

WOMAN'S NERVES MADE STRONG

By Lydia E. Pinkham's Vegetable Compound.

Winona, Minn.—"I suffered for more than a year from nervousness, and was so bad I could not rest at night—would lie awake and get so nervous I would have to get up and walk around in the morning would be all tired out. I read about Lydia E. Pinkham's Vegetable Compound and thought I would try it. My nervousness soon left me. I sleep well and feel fine in the morning and able to do my work. I gladly recommend Lydia E. Pinkham's Vegetable Compound to make weak nerves strong."—Mrs. ALBERT SULLZ, 608 Olmstead St., Winona, Minn.

How often do we hear the expression among women, "I am so nervous, I cannot sleep," or "it seems as though I should fly." Such women should profit by Mrs. Sullz's experience and give this famous root and herb remedy, Lydia E. Pinkham's Vegetable Compound, a trial. For forty years it has been overcoming such serious conditions as displacements, inflammation, ulceration, irregularities, periodic pains, backache, dizziness, and nervous prostration of women, and is now considered the standard remedy for such ailments.

Kill All Flies! THEY SPREAD DISEASE. Flies, wherever they go, carry germs. They are the carriers of typhoid, cholera, and other diseases. They also carry germs that cause the "rot" of fruit and the "decay" of vegetables. They are also the carriers of the germs that cause the "stink" of the garbage can. They are also the carriers of the germs that cause the "rot" of the horse and the "decay" of the cow. They are also the carriers of the germs that cause the "stink" of the stable and the "decay" of the barn. They are also the carriers of the germs that cause the "rot" of the manure pile and the "decay" of the compost heap. They are also the carriers of the germs that cause the "stink" of the cesspool and the "decay" of the sewer. They are also the carriers of the germs that cause the "rot" of the garbage and the "decay" of the refuse. They are also the carriers of the germs that cause the "stink" of the garbage can and the "decay" of the trash can. They are also the carriers of the germs that cause the "rot" of the garbage and the "decay" of the refuse. They are also the carriers of the germs that cause the "stink" of the cesspool and the "decay" of the sewer. They are also the carriers of the germs that cause the "rot" of the garbage and the "decay" of the refuse. They are also the carriers of the germs that cause the "stink" of the garbage can and the "decay" of the trash can.

Parker's Hair Balm A toilet preparation of merit. It cures itching humors, restores color and beauty to the hair. Sold in 25c and 50c bottles at all druggists.

Immediate Action Necessary. Kind Old Gentleman—What are you crying for, my little man? Tommy Tuff—I can't think of a name for dat guy. K. O. G.—And why should it be necessary for you to think of a name, my little chap? T. T.—Yer wouldn't ask that if yer heard the one he called me.

Catarh Cannot Be Cured by LOCAL APPLICATIONS, as they cannot reach the seat of the disease. Catarh is a local disease, greatly influenced by constitutional conditions. HALL'S CATARRH MEDICINE will cure catarh. It is taken internally and acts through the blood on the mucous surfaces of the system. HALL'S CATARRH MEDICINE is composed of some of the best tonics known, combined with some of the best blood purifiers. The perfect combination of the ingredients in HALL'S CATARRH MEDICINE is what produces such wonderful results in catarhal conditions. Druggists' Testimonials from F. J. Cheney & Co., Props., Toledo, O.

Cross-Examination. Mistress—So you are the brother of my cook? Her only brother? Policeman—I hope so.

FRECKLES

Now is the time to get rid of these ugly spots. There's no longer the slightest use of feeble salves of your freckles, as Othine—double strength—is guaranteed to remove these honest spots. Simply get an ounce of Othine—double strength—from your druggist, and apply a little of it night and morning and you should soon see that even the worst freckles have begun to disappear, while the lighter ones have vanished entirely. It is seldom that more than one ounce is needed to completely clear the skin and gain a beautiful clear complexion. Be sure to ask for the double strength Othine, as this is sold under guarantee of money back if it fails to remove freckles.—Adv.

Superficiality. "There are two sides to every question." "Yes," replied Senator Sorghum. "And too many of us chaps who pose as powerful thinkers don't take the trouble to get to the inside."

