Unused Leave Forms Received

A sample copy of the application form and instructions to enlisted men of World War II in applying for their unused terminal leave or furlough pay was received this week by the department of veterans' affairs, from Maj. Gen. G. B. Erskine, retraining and reemployment administrator.

An accompanying letter to Director George E. Sandy said that all community advisory centers and county veterans' service offices would receive the sample forms shortly.

Although postoffices will receive supplies soon for veterans, and sample form will enable service officers to study the instructions and be ready to help veterans make their applications when the time comes, Sandy said.

Earlier doubt as to whether photostatic copies of discharges would be accepted as proof of military service was clarified, as follows:

"We know you were glad to learn that the armed forces acted favorably on the recommendation that photostatic copies of discharge papers, as well as originals, will be accepted."

"Pass," "liberty," or periods of temporary duty are not chargeable as leave or furlough, nor are sick, convalescent, or rehabilitation leave, but "delay en route" will be, the instructions indicate.

In addition to the pay the veteran will receive in his last pay grade before discharge, he will get 70 cents subsistence for each day of unused leave. Also, those in the top three pay grades who had dependants will receive an additional \$1.25 a day for quarters. In the army and marines this includes master, tech and staff sergeants. In the navy and coast guard it means chiefs and first and second class petty officers.

Pay is for a maximum of 120 days of earned leave, in non-negotiable bonds, maturing in five years, and is figured at the rate of 2 1/2 days per month, minus the leave actually taken in service.

Experiments by an Illinois farmer have revealed that from 340 to 350 squirts from a cow resulted in a gallon of milk.

Mildew Control Means Suggested

Mildew in household fabrics is not such a problem in the far west as in some other parts of the country, but even Oregon homemakers have trouble at times, reports Marjorie Tye, acting extension specialist in clothing at Oregon State college.

Miss Tye passes on a few suggestions to combat the growth of molds that cause mildew. If mildew invades clothes closets, keeping a small electric light burning for a while will usually dry out the air enough to check it. A small electric fan to stir up the air hastens results. She says it is also good policy to leave closets and drawers open occasionally for airing.

Clothing and household fabrics are best allowed to dry thoroughly before they are thrown into the laundry hamper or chute. It is also best to spread out wet dishes,

washcloths and shower curtains rather than leaving them bunched. In summer it is safest not to sprinkle more clothes than can be ironed in a day.

Materials are now available at drug and department stores to make fabrics resistant to mildew, says Miss Tye. These are good to use on awnings or cotton shower curtains.

Help prevent and control forest fires. Keeping fire out of the farms, fields and forests aids our country in peace as well as war. KEEP OREGON GREEN.

HOW TO KEEP YOUR FENCES STRONG AND HEALTHY

Here's a potent preservative that fights the causes of wood decay. It lengthens the service of your grape stakes, fence posts, mud sills, underpinning, hop poles, and any wood you put in contact with damp earth. Standard Wood Preservative contains 90% active ingredients—selected for their permanency. Apply it the same as ordinary creosote—and keep your wooden structures from toppling before their time.
