

Boston Hosts World Christian Scientists for Annual Meeting

Complete defense from disaster and destruction is immediately available to every individual and nation through spiritual understanding of God, the Christian Science board of directors declared recently.

Taking note of the world crisis they affirmed that the deepest laws of the universe are spiritual laws of harmony—and can be utilized for individual protection and preservation of human freedom.

Their special message was read at the annual meeting of the Mother church, The First Church of Christ, Scientist, in Boston, to nearly 7500 Christian Scientists assembled from all over the world.

Church members from all over the world—Japan, New Zealand, Sweden and other distant countries, as well as Canada and the United States—came to Boston for the meeting, which has been held annually for more than half a century. Smaller meetings on specialized subjects convene on days following the main session.

In their message the directors called for individual spiritual courage in meeting critical global problems. They said Christian righteousness has never been defeated and forecast "great spiritual progress" ahead.

New president of The Mother church for the coming year, it was announced, is Mrs. Iora C. Rathvon of Boston. In a ringing address Mrs. Rathvon said

Earl and Henry Ruddman and his wife who was Louise Iler before her marriage to Henry. They now live near Newport. It was good to see all those old residents of so long ago. Henry is crippled and unable to walk. When here they lived at Natal where Roy Taylor now lives.

that never was the need more urgent to look beyond the material sense of life, to "see man as God's spiritual idea." Forecasting greater spiritual achievements, she said "We are standing on the brink of a new era."
