MISTAKE WAGES FOR PROFITS

Grave Error That Is Made by Most People Who Are Working for a Salary.

When our wage-earners and salaried people begin to learn that savings are profits and that the process of accumulating savings is substantially the same as getting profits out of a business, we shall be on the way to becoming a thrifty people.

But very few wage and salary earners know this.

Their mental process, to the very limited extent that their minds enter into the matter at all, is to regard the pay check as profits, which is, of course, a very fundamental mistake.

In the business of wage-earning the pay check is no more profits than is the cash that comes over the counter of a store or through the receiving teller's window at a bank.

A wage-earner's pay check is the gross receipts, and his profits, if there be any, are found by deducting from these gross receipts whatever it costs to keep the wage-earner going.

In business it is well understood that there are just two ways to increase profits: either more money must come in over the counter, or else less must be paid out in keeping up the business. So with the wage-earner. If he fails to save he must fit himself for a better job or else lower his standard of living; there is no other way.—Carl Marshall in the Thrift Magazine.

HERE'S A PUNCTUATION TEST

Make Sense of This Jumble and Prove That Your Think Tank Is Working Properly.

Can you punctuate? No, I am not going to ask you to punctuate the well-known phrase, "It is and that I said not but"—you probably know how to do that already; but I have received an amusing communication from a reader showing how important a part punctuation can play in making sense of what we write, says a writer in London Answers. Without punctuation the following paragraph reads somewhat nonsensically, but if you put in the correct punctuation marks you can turn the sentences into sense:

"Daily the sun sets in a bucket down in this valley primroses can be seen, growing inside the piano are strings of dough bread is made and baked on top of the mountain it is cool in the spring time waits for no woman neither man will wait long to quench the thirst of the thirsty even on a wet day our stewards can give a good and substantial remedy for the gout in toes is a terrible sore thing when trodden on even a worm will turn on carrots carrot seeds will grow on turnips are leaves of iron tools are made for Moses was the daughter of Pharaoh's son and likewise was the son of Pharaoh's daughter."

Credit to Napoleon.

The glory of definitely completing the Louvre was reserved for Napoleon III; the activity he displayed in carrying out this plan compensates to some slight extent for other disastrous episodes of his reign. On the 14th of August, 1857, Napoleon III opened the at last completed Louvre. Two marble slabs commemorated the building of the great French monument, one of the most perfect expressions of the artistic genius of the race. On one of the slabs, which is still in existence, are inscribed the words: "Francis I began the Louvre, Catherine de Medici commenced the Tuileries." On the other marble slab, which has since been removed, it was stated: "1852-1857, Napoleon III joined the Tuileries to the Louvre."

Interpreter Wanted. Curling, like its sister Scottish game of golf, has its own vocabulary. Here is a dialogue in which a Scot in the Antipodes tried to illustrate the "kittie pints" of the game to his New Zealand friends. "What's a pat-lid, Mr. Macpherson?" asked an inexperienced member of the venerable "skip." "Div ye no see, ye gowk?" said the skip. "Ye ding yer stane cannily, but see see fine as fae hog it. Nae haffin' feg, nor hinkin' turn, ye ken, but tentley, that it eye gang's snootin' an' straght as an ailder's walk, hoo-smotherin' among the gualds, till ye fan' on the vera tee. When ye've dune that, laddie, ye've made a pat-lid, and ye may bear the green!"

Alexandria.

Alexandria, founded by the world conqueror, Alexander the Great, is an Egyptian city that is eager to lose its connection with the faraway past and become completely modernized. Fate has favored this ambition, for the wonders that Cleopatra knew have been eaten by fire or swept away by the sea. Alexandria is a city of trade and fashion, dominated by prosperous Europeans too deeply absorbed in the stock exchange to be even vaguely interested in the romantic side of their city.

Plan Moving of Big Grain Crops

Railroad Administration Giving Careful Consideration to Necessary Measures.

EXPECT GREAT WHEAT YIELD

Tonnage of Grain Will Exceed That of Last Year by Large Margin—May Try Permit System Again.

Washington.—The railroad administration is giving careful consideration to the measures necessary for the satisfactory transportation of the anticipated large crops of grains, according to a statement authorized by Walker D. Hines, director general of railroads. The department of agriculture has estimated that the yield of winter wheat will exceed 900,000,000 bushels. A fair estimate of the yield of spring wheat approximates 300,000,000 bushels. The total yield of wheat this year will in all probability exceed the total of last year by from three to four hundred millions of bushels. No estimate of other grains is, of course, possible at this time, but, barring unusual climatic conditions, it can perhaps be properly expected that the tonnage in grain that will be produced this year will exceed that of last year by a considerable margin.

The stable price fixed last year by the government on wheat naturally provoked a desire on the part of the producer to realize his earnings as quickly as possible, and since a stable price has again been fixed by the government for this year's crop it is assumed a similar condition will obtain. Last year this economical condition, coupled with more or less disarrangement in ocean tonnage and consequent disruption in shipping, resulted in such an acute situation at the interior grain markets and at seaports, that it became necessary to install the so-called "permit system," which was early made operative at the ports, and in September, 1918, at the principal interior markets.

