Marriage Law Changes Noted

The new law on a three day waiting period for marriage licenses and county filing fees went into effect this week according to Columbia County Clerk Harold Jensen.

Jensen said that as of August 20, the bride and the bridegroom are required to make written application to the county clerk and the clerk shall not issue a marriage license until after a period of three days has elapsed since the date of application.

The only way that this can be set aside is to have the judge of probate of the county, for good and sufficient cause shown and in his discretion by an order in writing signed by him, authorize the clerk to issue the license before the expiration of the three day period.

The license will be good for 30 days.

In the new schedule of fees, Jensen said, filing fees have changed in some instances as have the recording fees.

The new fee schedule raised the price of recording instruments to \$1.50 for the first page and \$1 for each additional page. This makes the charge for recording a two page deed now \$2.50 compared to \$1.50 prior to August 20, Jensen said.

A schedule of filing and recording fees for the state can be obtained from the county clerk's office.

Booster Night Is Grange Plan

Mr. and Mrs. Hugh Cox of Mist who are members of the Marshland Grange, were guests at the meeting of Natal Grange held August 28.

Highlight of the evening was the displaying of the blue ribbon and trophy won by the grange for their booth at the county fair, by Ruth Steers, fair booth chairman. Also on display was a picture of the booth. A check which was part of the prize was turned over to the grange.

Discussion was held of the community service contest; the legislative chairman, Walter Mathews, reported on the special session of the state legislature which had been called and the tax situation; the lecturer, Lena Mathews, called for reports from all chairmen so her report could be compiled and Mrs. Laura Carmichael, Home Ec chairman, reported on the last two parties held and announced the club meeting for September 4 at the home of Lena Mathews.

Plans were made for a booster night which will be held Saturday evening, September 21. This will be open to the public and a program is planned which will be followed by dancing and refreshments. The next regular party night will be Saturday, September 14.

A report on the work day revealed that although only a few had turned out, much was accomplished and the floor in the new addition was finished.

The lecturer's program featured a quiz on the states; some interesting talks on the subject, "What would you do to entertain visitors and talks about the ice

Shrine Club Dance To Benefit Shrine Hospital

The Columbia County Shrine club has issued an invitation throughout the county for their twelfth annual benefit dance given to raise funds for the Shrine crippled children's hospital in Portland. This years dance will be held Saturday night at the county fair grounds at Deer Island and dancing will start at 9:00 p.m. Admission will be \$1 per person.

Music for the dance will be furnished by the Stardusters, dance band from Pacific University, Forest Grove, with which Dane Brady plays.

Now Standard refines a rare "rock" to give U.S. a new source of gasoline

High pressure water jet shatters solid Gilsonite. Flame hose washes particles down mine floor to pipeline.

Petroleum products are now being made without crude oil. Standard found the answer in a rare hydrocarbon called Gilsonite. But it took \$16,000,000 and a vast research program to do it. Deep in the mountains of Utah our scientists worked out a better, faster way to mine Gilsonite. Meanwhile our engineers designed the nation's first pipeline capable of carrying solids suspended in water... over a rugged terrain to a spot 72 miles away.

There Standard* built the nation's first privately financed refinery to make petroleum products from a material other than crude oil. Today that refinery turns Gilsonite into high octane gasoline for motorists, and the purest coke known for making steel, aluminum and other metals. In our country's search for new sources of fuel, the development of Gilsonite is a major breakthrough. It means the equivalent of 100,000,000 barrels of oil added to U.S. underground reserves—important help in meeting our country's growing petroleum needs.
