

Yuletide Theme Provides Festive Atmosphere For Holiday Season

Ken swapped a college education for a \$6.50 pair of jeans.

Ken, age 17, was recently arrested and convicted of shoplifting. Here's what he has to say about it.

"Man—I don't think I'll ever get over it. One lousy pair of jeans. I even had the money in my pocket. All I wanted to do was see if I could get away with it. It seemed so easy.

"The next thing I knew they were calling the police. THE POLICE! I even offered to pay for the jeans, but it was too late.

"But that's not the worst of it. I've got a record now. And as for getting into college, the minute they dig up my record—it's forget it."

But Ken didn't just steal from a store. Since shoplifters cause higher prices ... shoplifters take everybody's money.

NO IPS, ANDS OR BUTS, SHOPLIFTING IS STEALING.

Elk Hunters Asked for Return of Report Cards

Oregon elk hunters are urged to dig down in their wallets for the elk hunter's report card, answer the several questions, sign the card, and return it to the Game Commission. The card is self-addressed and no postage is needed.

Nimrods will be making an important contribution to help determine the elk harvest for 1972 by the return of these cards. Although the cards are not used to compute total harvest (this is accomplished by a questionnaire survey of 20,000 hunters), they are used to prorate the take of elk by game management units and special hunting areas. The more cards returned, the more accurate is this determination.

Chlorine was discovered in 1774, by Carl Wilhelm Scheele, a Swedish scientist when he poured concentrated hydrochloric acid upon manganese dioxide.