Controlling Traffic.

The permit system is a highly beneficial system of controlling traffic at the sources to prevent serious congestion on the road and at destination. This system prevented in the fall of 1918 a serious transportation paralysis of former years due to widespread congestion of traffic which had been shipped but which could not be disposed of at destination. This paralysis of traffic in former years was most apparent in the East, but its injurious effects were felt throughout the country.

While the permit system at the ports is still in operation, it was suspended a few months ago at the interior markets, due to improved ocean shipping and the fact that the bulk of the grain had been moved. It is, however,

ever, to be expected that the system will again be inaugurated with the opening of the new wheat season, and in view of that possibility the railroad administration is already preparing the necessary machinery so that it may be prepared to act without delay at the proper time. Conferences have already been held with representatives of the grain corporation.

As graphically illustrating the necessity of regulating the transportation of this tonnage, and the results obtained from such regulation, the following facts are of value and interest: For the nine months of the crop year, July 1, 1918, to May 1, 1919, there passed through the grain handling facilities of the country—elevators and mills—a total of 3,440,236,000 bushels of all grains, although the highest point of grain storage of all kinds at any one time in that period was 480,000,000 bushels. That is, in nine months the flow of grain was seven times the quantity which accumulated in storage at the highest point during that period. This is a direct illustration of the necessity of keeping the grain-handling facilities of the country liquid to avoid the distress to all interests that would follow the blocking of this flow of grain.

Reinaugurate Permit Plan.

The permit system as operated last year contemplates the closest cooperation between the railroad administration and the United States food administration grain corporation. The local representatives of the grain corporation were in daily contact with

Most Deadly of All War Gases

Ten Tons a Day Being Made When the Armistice Was Signed.

DISCOVERED BY PROF. LEWIS

Ten Airplane Loads of This Super-Poison Sufficient to Have Destroyed All Life in Berlin—Known as "Methyl."

Washington.—At the educational exposition, illustrating the wartime and reconstruction activities of the department of the interior now being held there is being shown under guard a sample of the most terrible super-poison gas known, the discovery of Prof. W. Lee Lewis while in the employ of the bureau of mines at its American university laboratories. This gas, formerly called "Lewisite,"

later known as "methyl," because the latter name meant nothing to curious persons, was being manufactured by the war department at the rate of ten tons a day when the armistice came. The gas is being variously described as "the climax of the country's achievements in the lethal arts" and as "the most terrible instrument of manslaughter ever conceived." The department itself declares that it is the most deadly of all war gases.

Most Deadly of All.

It is said that ten airplane loads of "methyl" would have been sufficient to destroy all life in Berlin. If such extreme measures had been necessary, and that a single day's output would have been sufficient to snuff out the 4,000,000 human lives on the island of Manhattan.

This gas was not only discovered by Professor Lewis, but was also developed by him to a point where it was ready for production at the American university while those laboratories were still under the control of the bureau of mines, one of the organizations of the department of the interior. When this work was first taken up by the bureau in behalf of the military authorities Professor Lewis was called from his civilian duties as professor of chemistry at Northwestern university, Evanston, Ill., and at the request of the bureau was commissioned as captain in the ordnance department and assigned to the gas warfare service of the bureau of mines. While acting in this capacity Professor Lewis discovered and developed this gas, and 18 days after the gas work of the bureau of mines was transferred to the jurisdiction of the war department an 11-acre plant for its manufacture was started near Cleveland, O.

"Mouse Trap" Plant. This plant, which was dubbed by the workmen the "mouse trap," because, in order to prevent the leakage of information, it was understood that the men who entered would not leave until the war was over, was in operation within a miraculously short time, and plans were made by the war department to have 3,000 tons of this most diabolical gas at the American front by March 1, 1919. When the armistice came the plant was well ahead of its production schedule, but the opportunity had not come for the use of the gas at the battle front.

but I think the worst situation that came to my knowledge was in Igdir, where there is a larger proportion of sickness and a higher death rate than in either Erivan or Alexandropol.

"Regarding reports of cannibalism which have come out of this district from Con I have been forced against my will to believe these reports to be true. I saw with my own eyes mutilated remains of corpses which had been exhumed from newly-made graves. I did not see anybody who had actually witnessed the eating of human flesh, but there is so much circumstantial evidence that I personally came to believe it true.

"Typhus has been epidemic during the winter, and has taken away thousands, but with the moderation of the weather it is now decreasing; but cholera is making its appearance, and the outlook is threatening."

King Albert to Visit America.

Paris.—King Albert of Belgium is expected to visit Washington, to attend the initial meeting of the league of nations next October.