BOSCHEE'S SYRUP

will quiet your cough, soothe the inflammation of a sore throat and lungs, stop irritation in the bronchial tubes, insuring a good night's rest, free from coughing and with easy expectoration in the morning. Made and sold in America for fifty-two years. A wonderful prescription, assisting Nature in building up your general health and throwing off the disease. Especially useful in lung trouble, asthma, croup, bronchitis, etc. For sale in all civilized countries.—Adv.

None Satisfied. Officer—But surely you, a millionaire, have little to complain about. Munition Magnate—Oh, I don't know. The multimillionaires treat us like so much dirt.—London Opinion.

Shave With Cuticura Soap And double your razor efficiency as well as promote skin purity, skin comfort and skin health. No mug, no slippy soap, no germs, no waste, no irritation even when shaved twice daily. One soap for all uses—shaving, bathing and shampooing.—Adv.

Always look on the bright side of things—and if you are buying them look on both sides.

FARM STOCK

CATTLE SCAB IS CONTAGIOUS

Disease of Skin Which Affects All Animals Can Be Eradicated by Dipping and Spraying.

(Prepared by the United States Department of Agriculture.)

Small insectlike parasites, commonly known as mites, are responsible for cattle scab, a contagious skin disease affecting cattle of all ages and conditions. There are several forms of the disease, known by such names as "scab," "mange" and "itch." Though the disease itself may not cause death directly, it is responsible for serious losses by causing a shrinkage in the weight of animals, failure of young stock to thrive and gain weight normally and by increasing the death rate of poorly nourished animals of poor vitality, especially range cattle exposed to inclement weather. Cattle scab can be eradicated by dipping or spraying, dipping being the most reliable method, and lime-sulphur, nicotine and crude petroleum dips can all be used with success.

In the western part of the United States, especially where cattle graze on the open range, the losses caused by common scab have been a serious drawback to the live stock industry. It has been greatly reduced and brought under control, but has not been entirely eradicated from the herds of the Western states, and it is important that control measures be practiced continually to completely eradicate the disease and prevent it from again becoming prevalent.

The mite which causes common cattle scab may attack any part of the body covered thickly with hair, but the first lesions usually occur on the withers, on top of the neck just in front of the withers, or around the root of the tail. From these points it spreads over the back and sides, and

Cattle Being Put Through a Dipping Vat to Rid Them of Small Parasites.

unless checked it may involve practically the entire body. The mites attack the skin to obtain food, and in so doing probably introduce a poisonous secretion. A slight inflammation is caused, followed by intense itching. In the advanced stages of the disease large scabs are formed which frequently are stained with blood. The disease should never be allowed to reach this stage, however. In the early stages it yields readily to proper treatment, and heavy losses can be avoided only if the disease is taken in hand early.

While cattle scab can be cured by spraying if the work is done properly, this method is recommended only when the number of cattle to be treated is not large enough to justify the owner in providing a dipping vat. Dipping, however, which consists of immersing animals in a medicated liquid that will kill the parasites, is the only method recognized by the bureau of animal industry in the official treatment of scabby cattle. All animals in the herd should be treated, regardless of the number showing lesions of scab. One dipping generally is sufficient for cattle which have not been exposed to infection but upon which the disease has not yet become apparent. Infected cattle require two or more dippings, according to the variety of the disease present.

LIVE STOCK NOTES

It pays to care well for any animal we keep.

Seculent feed is important any season of the year.

From an economical point of view, it is best not to crowd the horses when first beginning the spring work.

When the sow is about to farrow she should be confined in a rather small area, with a clean, dry bed in a well-sheltered spot away from drafts,

ATTRACTIVE HOME FOR SMALL FAMILY

White Bungalow Is Very Artistic in Design.

HAS UNIQUE ARRANGEMENT

Placing of Rooms Is Convenient and Building Presents Fine Appearance—Plans Can Easily Be Altered to Suit Ideas of Builder.

