Melba, Idaho, Route 1.

## Apple Valley

By Our Regular Correspondent

There will be a meeting of the Junior League next Wednesday afternoon at the school house.

The late flu patients at the hotel have all about recovered.

Mr. and Mrs. J. M. Judd of Caldwell visited at Mrs. Ferguson's one day last week.

The Ladies Aid netted the neat sum of \$27 in serving lunches at the Jackson sale Tuesday.

Mrs. W. C. Marris and Lucile Stephens accompanied Mrs. Hershey on her appointment at Pleasant Ridge Sunday.

Alene and Lucile Stephens were somewhat shaken up and bruised in an auto accident Tuesday.

Martin Bos came home last week from an eastern camp and was discharged at Fort Russell, Wyoming.

Mrs. Bruce Dunnean of Nyssa is visiting at the parental A. W. Foulds home.

A large crowd attended the sale at the C. S. Jackson ranch Tuesday. Everything sold pretty well except the sheep and young stock, which went a little light.

Mr. Kellar of Ontario has rented the Jackson place for the coming season and is already moving in.

J. J. Hicks and family and Roy Gee and family of Roswell spent Sunday at the P. T. Lingman home to visit with Ray Hicks.

Mrs. Thornburg, mother of Mrs. Allen, also a sister and a daughter from Enterprise, Oregon, are visiting at the Allen home.

Mr. and Mrs. L. L. Mundie of Parma were callers at the P. T. Lingman home Sunday to see Ray Hicks, who just returned from France.

Mr. Bennett from the Extension Bureau of the University of Idaho, will give a talk at the school house Thursday afternoon on Gardening. This timely subject should interest all who expect to put in a garden this year and a good crowd is hoped for. Miss Riddle our county agent, will also be present.

Ray Hicks, a sergeant in the 147th Machine Gun Bn., in France arrived Saturday evening to visit his sister, Mrs. P. T. Lingman for a few days before going on to Washington. He arrived from overseas in New Port News on the battleship Rhode Island February 28, after a stormy voyage of seventeen days. Was sent to Fort Russell, Wyo. where he received his honorable discharge from the service. While he said he had no complaint to make of the strenuous soldier's life, yet he was pretty glad to get back to good old U. S. A. He left Thursday evening for Prescott, Wash., where his parents and other relatives reside.

A. W. Foulds was quite badly hurt Monday evening when he was thrown off from a truck with a trunk on top of him. Dr. Sarazin was summoned, but found no internal injuries. Hopes are that he will soon recover from his fall.

C. J. Jackson has purchased a newly completed residence in Parma and will move there to live. We are very sorry to lose these people from our community. Mr. and Mrs. Jackson have always been among the foremost workers in church, school and all lines of progressive community work and will be greatly missed.

A wedding took place at the home of Mr. and Mrs. Chas. Willis on Wednesday, March 12, when their daughter Abbie was married to Ralph Gandon of Roswell. The ceremony took place at 3 o'clock, conducted by Rev. J. R. Welch of Roswell.

## Wrestlers Will Meet at Nyssa in Fast Match

A. P. Gibson was one the contestants at a wrestling match at Boise Thursday night which ended in a draw, his opponent being Chester Camp. The bout was declared a draw, each wrestler securing a fall during the 20 minutes of fast work. A number of Nyssaites were present to witness the match, among whom were D. W. Gibson, Mr. Jones, Roy Williams, Johnny Cancellino, Ed Rich and Arthur Roberts.

Chester Camp is now a Boise boy and hails from Bellingham, Wash., where he formerly participated in many matches. Since moving to Boise Camp has been wrestling at the weight of 155 pounds and up to Thursday had night had never lost a fall to an opponent. After the bouts Camp issued a challenge to wrestle Gibson to a finish match, as the one in Boise was a 20 minute limit affair. Gibson accepted the challenge to meet Camp in Nyssa on April 2. Gibson reports the Boise match one of the hardest fought meets in which he has ever participated, which will insure a battle royal on April 2.

## German Cannon Medals for Nyssa Loan Workers

Nyssa Victory Loan workers will receive medals made from captured German cannon. While Nyssa does not need any such inducement to do her part in any patriotic effort, the medals will prove very acceptable as souvenirs of the World War. The Woman's Liberty Loan committee of Portland has forwarded the Journal the following telegram which they had just received from national headquarters:

"The treasury war loan organization has made 2,000,000 medals out of captured German cannon for Victory Loan workers. Instruct all your county and city chairmen to send in their authorized lists of workers to you, then forward these lists to the Federal Reserve chairman of your district. Federal Reserve chairman will upon receipt of list and arrival of medal shipments from factories send county and city chairmen the number specified. Advise that you instruct your local chairmen to secure all possible publicity concerning medal awards. Instruct them also that every worker must be listed in order to secure a medal.

"MARY SYNON, Treasurer National Woman's Liberty Loan Committee."

## Good Word From Paper "Back Home"

From the Chester (Penn.) Times we take the following regarding our fellow townsman, I. Lax:

"From far off Nyssa, Malheur county, Oregon, a section of the Golden West more familiarly spoken as Snake Valley—comes news of the opening of the Lax Pharmacy. It will be interesting to know that the new enterprise will be owned and conducted by Isadore Lax, a former resident of this city, who has been in the West for several years. Lax is well known here, where he attended both the Larkin Grammar and Chester High Schools. For some time he was engaged as prescription clerk at Gleim's drugstore on West Third street. He has a host of friends in this city who wish him success in his new venture."

