4-H Officers To Get Recreation Training

Columbia county 4-H club officers will have a day of fun at Rainier grade school Saturday, November 23.

Mrs. Ann Weigant, recreation specialist from Oregon State college, will be present to teach the 4-Hers new games and songs, that can be used in 4-H club meetings.

The meeting is for 4-H club officers elected for the 1958 4-H club year but for those clubs who have not yet elected new officers either last year's officers or appointed delegates are invited to attend.

The meeting will begin at 10:15 a.m. with a sack lunch at noon and will adjourn at 2:30 p.m.

A stitch in time saves embarrassing exposure.

Suggestions Given for Paring Federal Income Tax Load Now

Millions of high, low and middle income taxpayers, realizing that careful planning of their financial affairs between now and the first of the year can pay off handsomely when the tax collector calls next spring, have already begun to establish those extra deductions and special exemptions that will reduce their tax bills.

To alert readers to the tax-saving steps that may be taken before the end of the year, this newspaper is printing a series of articles prepared with the help of the national and state organizations of certified public accountants.

Evaluate Income Prospects
Many taxpayers have good and bad income years, depending on the success or failure of personal investments and business conditions in general. Sound year-end tax planning requires that you know fairly well what your income prospects will be for 1957 and 1958.

Taxpayers who are in danger of being whiplashed from one tax bracket to another because of wide fluctuations in their 1957 and 1958 income should act before December 31 to try to average out their taxable earnings. This can be done by careful shifting of income and deductions from one year to the next.

How to Shift Income
If your two-year income estimate shows that your income for this year will be significantly higher than next year's, you should take immediate steps to throw as much income as possible from 1957 to 1958. At the same time you should speed up the payment of all expenses that can be deducted on your 1957 return. By concentrating deductions in the higher year and switching income to the lower, you will keep your taxes for both years in the lowest possible tax bracket.

Should you be faced with the more desirable problem of a sizeable increase in your 1958 income, reverse this procedure—delay expenses and speed-up income if you can.

Timing income and deductions to gain a tax advantage is not too difficult for the millions of taxpayers who file returns on the basis of cash receipts and cash disbursements. Since their earnings are taxable only after payment is received, "cash basis" business and professional men can shift income by simply delaying or speeding-up the collections of accounts receivable near the end of the year. Salesmen and contractors can do the same thing by extending or closing deals that may be pending in November or December.

Farmers who operate on a cash basis can accelerate or postpone income by proper timing of the sales of their crops or livestock. While their income will be taxable in the year cash is received, the full costs of raising crops or cattle are deductible for the year in which the costs were paid.

One look at an Internal Revenue Service table of tax rates will prove the hard dollar and cents advantages of a few year-end income shifts. The taxpayer who expects his income to drop from the 40 per cent bracket this year to a 30 per cent bracket in 1958, can save \$100 for every \$1,000 of income he manages to put off until after January 1.

Special Income Situations
There are special situations in which it can be advantageous to bunch income in a single tax year. For example, a husband and wife can file a joint return to gain the benefits of income-splitting. Should one of them die, the survivor may file a joint return for the year in which the spouse died and also for two succeeding years under certain conditions. Thus, a widow or widower may profit by throwing more income into this year and less into next if his or her spouse died in 1955, since the privilege of filing a joint return will be lost in all cases in 1958.

If you are planning to be married in 1958, remember that the income-splitting privileges you gain will act like a rate cut for you. At \$7,000 of income, your taxes will be \$240 less than if you were single assuming that you take the standard deduction and claim only exemptions for you and your wife. For this reason young couples planning marriage might consider postponing income from 1957 to 1958, while accelerating deductions from 1958 to 1957.

A final suggestion to holders of U. S. Savings and War Bonds: if you are trying to accelerate income on your 1957 tax return, you might consider reporting the interest that has accrued on your bonds. A point to keep in mind, however, is that in the future you will have to go on reporting interest as it accrues, rather than in the years the bond matures.

Mist Program Is Saturday Night

MIST — Don't forget the date, Saturday night, November 23, at the Mist gym the Mist Helping Circle will have its annual program and sale.

The M.H.C. is meeting with Mrs. Austin Corli this Thursday. Paul Wikstrom spent the week end at Birkenfeld with friends. The school teacher, Mrs. Kel-

ler and husband, are moving into the cottage which they purchased from the Knowles.

The Wagner family has moved to Beaver.

Mr. and Mrs. L. P. Wikstrom spent the week end in DeLake with her sister, Mrs. Percy Baillett and family.

Mrs. J. Crawford called on Mrs. Austin Dowling Wednesday.

Mrs. Julie Wiester visited her mother in Everett, Washington a day or two last week.

George Wray delivered his yearly order of walnuts this week

HERE'S HOW...

