Make This Test For Acid-Stomach

There are millions of people who suffer almost daily from the horrors of an acid-stomach—indigestion; sour, gassy, stomach; distressing heartburn; sickening food-repeating; painful bloating and that miserable, puffed up, lumpy feeling after eating. Many of these people have tried treatment after treatment; medicine after medicine; others have gone to doctors and stomach specialists and some to hospitals, but in spite of all their efforts they have obtained no lasting relief or a permanent cure.

These symptoms simply mean acid-stomach. If allowed to run on, they are very likely to cause a lot of serious trouble. Dyspepsia, rheumatism, gout, lumbago, sciatica, splitting headache, dizzy spells, nervousness, sleeplessness, mental depression, melancholia, a feeling of listlessness and all-goneness—these are just a few of the disorders which can be traced to acid-stomach. As a matter of fact, acid-stomach is often the direct cause of those almost incurable conditions known as catarrh of the stomach, intestinal ulcer, and cancer of the stomach. The lives of those who suffer from these serious troubles are nothing short of daily agony. Surely, then, you must see how important it is to go at once to the seat of the trouble—acid-stomach. You know

what acid-mouth does to the teeth—how it eats right through the hard enamel and causes them to decay, gummy, stomach; distressing heartburn; sickening food-repeating; painful bloating and that miserable, puffed up, lumpy feeling after eating. Many of these people have tried treatment after treatment; medicine after medicine; others have gone to doctors and stomach specialists and some to hospitals, but in spite of all their efforts they have obtained no lasting relief or a permanent cure.

Even if you are not suffering any immediate stomach pains, but are not feeling just as fit and fine as you should, you should by all means make this test. Go to your drug store at once and get a big box of EATONIC. It is in the form of pleasant-tasting tablets—you eat them like a bit of candy. EATONIC is prepared for just one purpose—correcting acid-stomach by driving out the excess acid. EATONIC literally absorbs the excess acid. It brings instant relief from the pains of indigestion, heartburn, belching, sour, gassy stomach, bloating, etc. It makes the stomach pure, sweet, cool and comfortable, puts it in a normal, healthy condition, so that your food is properly digested. You need every bit of strength you can possibly get out of the food you eat—and EATONIC helps you get it.

Don't put this test off if you value your future good health and happiness. You run no chance at all because EATONIC is absolutely guaranteed to give you relief or your druggist will refund your money. The cost is a mere trifle.

DEHORNING OF CATTLE URGED

Use of Caustic, Clippers and Saw to Prevent Growth and Remove Horns Is Favored.

(Prepared by the United States Department of Agriculture.)
Dehorning makes an animal more easily handled.

It renders the animal less dangerous to attendants.

It prevents the goring of other cattle in the feeding lot or in transit to market.

It adds uniformity to the appearance of cattle and thereby adds to their value.

Methods of dehorning cattle have been the subject of unusually interesting demonstrations held by cattle specialists of the United States department of agriculture co-operating with

Animal in Dehorning Crate Ready for Operation.

other extension forces. The demonstrators showed how to remove horns with clippers and saws, and with the use of caustic soda and caustic potash to prevent the growth of horns on calves. Dehorning chutes, for holding cattle while being dehorned, were also constructed by the demonstrators, who emphasized the importance of using them instead of resorting to such practices as throwing the animals with ropes, tying them to fences or similar methods which are unsatisfactory. In a number of cases farmers were permitted to dehorn one or two animals to become familiar with the operation. The method of dehorning depends in each case upon the age of the cattle, specialists of the department say. Demonstrations with young calves showed how the growth of horns can be prevented by properly applying caustic soda or caustic potash. Older calves and other cattle were dehorned either with the saw or clippers. While clippers remove the horn more quickly and with less pain to the animal, the saw has the advantage of not crushing the horn, especially in the case of old animals whose horns are hard and brittle. Neither does the saw cause as much bleeding, since by lacerating the blood vessels it causes a clot of blood to form quickly.

NO PLACE FOR SCRUB STOCK

Animal Is Wasteful of Feed and Owner's Labor—Pure-Breds Are Worth More to Keep.

(Prepared by the United States Department of Agriculture.)
Scrub live stock is no longer fit for perpetuation in the United States. A scrub is wasteful of feed and wasteful of its owner's labor. The scrub animal has served its purpose as a connecting link between the old obsolete method of farming and new progressive methods. Thousands of farmers in this country already have discarded scrub stock and are better off because of that decision. Pure-breds are worth more to keep and are worth more to sell. The scrub animal has been useful as a connecting link, but our aim from now on should be to make the scrub extinct and to make it the missing link so far as live stock is concerned. That cannot be done immediately, but it is the goal toward which we should work.

FEEDING SILAGE TO HORSES

Limited Quantity May Be Given if Care Is Exercised—Cannot Consume Large Amount.

Silage may be fed to horses in limited quantity if care is exercised, but a horse cannot consume the large quantities of roughage used by the steer or cow, and the amount of silage given to horses on full feed must be very limited.

LIVE STOCK NOTES

More beef cattle might be raised profitably on many farms.

Heavy feeding does not always produce proportionate gains.

Commeal, boiled potatoes and buttermilk make a splendid ration for the growing pigs.

The first requisites in raising stock is a good feeder, let us say, a judicious feeder, and a well-bred calf.

WHY DRUGGISTS RECOMMEND SWAMP-ROOT

For many years druggists have watched with much interest the remarkable record maintained by Dr. Kilmer's Swamp-Root, the great kidney, liver and bladder medicine.

It is a physician's prescription. Swamp-Root is a strengthening medicine. It helps the kidneys, liver and bladder do the work nature intended they should do.

Swamp-Root has stood the test of years. It is sold by all druggists on its merit and it should help you. No other kidney medicine has so many friends.

Be sure to get Swamp-Root and start treatment at once.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

A Deferential Critic.
"What is that tune the band is playing?" inquired the visitor from abroad. "Johnny, Get Your Gun!" Don't you approve of it?"

"Oh, yes. Every nation must be the judge of its own literature. I have no doubt it is very excellent poetry. But isn't it rather reckless advice?"