Mr. William A. Radford will answer questions and give advice FREE OF COST on all subjects pertaining to the subject of building, for the readers of this paper. On account of his wide experience as Editor, Author and Manufacturer, he is, without doubt, the highest authority on all these subjects. Address all inquiries to William A. Radford, No. 1827 Prairie Avenue, Chicago, Ill., and only enclose three-cent stamp for reply.

Since hostilities in Europe ceased and the restrictions that were imposed on building during the war have been removed there have been planned many thousands of homes that will be erected this year. Designs for these homes are as varied as are the individual tastes of the owners. However, there is one type of house that is exceptionally popular. That is the bungalow.

The advantages of a bungalow—that is the house that has all its rooms on one floor—are so numerous that they explain the popularity of this

architectural design. These houses, planned to contain four, five or six rooms usually, are ideal for small families. Architects, too, have designed them so that they present an attractive exterior appearance and give a great deal of satisfaction to the owner.

Illustrated herewith is a fine sample of bungalow designing. This white bungalow of wood construction has a convenient room arrangement and presents a fine appearance. Ranged across the front are living, dining and bedroom, while at the rear is another bedroom, separated from the kitchen by the bathroom.

The porch set into the house is unusual, while the pergola at the side is an artistic addition to the house. The dimensions of this bungalow are 39 by 32 feet. The entrance at the end of the porch leads into the living room, which is 13 by 15 feet 6 inches. In the exterior wall is a fireplace, on either side of which are windows. Four windows are provided in the front of the room. The dining room is 13 by 11 feet and has a colonnade between it and the living room, which makes it a light and attractive room. Adjoining the dining room at the corner is a bedroom, 11 by 11 feet 6 inches. Back of it, also on a corner, is a second bedroom. Between this

many learned for the first time the satisfaction that comes from saving. And there is nothing more worth saving for than a home.

Now that the building season is open it is time to consider what sort of a house to build. The design illustrated here is a good one for those who want bungalows. However, it can be changed to suit the ideas of the builder. By consulting with the local contractor or architect, these changes can easily be made. Also it can be learned what such a bungalow will cost by interviewing the lumber dealer and builder.

Securing the money to build a house is a comparatively easy matter, as banks and individual lenders consider improved real estate the best of security. By paying a small proportion of the cost down, the balance can be paid as rent.

Owning a house is the finest investment in the world, and with all the reasons why building should be done now, home building should be popular this year.

Be Gentle in Speech. We should use great care in selecting our words, and especially our words. For every word stamps itself for good or evil on our bodies and becomes manifest in our lives. The

First Floor Plan.

room and the kitchen, which is also a corner room, is the bathroom. The kitchen is a fine, large room, its dimensions being 14 by 10 feet. A good-sized pantry with an ice box that can be filled from the rear porch is at one end of the kitchen, while in it are the sink and wall case. It also will be noted that numerous closets have been provided, one of them being in the side entry.

The basement is planned to be the full size of the house. This is an important feature of a bungalow, as it provides the storage room for the family. By dividing the basement into rooms with partitions extending to the ceiling, places for the heating plant, vegetable and fruit storage and for such miscellaneous articles as trunks, garden tools, etc., are provided. Considered from almost any view-

point this design is exceptionally good.

In selecting the design for a home, great care should be exercised, as few families build more than once. Every need of the family should be carefully considered before the contract is let, and then the material specified should be of the best quality. While this entails a little more expense, it pays in the long run, as the upkeep cost will be lower.

Just now home building is uppermost in the minds of all people who have been considering building during the last two years. The government, through the United States department of labor, is urging home building, not only because there is an unusual shortage of places for people to live, but because the work is needed to keep labor fully employed while the industrial activities of the country are being restored to a peace time basis.

While it costs more to build now than it did five years ago, the prices of building materials have not risen in proportion to the costs of other necessities of life. Careful analysis of the situation shows that this increase is about 37 per cent, while the costs of other necessities have risen 100 or more per cent. And this same investigation has disclosed that prices are not liable to come down for several years.

There is a pardonable pride in owning the home in which you live. It makes a better citizen out of every man and woman. It is this fact that will make this country impervious to the social unrest that is sweeping through some of the countries of Europe, students of political economy assert.

