Bond Totals At Record High

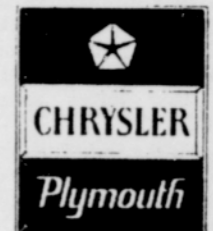

Total nationwide holdings of U.S. Savings Bonds and Freedom Shares rose to the record-high level of more than \$60 billion in July - representing almost 23 percent of the publicly held portion of the national debt. At the same time, holdings throughout the state were estimated to be approximately \$500 million of the \$60 billion.

Columbia County contributed \$40,646 of the July totals which brought year to date sales to \$334,634 for the county.

Savings Bonds Chairman for the state, Thomas S. Prideaux, Executive Vice President and Assistant to the President, United States National Bank of Oregon, praised achievement as "great news for the Bond Program and for our people all over Oregon. They know that, when they buy and hold onto their Savings Bonds, they are building a wealth of lasting security for themselves. So they buy through Payroll Savings, or at the bank.

"In these days of perplexing price problems," he added, "when we need to make every dollar count, it is so good to know that there remains no better, no easier, no safer, no surer way to save than through the regular purchase of U.S. Savings Bonds.

"And there is," he continued, "no stronger back-up to my contention than the more than \$60 billion outstanding, in the hands of millions of satisfied Americans everywhere."
