Absolute Security

is the best we have to offer. We believe the first duty of a bank is to protect the funds of its depositors. Neither the officers nor the directors of our bank speculate with their own funds or the funds of the bank. It is our policy to maintain our well earned reputation for safety and conservatism. Our bank is not only a Home Bank but a Substantial Bank and protects the interests of the borrowers as well as the depositors.

We invite your account and assure you every accommodation that a strong, safe bank may render.

Saved the Shamrock.
Michael Donnelly, twenty-two, an Irish immigrant quarantined in Cleveland, O., for smallpox, when told that all of his personal effects must be burned, succeeded in inducing the health officials to exempt a shamrock he had brought with him.

Taking a Chance.
"What I want," said the young man, "is to get married and have a peaceful quiet home." "Well," said the widower of a couple, "sometimes it works that way, and then again sometimes it's like John's a debatin' so clety."—Tit-Bits.

Good Idea.
Jack Hardup (with unwonted enthusiasm)—"By Jove! I see that some fellow is talking about introducing a bill into the house making it a misdemeanor to send annoying letters to anybody. Very clever idea, that. I'll have my tailor locked up for six months, by Jove!"

Reason as Regulator.
Rightly employed, the reason is not a check to piety, but is its regulator. It chastens and refines the flame of devotion in the human heart, but does not put it out.—Wendell.

THE DOCTOR'S IDEA

Fair Patient—Doctor, what can I do to make the freckles on my face less conspicuous?
Doctor Doem Gude—Get some more freckles.

Two Fries.
A youth was going out to his first formal dinner party. His mother said: "Now don't forget your manners, James; be sure to say something complimentary when the food is passed." He endeavored to do so. When butter was served he remarked pleasantly: "This is pretty good butter, what there is of it." The remark was not well received; he saw that he had made a mistake, and he endeavored to correct it by saying: "And there's plenty of it, such as it is."

Cooking Hint.
Whenever you are baking cookies pin a piece of muslin over the bread board, stretching it tight. Flour the muslin well, and you can roll the dough as soft and thin as you please. A piece of muslin around the rolling pin is another improvement.

It Comes From Paris.
Quite the newest dining fad in Paris is to have everything of the very simplest. Four simple but, of course, exquisitely served dishes take the place of the usual long dinner, and the table decoration consists of a crystal or cut glass bowl of violets. The effect is charming.

Man's Muscular Force.
A man is weakest in the morning, just after rising from bed. Our muscular force is greatly increased by breakfast, but it attains its highest point after the mid-day meal. It then sinks for a few hours, rises again toward evening, but steadily declines from morning.

Better Done in Private.
A well-known doctor, we read, advises people to roll the eyes in order to strengthen the eye-muscles. A little risky, perhaps; for if this exercise were carelessly practiced in crowded restaurants and other public places, the eye would stand a good chance of being suddenly blackened.

Deer Going to School.
Children attending the Centennial school in Barhamsted, Conn., were astounded, as well as the teacher, the other day, to see deer at the school house windows. The session was temporarily interrupted to permit the pupils to count the herd, which numbered 24.

Mistaken Kindness.
Permitting relatives or fond friends to give a child sweetmeats is mistaken kindness—in many homes of refinement children are taught not to accept offerings of this nature. The early years of development depend so materially upon strict diet.

Where They Disagree.
Meyerbeer and Rossini, in spite of all their rivalries, were the warmest of friends. Rossini once said: "Meyerbeer and I can never agree." When some one in surprise asked why, he replied: "Meyerbeer likes sauerkraut better than he does macaroni."

Self-Massage.
To enable a person to massage himself without assistance there has been patented an apparatus to be fastened to a wall, adjustable to any height, in which a wheel with leather covered balls on the ends of the spokes is rotated by cranks and suitable gears.

Queensland's Sheep Queen.
E. Jowette, one of Queensland's best-known squatters, has about ten sheep stations in Queensland, and shears over 1,900,000 sheep. On one of the stations, Kynuna, he shears 200,000, and he has just bought two other sheep stations.—London Standard.

No Advancement.
Experts in Brazilian agriculture unite in affirming that methods of growing tobacco, gathering the crop and curing it have changed little, if at all, since the days of the early colonists, two centuries ago. Practically nowhere is there any idea of tilling the soil and cultivating the crop with an instrument more modern than the spade.

Must Ever Be Before Us.
But, were all its representations of objects, deeds and men, which are out of the range of our sights, obliterated, the most of the globe and its history would no more exist to our material senses than the scenery and affairs of other planets.

Weeks—Well, Count, how do you like our language?
The Count—I like eet not von beet, in such vot you call ze fact I hate ze language. Eet I could I would murder ee ze language!
Weeks—Well, don't worry, Count. You're succeeding all right.

Inevitable.
"They ain't no use talkin' to a woman," said Charcoal Eph as he emerged from a dispute with Mrs. Charcoal. "She done bound 'er gits' wid weepin' as 'mamah yo' wid a fattron, bullers me! Han me de boss haiment, Mistah Jackson!"—Baltimore Sun.

Fowls of the Air.
"When I order poultry from you again," said the man who quarrels with his grocer, "I don't want you to send me any of those aeroplane chick ens." "What kind do you mean?" "The sort that are all wings and machinery and no meat."—Good House-keeping.

Too Much Rubbish.
It is a blessed thing indeed that none of us can take our rubbish to another world, for if we could some of the many mansions would be little better than lumber rooms.—Jean Ingelow.

Sure Thing.
A scientist says that people would have more sense if they did not wear hats. Yes, and husbands would have more dollars.—Charleston News and Courier.

True Wisdom.
Wisdom is judgment grounded upon the value of things; and not on the common opinion of them.