It requires thrift for most persons to secure a home. During the war,

America's Immortals

Most striking instances of gallantry for which the Distinguished Service Cross has been awarded

Military men of other countries were amazed at the fighting qualities of the soldiers from America—the land of peace. They were amazed at the spirit with which Pershing's fighters went into battle. Thousands of American soldiers won foreign decorations, as well as the Distinguished Service Cross of their own country, in recognition of acts of supreme heroism or sublime self-sacrifice. Following are a few of the most notable cases of bravery on the part of American soldiers in action, selected by General Pershing's own staff as worthy of special commendation.

EMORY J. PIKE, Lieutenant Colonel, D. M. G. O., 82nd Division.

Lieut. Col. Emory J. Pike (deceased) was decorated for conspicuous gallantry in action near Vandieres, France, September 15, 1918. Having gone forward to reconnoiter new machine gun positions, Colonel Pike offered his assistance in reorganizing advance infantry units which had become disorganized during a heavy artillery shelling. Colonel Pike succeeded in locating only about 20 men, but with these he advanced and when later joined by several infantry platoons, rendered estimable service in establishing outposts, encouraging all by his cheerfulness, in spite of the extreme danger of the situation. When a shell had wounded one of the men in the outpost, Colonel Pike immediately went to his aid, and was severely wounded himself when another shell burst in the same place. While waiting to be brought to the rear Colonel Pike continued in command, still retaining his jovial manner of encouragement, directing the reorganization until the position could be held. The entire operation was carried on under terrific bombardment and the example of courage and devotion to duty as set by Colonel Pike, established the highest standard of morale and confidence to all under his charge. The wounds he received were the cause of his death. His daughter, Martha Agnes Pike, lives in Des Moines, Ia.

HAROLD I. JOHNSTON, Private, First Class, Co. A, 356th Infantry.

Private Johnston was awarded the Distinguished Service Cross for conspicuous gallantry, near Peulilly, France, November 9, 1918. When information was desired as to the enemy's position on the opposite side of the river Meuse, Private Johnston, with another soldier, volunteered without hesitation, and swam the river to reconnoiter the exact location of the enemy. He succeeded in reaching the opposite bank, despite the evident determination of the enemy to prevent a crossing. Having obtained the information, he again entered the water for his return. This was accomplished after a severe struggle, which so exhausted him that he had to be assisted from the water, after which he rendered his report of the exploit. His mother, Mrs. Belle Renshaw, lives in Denver, Colo.

JAMES A. SHERET, Sergeant, Company F, 106th Infantry.

Conspicuous gallantry in action near Ronssoy, France, September 29, 1918, when he sold his life dearly, won the Distinguished Service Cross for Sergeant Sheret. During the operations against the Hindenburg line this soldier displayed exceptional bravery in several single-handed attacks on enemy positions. After rushing two hostile posts and killing the occupants with his revolver, Sergeant Sheret attacked four of the enemy in a machine gun position, killed one of them before he was himself surrounded and killed by the other three. Sergeant Sheret's mother lives at 28 West Park street, Albion, N. Y.

BEDFORD B. LUNSFORD, Corporal, Company M, 117th Infantry.

Corp. Lunsford (deceased) was decorated for extraordinary heroism in action near Bellicourt, France, October 7, 1918. When the line was held up by enemy machine gun fire Corp. Lunsford strapped an automatic rifle to his shoulder and advanced in the face of machine gun fire. Firing as he went forward, he killed four of the enemy before he fell dead, riddled with bullets. Thomas Lunsford, his father, lives in Mount Vernon, Tenn.

NELS WOLD, Private, Co. I, 138th Infantry.

Private Wold (deceased) was decorated for conspicuous gallantry in action near Cheppy, France, September 26, 1918. Private Wold rendered most valiant service in aiding the advance of his company which had been held up by machine gun nests. He advanced with one other soldier and silenced the guns, bringing with him upon his re-

turn 11 prisoners. Later the same day he jumped from a trench and rescued a comrade who was about to be shot by a German officer, killing the officer during the exploit. His actions were entirely voluntary, and it was while attempting to rush a fifth machine gun nest that he was killed. The advance of his company was mainly due to his great courage and devotion to duty. His home address was Kelly Lake, Minn.

