Volunteer city firemen were quite critical of the job performed last Saturday night by the department in bringing under control and extinguishing the fire which destroyed the high school gym. We believe that criticism, as they have made it about the way the job was done, has considerable merit.

At any fire there is confusion and excitement and mishaps frequently result because of this. The firemen believe they were hindered because many who do not belong to the department took a hand in the fighting with the result that confusion was increased and nearly serious accidents resulted.

The firemen have the authority to direct the use of hose and their work should not be assumed by those who are inexperienced. Those who offer help, and help was needed Saturday, should do so with the understanding they take instructions from the firemen.

However, the department need not feel that an excellent job was lacking in this instance. The insurance adjuster and several contractors, all familiar with fire damage, have remarked about the almost miraculous job done in putting out the blaze. School board members, after examining the damage and observing the greater destruction that could have resulted, have commended highly the work of all those who helped.

May the criticism that has been voiced result in an even better fire department for this community.

Another record is on the way to achievement by the men employed on the Columbia Tree Farm and the first step in that direction will be taken Friday. On that date the tree farm will have completed a year without a lost-time accident to any of its 30 employees.

If another year can be completed on the present try for a record the farm will have reached the same point as in March, 1951, when two years without such an accident was observed. At that time, two years of work in the logging industry by a concern was unheard of without lost-time mishaps. Maybe the previous record can be reached again and even lengthened.
