

Families Eat Better Today; About Same Dollar Portion Used for Food

Better meals that take less kitchen time to prepare are among the shopper's greatest blessings. And the business of farming can show for much of the credit, note Oregon state college food marketing specialists.

Families are eating better than ever before—but take about the same portion of the dollar to buy groceries today that it took 20 years ago. Wage earners today work a third less to earn a more varied "market basket" of farm products food. Ten years ago it took them 14 hours and 10 minutes a week to earn enough for these foods—the time has now dropped to 9 hours and 21 minutes.

Production of food to meet the needs of the growing population is big business for the 55,000 farms in Oregon. Specialists note that a total of 1,743,000 persons in Oregon eat about three meals every day, which amounts to an average of nearly 1600 pounds of food per person a year.

Temperance Aids Holiday Safety

Memo to tossers of Christmas parties: "Keep the cork in the bottle—the family happiness you save may be your own." That reminder went out from National Safety Council in its campaign urging business and industry to keep office parties dry during the holidays.

Surveys reveal the deadliest traffic hour of Christmas is between 6 and 7 Christmas eve when workers are rushing home. And don't depend on the coffee urn to sober up, the Council warned. Time—not coffee—is the only cure. It takes three hours to recover from just two cocktails.

Aliens Register During January

James L. Turner, district director of the immigration and naturalization service, estimated today that 20,000 aliens will report their address in the State of Oregon in January under the federal alien address program.

Mr. Turner said that 19,563 aliens reported their address during January, 1958. The law requires all aliens in the United States, with few exceptions, to report their address during each January. Throughout the United States almost thirty per cent more applications for naturalization are received during January, February and March than are received during other months.

Research has helped farmers farm better. They are using more fertilizer, machinery, irrigation and electricity, and more chemicals to control weeds, diseases and pests.

Linnton Traffic Change Approved

It is not known just how far the state highway appropriation will go on the Linnton area, but the whole purpose of the project is to eliminate the traffic congestion in the Linnton area, Oregon state highway officials said this week.

Linnton Traffic Change Approved

By mid-July cold storage holding of strawberries in the nation amounted to more than 213 million pounds compared to 213 million pounds the same time a year ago.

Tire wear can indicate faulty braking, bad wheel alignment, over-steering and improper air pressure, according to tire specialists. Inspect your tires regularly for worn spots, tears and scrapes and maintain recommended inflation.

Part of the money will also have to be used for the purchase of rights-of-way in the area, the officials reported.

OFFICE SUPPLIES

Signs — Posters — Business Cards Stationery — Envelope Returns Statements — Wedding Invitations.

OFFICE SUPPLIES

Signs — Posters — Business Cards Stationery — Envelope Returns Statements — Wedding Invitations.

The project is programmed to start after July 1, 1959. The highway officials also reported that the exact location of the highway through Linnton has not been determined as yet as there are a lot of problems with the many buildings in the area.

The Linnton section, known to motorists on the Lower Columbia River highway as the Linnton bottleneck for years has been the object of complaints