HARRY L. CAUSLAND, Private, Company I, 357th Infantry.

Private Causland was decorated for conspicuous heroism in action near Bantheville, France, October 24, 1918. Private Causland was acting as ammunition carrier for a machine gun, which was supporting a raid on the enemy by the infantry. While this gun was being operated from a shell hole its ammunition became exhausted and the corporal called back to the carriers, who were in shell holes twenty-five yards behind, to bring up more ammunition. Though the gun position was under heavy enemy fire, Private Causland called out, "I'll take it," and rushed forward with two boxes of ammunition. Just as he reached the emplacement, with the ammunition, he was killed instantly by a machine gun bullet. Private Causland's home was at Anacortes, Wash.

HARRY J. DAVIS, Corporal, Company D, 60th Infantry.

Corp. Davis received the Distinguished Service Cross for extraordinary heroism in action at Cunel, France, October 14, 1918. While the advance of his platoon was being held up by deadly enflaming fire of the enemy, Corp. Davis voluntarily rushed over open ground, through direct machine gun fire, for a distance of over 100 meters, and, with the aid of his bayonet, attacked the nest. He killed both the gunners, thereby silencing the fire, but, during the combat, he himself was severely wounded. It was due to his prompt and fearless action that further advance of his platoon was made possible. Corp. Davis' home is in Philadelphia.

JOHN PRATT, Corporal, Co. L, 166th Infantry.

Corporal Pratt was decorated for conspicuous gallantry in action with the enemy near Chevenges, France, November 7, 1918. Corporal Pratt was on duty as a runner at the headquarters of the advance battalion when the position was being heavily shelled by the enemy. Seeing two soldiers lying severely wounded two hundred yards away in an open field, he crawled under intense fire, gave them first aid treatment and then dragged them, one at a time, back to the dressing station. His exceptional bravery enabled the two wounded men to secure immediate medical attention and saved their lives. His home address is Toledo, O.

HARRY C. SESSIONS, Second Lieutenant, Co. I, 372nd Infantry.

Lieut. Sessions was awarded the Distinguished Service Cross for unusual bravery in action near Bussy Farm, France. Although he was on duty in the rear, Lieut. Sessions joined his battalion and was directed by his battalion commander to locate openings through the enemy's wire and attack positions. He hastened to the front and cut a large opening through the wire in the face of terrific machine gun fire. Just as his task was completed he was so severely wounded that he had to be carried from the field. His gallant act cleared the way for the rush that captured enemy positions.

PHILIP C. KATZ, Sergeant, Company C, 363d Infantry.

Sergt. Katz was decorated for conspicuous gallantry in action near Ectisfontaine, France, September 29, 1918. After his company had withdrawn for a distance of 200 yards on a line with the units on its flanks, Sergt. Katz learned that one of his comrades had been left wounded in an exposed position at the point from which the withdrawal had taken place. Voluntarily crossing an area swept by heavy machine gun fire, Sergt. Katz advanced to where the wounded soldier lay and carried him to safety. His mother, Mrs. Jennie Katz, lives in San Francisco.

ALBERT MEYER, Private, 79th Company.

Private Meyer, who makes his home with his father, Gustave Meyer, 292 West 127th street, New York City, won the Distinguished Service Cross for extraordinary heroism in action near Thiaucourt, France, September 15, 1918. While on duty as stretcher bearer for his company, Private Meyer rushed into the open to rescue another soldier threatened with capture, in the face of a large force of advancing Germans. He killed two of the enemy and brought in the soldier to a place of safety.

Forged Art Work as Rodin's. The French police arrested at Asnières a man named Boyon de Chalus, at whose house they seized a large number of bronzes, alleged to be falsely inscribed with the name of Rodin. Two metal foundries and an Italian sculptor of repute were also arrested. The action of the authorities arose out of information furnished by M. Benedite, the curator of the Luxembourg and Rodin museums, who reported the sale of numerous counterfeit Rodins, of which one lot alone was bought by a dealer for \$3,000.