The above shows the estimation in which Mr. Lax is held by the folks "back home" and will serve to confirm the splendid impression he has created during his short residence among us.

## Journal Will Print Stories of War Heroes

Thousands of members of the American army in France—officers and privates—performed feats of such unusual bravery under fire that they were awarded the Distinguished Service Cross in recognition of their gallantry. There is a thrilling story behind each one of these awards that is well worth telling, but many pages of newspaper space would be required to print them all. Realizing this, General Pershing's staff has selected out of the thousands of cases a number that stand out above the others and typify most strongly the bravery and self-sacrifice displayed by the American army throughout the bloody fighting in France.

The Journal has arranged to print the stories of these super-heroes of the American army. They are remarkable stories, telling of feats of bravery and physical prowess that would almost be unbelievable were they not taken from the official records. The Journal will soon begin the publication of these stories and will print a number each week. They will undoubtedly prove an interesting feature of the paper and you will not want to miss any of them after you have read the first ones.

## TOWN TALK

A. R. McCarty shipped in a carload of bees this week from Kuna, Idaho, and located a part of the lot across the river from Gamble Island on the Oregon side. The balance of the car was divided up among his other yards. Nyssa is beginning to be noted for its bee industry, there being about 2500 stands in the vicinity.

George H. Bodfish, the Malheur City merchant, was in Nyssa looking after property interests Monday. Mr. Bodfish is greatly interested in the Journal's new linotype machine and was one of the first to respond to our request for advance subscriptions with which to pay for installing the machine, remitting \$5 for that purpose.

Mrs. A. P. Gibson received a letter this week from her brother, Earl Johnston, who is with the army of occupation in Germany. Mr. Johnston was buried under several feet of earth by a 75 centimeter shell striking within a few feet of him just before the armistice was signed and suffered severely from shell shock and is just recovering from the effects.

Albert Iredale, looking like a typical "Jackie" in his sailor togs, arrived home Wednesday evening. He received his discharge from the naval service at Philadelphia, where he has been stationed for the past month. During his service Albert had a number of thrilling encounters with the submarines and several narrow escapes, but came out unscathed.

Jack Newby was on the streets Wednesday for the first time since he was buried by a cave-in in the drainage canal a couple of weeks ago. He is considerably the worse for wear yet, and it is only because the doctor is away that he dared to venture out so soon. He describes the sensation of being buried under several feet of earth as being very unpleasant, to say the least.

Sidney Burbidge left on No. 6 Monday evening en route to his old home in England, where his parents and other relatives live. Sidney came to this country about five years ago and is now a full fledged American citizen and recently received his discharge from Uncle Sam's army. This is his first visit home since leaving England and his many friends here wish him all kinds of joy on his trip. He expects to return to Nyssa in the fall after the hay is all in the stack.

## Real Estate Men to Be Licensed

The legislature has passed a law requiring all real estate men in Oregon to furnish a license bond of \$1000 to the state. The premium is \$10 per annum. To those desirous of dealing in real estate we would respectfully solicit the writing of their bond, agents for the National Surety Co.—Nyssa Realty Co., Nyssa Or., J. Boydell.—Adv.

Gasoline Engine, 8 horse power. Also 4-inch centrifugal pump. Fred Klimeback.

## PEOPLE IN EARTH'S INTERIOR?

Man of Science Believed There Were, and Sought Funds to Make an Investigation.

On November 19, 1822, one of the most peculiar petitions ever presented to congress was brought before that body of lawmakers, which was none other than a request from John Clevin Symmes, asking that aid be given him to make a voyage to the interior of the globe, which he believed to be inhabitable. He was permitted to lecture before Union college, at which he expounded his theory, which, however, was met with universal ridicule.

Notwithstanding which he was greatly respected as a man. He held that all planetary bodies, including the earth, are composed of concentric spheres, open at their poles. In one of his memoirs he thus illustrates his conception: "With dividers describe a plane of matter of loose texture, and in the center add a very small circle; draw a line through the center. It is evident that either half of the inner circle, being almost equally surrounded by matter, must be very little gravitated centripetally, so being suspended, only a rotary motion is needed to throw it compactly toward the outer circle. This being admitted it follows that half way from the outlet to the inner side of this circle of matter thus thrown out, a like rarity, suspension or balance of gravity should prevail, and hence a disposition to concentric circles; therefore it follows that successive similar subdivisions should exist, gradually lessening in force and quantity. By applying this principle to the earth I find the necessity of hollow concentric spheres."

## MARKED PROGRESS OF MAN

Invention of Outrigger Canoe Was One of the Greatest in History of the World.

One of the great epoch-making inventions was the outrigger canoe, which is of Polynesian or perhaps Malay origin. It made practicable the exploration of the Pacific and the settlement of island groups separated from one another by vast distances. The great sailing canoes in which migrants from Tahiti voyaged shoreward over thousands of miles of trackless ocean to the Hawaiian Islands, nobody knows how many centuries ago, giving to that archipelago its first population, carried 50 or more men and women, presumably with children accompanying.

Captain Cook, the first white explorer to map the Pacific, found all the island groups inhabited. The people did not say to him: "We are discovered at last!" They were themselves the discoverers. Long centuries before Captain Cook was born they had traversed all parts of that ocean; and the Polynesian navigators had mapped it for themselves with curious charts made of little sticks, children in that part of the world are brought up in boats. They are amphibious. Canoes for themselves they make out of hollowed logs, with sticks of bamboo for outriggers. Land and water are the same to them; they are equally at home in the sea or on terra firma.
