The Sundland Elec. & Appliance Salutes Hotpoint On Its Move To Curb Inflation By Reducing Appliance Prices NOW!

We Are Proud to Join Hotpoint—One of the Nation's Largest Appliance Manufacturers—in the Fight to Preserve the Purchasing Power of the American Dollar by Announcing Price Cuts of As Much As 10% on America's Finest Electric Ranges, Refrigerators, Disposals & Water Heaters.

Inflation is very much like the weather in that everybody talks about it, but nobody does anything about it. But now the Sundland Store is joining with Hotpoint—builder of America's finest electric appliances—in doing something about it... namely, reducing prices on electric ranges, refrigerators, disposals and water heaters.

Price reductions at a time like this when appliances like these are so scarce is news in itself. But all the more noteworthy is the fact that these price reductions—which run as high as \$20 on some models—are made in the face of the biggest demand for Hotpoint products in the company's history.

Certainly, this is proof that this move is made purely in the public's interest. We consider it an outstanding example of the kind of business statesmanship that has made America the country that it is today and the kind that will continue to lead the way to future greatness.

The Sundland Store heartily subscribes to this courageous move of Hotpoint's... and is glad to be the first in Vernonia and Mist in this crusade to cut the cost of living.
