WILLY TOOTS First and Present

IN 17th CENTURY ENGLAND
 when a shipowner wanted to insure his vessel he would post a notice naming the ship, its destination, route, and amount of protection desired. Persons wanting to share in furnishing the protection would write—under the name of the ship—their name and the amount of risk they were willing to assume. From this the word "underwriting" came into being!
 Getting insurance to take over your worries is much easier today—just call on us.
