at the Dowling home.

Mr. and Mrs. Norman Henderson visited their parents, the Clyde Henderson family last week. The guests live in Portland.

Mr. and Mrs. Robert Mathews spent a night at Seaside with her mother, Mrs. Maud Rodgers, last week.

Friends will be interested to know that a daughter has been added to the family of Mr. and Mrs. Bern Bliss (Dorothy Garlock). The little lady has been named Barbara Delia. They live near Tillamook.

Earl Doran paid his regular 4th of July visit at the Irving Knowles home, where he was raised by Grandpa Chas. Knowles. The Knowles and Mr. Doran all went to Seaside the 4th.

The Brown family spent the week end last week in Washington with relatives.

Among those attending the funeral services in Vernonia of the late Dave McMullen were the J. O. Labels and Wm. Bridgers families.

Mr. and Mrs. Walter Mathews went to Camas, Washington, Sunday a week ago, where Mrs. Mathews was bridesmaid at the wedding of Mrs. Elva Owen and Mr. Kleager. Mrs. Owens taught school here.

Mrs. Walter Batson left Monday for Cornelius where she was

called by the serious illness of her father.

Maybe I can get A haircut now that the holidays are over.

I am only a block from Ben Brickel's barber shop, but seems when I start for there, some guy like Hieber will step out of The Nehalem Grocery, Les Skuze will wander lazily across the street, some long hair will pop out of an alley and Harry Chin will unload from some truck—so—time I get there the shop is full. Pretty soft for these barbers now—Nothing but customers. No shortage of anything. Different here—shortage of beer.

Say, if you can't get beer to go with that cold plate supper, try filling 3/4 of a glass of lemonade with Claret or Burgundy wine. When we have baked ham dinner in the restaurant, we cook the ham with Burgundy wine. Some flavor—tender too.
