## COUNTY SWIM MEET SET FOR AUGUST 4

The fourth annual Columbia county swimming meet is scheduled for next Sunday, August 4 at the St. Helens swimming pool, Wallace McCrae, St. Helens superintendent of schools, announced Tuesday. Entry blanks are available here from Marvin Turner, local guard at the city park pool, so that swimmers wishing to compete may do so.

The blank must be accompanied by a 15c entry-fee and must be sent in by Saturday, August 3. Awards will be given for the first three places.

The county record for one event, the 220-yard free style for senior girls, is still held by Ruth Hausler who set the record in 1942.

Listed on the blank are the events which will be held Sunday and the age limits for competitors.

## Forestry on Farm Provides Crop Yield

Farm forestry is primarily a farming job with an annual 'crop yield' in rate of growth amounting to as much as 1000 board feet per acre each year in parts of Oregon.

Such is the conclusion reached by Walter M. Ferguson, United States department of agriculture project farm forester, in reporting on the farm forestry project carried on for several years in Clackamas county. This project was established in 1940 by the soil conservation service in cooperation with Oregon State college school of forestry, the state board of forestry and the O.S.C.

extension service. A full report of five years operation has now been published by these cooperating agencies as a 28-page illustrated extension bulletin No. 662. It tells about the development of this project as and experimental demonstration of the possibilities of farm forestry in the timbered areas of the state, especially in western Oregon.

**Timber Yields Wealth**  
Most farm timber holdings could be the source of an immediate profitable income, the project revealed. During wartime, prices for products were such that there was an adequate return for wages, management and investment. For sawn lumber this amounted to \$35 an acre a year in some instances.

The study also revealed that markets need to be developed for some forest products, particularly for small round material from early thinnings. The need for continued demonstration in farm forestry management and for continued study to develop needed information was early apparent, Ferguson states.

A penny saved is a penny earned, but dollars are lost in forests burned. It may be your neighbor's property but every tree lost by fire is money out of your pocket. Protect payrolls. KEEP OREGON GREEN.