Whisky Still Found in Top of Huge Tree

Knoxville, Tenn.—It is nothing unusual to find illicit distilleries hidden in caves, cellars or in dense undergrowth of mountain laurel, states T. B. Ivins, veteran moonshine raider of the internal revenue department. But to find one perched in the top of a towering oak tree is quite a novelty, he says.

Mr. Ivins located a large copper still in such a place when conducting a raid in the famous old Tenth district, or Sevier county, Tennessee. The outfit was dislodged and destroyed.

On a warm day there's no more refreshing luncheon than Libby's Veal Loaf, chilled and sliced! So easy, too. Ask your grocer for a package today.

Libby, McNeill & Libby, Chicago

Every Woman Wants

Paxtine

ANTISEPTIC POWDER

FOR PERSONAL HYGIENE. Dissolved in water for douches stops pelvic catarrh, ulceration and inflammation. Recommended by Lydia E. Pinkham Med. Co. for ten years. A healing wonder for nasal catarrh, sore throat and sore eyes. Economical. Has extraordinary cleansing and germicidal power. Sample Free. 50c. All druggists, or postpaid by mail. The Paxtine Toilet Company, Boston, Mass.

DAISY FLY KILLER ATTRACTS AND KILLS

ALL FLIES. Need clean, ornamental, compact, cheap. Lasts all season. Made of metal, easy to apply; will not soil or burn anything. Guaranteed effective. Sold by express, or by ESTEY'S, prepared, H. L. Harold, 100 E. 42nd Ave., Brooklyn, N. Y.

Everything Lovely.

"Howdy, Gap!" saluted an acquaintance, upon meeting the well known Rumpus Ridge citizen on a shopping expedition in Tunilville. "How's everything going with you?"

"Finer's frog hair, Jurd!" triumphantly replied Gap Johnson. "Of course, my wife has been sorter puny, yur of late, and several of the children have got the measles and mumps and one thing and another, and the lightning struck the corner of the house tuther night and like to have tore the whole place to pieces, and one of the kids fell out of a tree and broke his arm, and a feller took a shot at me day before yesterday and ventilated my car, and such as that, but I swapped for a running horse last week, and a couple of my hounds have got six pups apiece. Aw, I tell you, they can't keep a good man down!"—Kansas City Star.

Well Known.

I was hurrying home up the hill when a little boy came rushing down in such haste that he ran headlong into me. He was quite breathless and very flushed.

"Have you seen my pa?" he managed to stammer.

"I don't know your pa, little boy," said I.

He looked at me in round-eyed wonder and his pink cheeks fairly stuck out.

"You don't know my pa?" he said incredulously. "Why, I know pa just as easy!"—Exchange.

BELCHING

Caused by

Acid-Stomach

Let EATONIC, the wonderful modern stomach remedy, give you quick relief from disgusting belching, food repeating, indigestion, bloated, gassy stomach, dyspepsia, heartburn and other stomach ailments. They are all caused by Acid-Stomach from which about nine people out of ten suffer in one way or another. One writes as follows: "Before I used EATONIC, I could not eat a bite without belching it right up, sour and bitter. I have not had a bit of trouble since the first tablet."

Millions are victims of Acid-Stomach without knowing it. They are weak and ailing, have poor digestion, bodies improperly nourished although they may eat heartily. Grave disorders are likely to follow if an acid-stomach is neglected. Cirrhosis of the liver, intestinal congestion, gastritis, catarrh of the stomach—these are only a few of the many ailments often caused by Acid-Stomach.

A sufferer from Catarrh of the Stomach of 11 years' standing writes: "I had catarrh of the stomach for 11 long years and I never found anything to do me any good—just temporary relief—until I used EATONIC. It is a wonderful remedy and I do not want to be without it."

If you are not feeling quite right—lack energy and enthusiasm and don't know just where to locate the trouble—try EATONIC and see how much better you will feel in every way.

At all drug stores—a big box for life and your money back if you are not satisfied.

EATONIC

(FOR YOUR ACID-STOMACH)

NEW THAT WOULD STOP HIM

Lawyer Evidently Was Well Acquainted With the Weakness of His Long-Winded Friend.

C. H. Murphy relates the story of a Philadelphia lawyer, retired, who, in the days of his active practice, was notorious for his longwindedness.

On one occasion he had been spouting forth his concluding argument for six hours, and the end was nowhere in sight, when the opposing attorney beckoned his associate and whispered:

"Can't you stop him, Jack?"

"I'll stop him in two minutes," Jack replied confidently. And he wrote and passed to the orator the following note:

"My Dear Colonel—As soon as you finish your magnificent argument I would like you to join me at the hotel in a bumper of rare old Bourbon."

The lawyer hurried in the midst of an impassioned period, put on his glasses, and read the note that had been handed him, then he removed his glasses again and, taking up his hat and bag, he said:

"And now, may I please the court and gentlemen of the jury, I leave the case with you."

A minute later he was proceeding in stately fashion in the direction of the hotel bar.

Who'd do the work of the world if everybody were rich?

Brighten the Morning Meal

with a hot drink that gives refreshing invigoration.