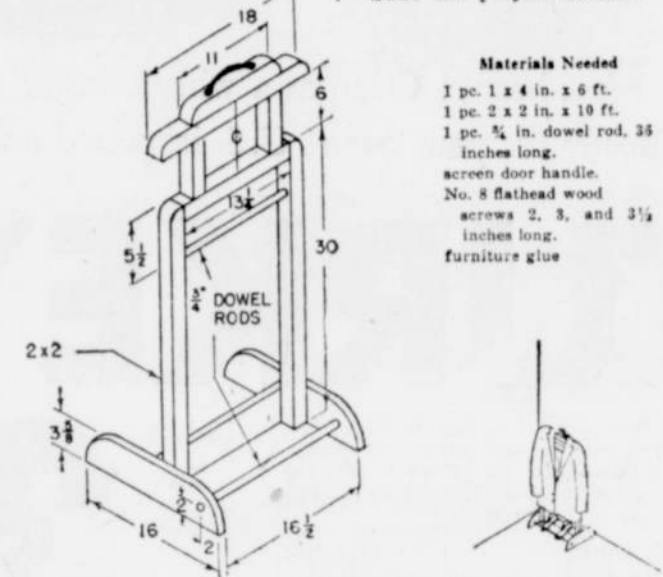

MAKE A SUIT RACK

A suit rack that keeps clothes neat and is also a time saver can be made of 1 by 4-inch lumber, 2 by 2-inch lumber and 3/4-inch dowel rods. Cut the footings as shown, rounding the ends and drilling holes for the dowel rod. The cross piece is 16 1/2 inches long. The 30-inch uprights are rounded on the ends. Drill holes 1 inch deep, 5 1/2 inches

from the top for the upper dowel rod and 1 inch holes in the edge of the upright for dowel joint construction. Corresponding holes are drilled in the cross bar. Make the top assembly to the dimensions shown.

Assemble with glue and No. 8 flathead wood screws. Dowel pins 3/4-inch long are used for the dowel joint.

Sand the project smooth.

National Lumber Manufacturers Association

MAKE A PRIVACY SCREEN

Lack of privacy when relaxing in the backyard is a problem for many home owners. A privacy screen is the answer. Make the post holes 7 feet 9 inches apart on centers. Dig the holes 34 inches deep and fill the bottom 2 inches with gravel.

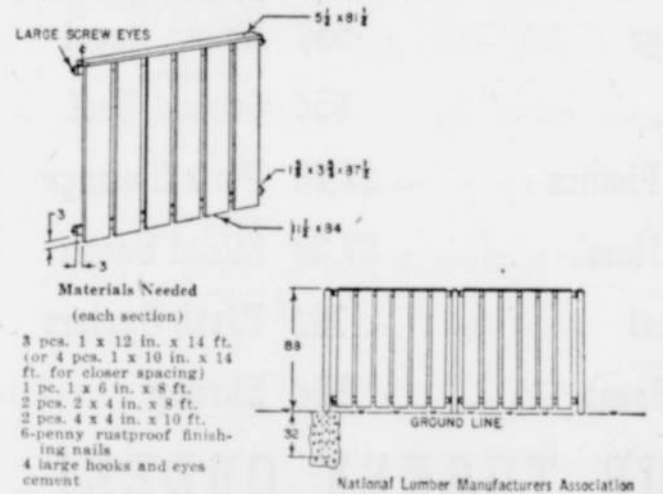

The 10-foot posts are made of 4 by 4-inch lumber. Use naturally durable wood or treated wood. Bevel the top of the posts.

The screen is made of 1 by 12 (or 1 by 10), 1 by 6, and 2 by 4-inch lumber. The slats are

84 inches long; the 1 by 6-inch top is 81 1/2 inches; and the 2 by 4-inch braces are 87 1/2 inches. Draw diagonal lines on the ends of the braces to locate the center point for the screw eyes.

Assemble the screen section as shown using 6-penny rustproof nails. Space the slats evenly.

Set the posts in concrete. Fasten the hooks to the posts. Join the sections to the posts. Additional sections can be added or sections may be easily removed.

National Lumber Manufacturers Association

MAKE A PLANTER-BOOKCASE

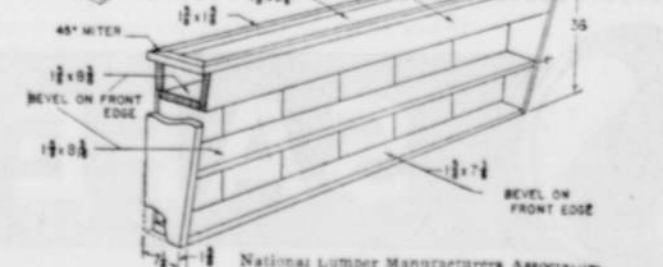

A combination planter-bookcase useful alongside of, or in lieu of a railing near a stairway, can also be used as a room divider. The length of the project will vary with individual circumstances.

First, make the sides using 2 by 12-inch lumber. The pieces are tapered to 7 1/4 inches at the base along the front edge only.

The shelves and bottom of the planter are made of 2 by 8 and 2 by 10-inch lumber. (If thinner lumber is used for the shelves, center supports will be necessary on long spans). The boards are ripped to the dimensions shown in the diagram and then beveled. Next, the front and back of the planter are made of 2 by 8-inch lumber—bevel the front on the top and bottom edges; rip the back to a width of 5 1/2 inches. Make the back of 1 by 12-inch lumber cutting the pieces 30 1/4 inches long.

The top trim is made of 2 by 2-inch lumber.

Assemble the project using glue and finishing nails. Finish as desired.
