### 32 Lose Lives In July Traffic

Thirty-two people lost their lives in traffic casualties during July in Oregon, it has been disclosed by Robert S. Farrell, Jr., secretary of state.

While this year's July toll has increased half again over last year's the greatly swelled traffic volume will probably show driving to have been safer this year, mile for mile. The state's July mileage figures are not yet available.

Farrell predicted, however, that when mileage for July has been found, the death rate per mile traveled will show a marked decrease from recent levels.

Safety authorities are watching a nation-wide dip in the death rate per miles traveled in hope that a long-time trend is being forged. The downward curve has been in progress for several months, but cautious safety men have hesitated to label it a real trend. More conclusive information will be available by the end of the year.

## THANK YOU for waiting for delivery of your NEW CHEVROLET

We are doing our best to see that you get your new car as quickly as possible

We want to thank our customers and prospective customers for your friendly patience while awaiting your new Chevrolets.

We know it is a hardship to wait for needed transportation; but we believe you will understand that we, and Chevrolet, are as eager to deliver cars as you are to obtain them. Unfortunately, production so far this year is far under expectations. Chevrolet Motor Division sums up the situation thus:

"Even though our rate of production normally exceeds that of any other manufacturer, we have been able to build, up to July 1, only 12.4 per cent as many cars as we had built up to that date in 1941. Production is still far below normal, because of frequent shortages of essential materials and parts. Strike after strike at the plants of our suppliers has seriously impeded our progress toward full production, and the cumulative effect severely hampers every manufacturing and assembly plant. In June we were able to build only 29.2 per cent as many cars as we produced in the same month in 1941."

While production is restricted, so—in proportion—are shipments of cars to us. As production increases, we are assured of getting our proportionate share of the total—and as quickly as cars are received, we will speed deliveries to our customers.

Remember—Our CAR-SERVICE is your best CAR-SAVER. Keep your present car "alive" until you get delivery of your new Chevrolet by bringing it to us for skilled service now and at regular intervals.
