FOOD ADMINISTRATION FACTS

One ounce less of meat each day for everyone means a saving of 4,400,000 meat animals a year. Save your ounce. The sacrifice is small, but the result for your country is large.

1,185,000 tons of sugar will be saved the first year if each of us uses one ounce less each day. This will keep sugar plentiful and cheap.

The Allies are all in the same boat, a long way from shore and on limited rations—and Uncle Sam is running the relief ship. It's up to us to save the cargo.

Reduction, Production—the 1918 watchwords.

Food will win the war. Save it. Produce it.

If you run your household on three pounds of sugar a month per person, when fall comes the grocer won't have to hang up the sign "No Sugar."

The second helping is getting to be bad form.

There's lots of money to go round, but bacon, beef and wheat can't make the circuit. Save your share.

Waste and want are twin sisters and neither beautiful.

Butter wrappers printed while you wait at the Journal office.
