**Magnet Removes Metal Objects From Highways to Aid Drivers**

In this age of higher speeds and super highways, a car straining a stray nail or a piece of scrap can result in a fatal accident.

The Oregon State Highway department, in an attempt to eliminate these accidents, employs a truck-mounted electro-magnet to sweep metal debris from state highways.

Object of this operation is to cut down some of the 3341 accidents Oregon had last year involving a single car leaving the road. These single-car, non-collision accidents claimed 125 lives.

The truck-mounted magnet, an invention of highway department employees, has been used for 30 years. It has probably eliminated an untold number of flat tires and auto accidents while picking up thousands of pounds of metal along the roadways.

**Catalogs Out For Ram Sale**

Catalogs for the 22nd annual Willamette Valley Ram Sale to be held at the Linn county fairgrounds in Albany on Saturday, August 4, are now available, reports County Extension Agent Don Coin Walrod. Requests for catalogs should be sent to O. E. Mikesell, secretary, P.O. Box 365, Albany.

The catalog lists 250 head of the Willamette Valley's finest stud and range rams and ewes. All animals are yearlings and registered. Breeds represented include Romney, Lincoln, Corriedale, Columbia, Cheviot, Shropshire, Hampshire, Southdown and Suffolk.

Local consignors include Kent and Dick Magruder, Clatskanie, with Lincoln and Shropshire rams consigned to the sale. Sale time is for 10 a.m. standard time.

**Chemicals Need Special Care**

Walk into any garage and you will see an array of chemicals that looks like the prescription counter at the corner drug, observes Don Coin Walrod, county extension agent.

The home gardener's arsenal of insecticides, fungicides and herbicides need to be stored behind closed doors, preferably padlocked, says Walrod.

**Soil Testing Time Is Now**

Twenty minutes in early August may save 10 or even 20 days in September, says County Extension Agent Don Coin Walrod. This time factor concerns soil testing and possible fall liming and planting programs.

Soil tests generally require about three weeks for completion. Since many farmers find liming easiest and most effective in the fall, immediately after harvest, a completed soil test will expedite the liming program.

You'll probably never live 'til ninety if you keep looking for it on the speedometer.
