TO HONOR GOLD DISCOVERER

Project for Establishment of a Museum at Placerville, Cal., in Memory of James Marshall.

Miss M. A. Kelley of Kelsey, instructor in El Dorado county schools, has undertaken the establishment of a Hangtown museum at Placerville, and a similar institution to be erected surrounding the blacksmith shop of the late James A. Marshall, discoverer of gold in California, as it now stands in Kelsey. The Hangtown museum as contemplated is to contain exhibits of the days of '49 and the various articles used in gold production during the early days of Hangtown.

A large assortment of these exhibits is available from old residents or descendants of the pioneer families in El Dorado county. Placerville will support the location and maintenance of the museum. At Kelsey, where the old blacksmith shop of Marshall now stands almost ready to fall to pieces, it is desired to build a stone wall and covering around the old shop to preserve the remembrance of Marshall.

Miss Kelley knew Marshall intimately. Many people have it that Marshall died a pauper. This, Miss Kelley says, is untrue, and that he not only possessed the hotel where he died, but had two gold mines known as the "Big Sandy" and "Gray Eagle," both of which are productive mines and now owned by the Breyman estate of Toledo, O.

The Irregular Males.

Oliver Iselin, on leave in Tuxedo, was praising the American girls engaged in war work overseas.

"And they're good girls," he said, "better girls, I believe, than our country ever turned out before."

"They're certainly better than the old ladies, male and female, who spy on them on the pretense of looking after their morals."

"One of these old ladies, an elderly New York broker, was talking to a canteen girl in Paris."

"Yes," the girl said, "I adore my work. The only thing I complain of is the irregularity of the mails."

"The old broker heaved a sigh and tried to take the girl's hand, but she drew it away."

"Ah, yes," he said, "the males were irregular, too, in my young days. As we used to put it—Never trust a female too far nor a male too near."

Preserve the Trees.

Probably the most highly prized tree in the world is the avocado pear tree in California, which returns an annual income of \$3,000, and was once insured for \$30,000. As to trees in general, immediate money returns supersede, in most minds, sentiment or natural beauty. A "landscape robbery" which caused the "robbers" no compensations, was the cutting of a splendid yellow poplar which for several generations had been a landmark among the Cumberland hills. The forest monarch, yielded over 7,000 feet of first-class lumber, valued at \$11,000. There was no one to cry "Woodman, spare that tree!" whose protest counted against its destruction. The countryside has lost a natural beauty never to be restored; the owner has money in his pocket. As Joyce Kilmer wrote: "Only God can make a tree."

Australia's Wool Crop.

For the first time the whole of the Australian wool clip has been valued on a scientific basis. Some 684,000,000 pounds have been handled, and the result, based on the all-round flat rate of 15 1/4 pence per pound, is said to be 14,680. Last season the appraisements worked out at 14.15d, which shows an increase for this season of 9.5 per cent. The new clip has already commenced to move into Sydney, 8,355 bales having been received. Freight is still a problem and not much relief is in prospect, but some relief will be afforded by the government stores.

The proposed plan of reclamation contemplates the lowering of the ground water table by intercepting the injurious seepage water, collecting excess surface water, providing adequate outlets therefor. The correct location, size and extent of the necessary ditches and drains to accomplish the reclamation of the lands in the most effective and economical manner will be determined through surveys, testborings and other investigations by the engineer. There will be three principal ditches or drains following in general the natural drainage courses; the first will commence in the SE 1/4 of Section 33, T. 20 S., Range 46 E., and extend in a Northeasterly direction to the point of discharge into the Owyhee River near the NE corner of the NW 1/4 of Section 19, T. 20 S., R. 47 E.; the second will commence in the SE 1/4 of Section 34, T. 20 S., R. 46 E., and extend in a Northeasterly direction across the North 1/2 of Section 35, T. 20 S., R. 46 E., and the East 1/2 of Section 26, T. 20 S., R. 46 E., thence in an Easterly direction across the North 1/2 of Section 25, T. 20 S., R. 46 E. to the
