TIMBER—Mrs. Roy May received a letter from a grandson, Alc Larry Gray, telling of life in camp on Greenland. He said they had 24 hours of daylight and very soon would be having the long night. Their quarters are very small and each room holds two beds. The wind is so strong the roofs are made of 18-inch cement to keep them from blowing away. They have TV. The base monitors its own programs, one channel only. Also one radio short wave program comes in part of the time, but no newspapers from the states. They have a base paper they call the Thule Times. It gathers news from the states and publishes some of it.

1964 Trapping Regulations Set

Oregon trappers may now obtain copies of the 1964 trapping regulations. Copies of these rule books have now been received by the game commission from the printers and will be sent to interested individuals on request. Trappers may also obtain copies of the rule book at the commission's Portland headquarters, 1634 S. W. Alder.

Regulations for the 1964-65 season are similar to last year with only minor changes made in some of the trapping areas. Season dates remain identical to previous years.

Trappers are reminded that all traps must be marked with a brand approved by the game commission. Trappers are required to register with the game commission for the brand.

Nutria and opossum have increased and spread from recent illegal introductions and are now presenting a serious threat to agriculture and wildlife. The game commission urges all trappers to catch and destroy these animals at every opportunity.
