

STATING THE FACTS

Editor Resolves to Tell Truth and Shield Nobody

(From the Dallas Pitchfork)

Best Texas editor got tired of being called a "liar" because of an occasional typographical error or slight misstatement of the facts in publishing commonplace news items. In his announcement in boldface black ink follows:

Lot of people in this town fall out the editor and brand him as a liar because of the ordinary human mistakes of showing up in a newspaper. You have charity and fellow feeling for a man in town but your editor, I claim that you want the facts, and I don't give 'em to you. Read next issue of this sheet and you'll see facts with the bark off. I'll admit I have been a liar, an editor, ever since I have been editing this sheet, but I have never printed these columns except to save my feelings from being hurt. I'm afraid of any of you and I'll be damned if I don't print the plain facts from now on, or until you get out of the habit of calling me a liar every time I make some little unavoidable typographical errors. Watch my

are some paragraphs culled from the next issue:

Benjamin, the laziest merchant in town, made a trip to Belleville yesterday.

Coyle, our grocery man, who with the Republicans in 1896, and who more mail-order whiskey than any other member of the Baptist church in this country, is doing a poor business. His store is dirty and dusty. Wonder he has any business at all.

Sty preached last Sunday at the Christian church. His sermon was punk and uninteresting, except for the fact that he failed to give any credit. He also recited a few lines from one of William Elbert's sermons and had the gall to call it his own.

Charlier died at his home, two miles north of this place, last Thursday. Doc Holderness, who is an old member of the family, attended him a few minutes before he expired. He was out that Dave died of heart failure. That is a lie. Dave died of having too much of a very poor grade of hard-boiled hickory. This paper prints the truth.

Lloyd, cashier of the State Bank at Willow Grove, died Wednesday and was buried Friday by the Odd Fellows in Pleasant Mound cemetery.

been taking this paper seven years and so far hadn't paid us a cent; asking that he, being a banker, pay some time. We will sell the paper for two bits' worth of fresh

Miss Susie Scruggs and Giffin, last Saturday, at the last parsonage, Rev. James C. Giffin officiating. The bride is a ordinary town girl who flirts with traveling men she meets and helped her mother three days all together in her whole life. She is a beauty, resembling a spit in the face, and walks like a

The groom is a natural born bum. He never did a lick of work until his stepdaddy run him off some last fall. He went to the seat, and just before starving to death, accepted a job as chambermaid in a livery stable. As soon as his hand out where he was, she went him and brought him home.

resides at the home of his father and says that he has no plans for the future. So he has a hard row to hoe."

MADE EVAPORATOR FOR HOME-GROWN STUFF

an Agricultural College, Corvallis, 2.—Growers of win-the-war may save the most valuable part of their surplus products by evaporating at home in a simple and cheap made evaporator designed by the horticultural department and explained in extension bulletin ready for distribution. The bulletin is "A Moderate-Evaporator for Fruits and Vegetables."

Photographs and drawings are made to plain the text, and most of all these almost any one can undertake it may build at an effective evaporator.

capacity of this evaporator is several bushels. Since most of the evaporated products can be dried out to a shipping stage in about six hours, it is seen that the products may be used in commercial quantities if more families go in together and operate one of these

in common. Following the ideas of the bulletin the way it will frequently be to construct the drier out of materials as are at hand, or to use some unused building, such as a chicken-house, with heat produced by a heater or the laundry stove.

and women who used to sun-dry their fruits and keep off the flies by netting for several days to get the fruit and vegetables in a dry, rain or shine.

FARM WOMAN CARRIES TON OF WATER DAY

In a bulletin of the United States bureau of education, the rather startling statement is made that the average farmer's wife has to lift a ton of water a day. Here is how it is figured:

The getting of the water from the source of supply to the point of application requires more manual labor than any other item of housekeeping. The water for the kitchen has to be lifted from the well, carried to the kitchen, poured into a kettle, poured out of the kettle into the dishpan, from the dishpan out of doors. This makes six times the water is handled; and a bucket of water contains two gallons, with the containing vessel, will weigh 20 pounds. When this is handled six times, the total lifting is 120 pounds. The cooking of three meals a day on a meager allowance of water will necessitate 10 buckets, which will make for cooking alone 1200 pounds of lifting per day. When to this is added the water necessary for bathing, scrubbing and the weekly wash, it will easily bring the lift per day up to a ton. And the lifting of a ton a day will take the elasticity of a woman's step, the bloom out of her cheek and the enjoyment from her soul.

Twenty Dollars at Interest

Let a young man at 20 years of age put \$20 at interest, instead of expending it for tobacco. Then, at the beginning of the next year repeat it, and include also the principal and interest of the preceding year, and thus continue to do from year to year, until he shall have reached the age of 70; the amount he would realize would exceed \$30,000.

How many of our young men will try it?

For Sale

Fifty tons of hay, one fine Jersey cow, one horse with buggy and harness. "Come running" to Journal office if you mean business.—Adv.

NOTICE FOR PUBLICATION

Department of the Interior, U. S. Land Office at Vale, Oregon, July 25, 1917.

Notice is hereby given that Engebret Sorensen, of Ontario, Oregon, who, on February 18, 1914, made Homestead Entry No. 03120, for NE 1/4 Sec. 10, and who on May 26, 1915, made Adul. Homestead Entry No. 03861, for the SE 1/4 Sec. 10, Twp. 19 S., R. 46 E., Willamette Meridian, has filed notice of intention to make Final Three-Year Proof, to establish claim to the land above described, before the Register and Receiver U. S. Land Office, at Vale, Oregon, on the 5th day of September, 1917.
