

FRECKLES

Now Is the Time to Get Rid of These Ugly Spots

There's no longer the slightest need of feeling ashamed of your freckles, as Othine—double strength—is guaranteed to remove these homely spots. Simply get an ounce of Othine—double strength—from your druggist, and apply a little of it at night and morning and you should soon see that even the worst freckles have begun to disappear, while the lighter ones have vanished entirely. It is seldom that more than one or two are needed to completely clear the skin and gain a beautiful clear complexion. Be sure to ask for the double strength Othine, as this is sold under guarantee of money back if it fails to remove freckles.—Adv.

His System of Memory.

Teacher—With whom did Achilles fight the Battle of Troy?
Pupil—Pluto.
Teacher—Wrong.
Pupil—Nero.
Teacher—Nero! How do you—
Pupil—Then it must have been Hector. I know it was one of our three dogs!

His Experience.

"Had any railroad experience?"
"Sure," said he. "I've run a pump at a gasoline station."

Save the Babies

INFANT MORTALITY is something frightful. We can hardly realize that of all the children born in civilized countries, twenty-two per cent., or nearly one-quarter, die before they reach one year; thirty-seven per cent., or more than one-third, before they are five, and one-half before they are fifteen!

We do not hesitate to say that a timely use of Castoria would save many of these precious lives. Neither do we hesitate to say that many of these infantile deaths are occasioned by the use of narcotic preparations. Drops, tinctures and soothing syrups sold for children's complaints contain more or less opium or morphine. They are, in considerable quantities, deadly poisons. In any quantity, they stupefy, retard circulation and lead to congestions, sickness, death. There can be no danger in the use of Castoria if it bears the signature of Chas. H. Fletcher as it contains no opiates or narcotics of any kind.

Genuine Castoria always bears the signature of *Chas. H. Fletcher*

Too Numerous to Mention.
Lawyer (examining his client in a divorce case)—Mr. Goths, did your wife ever hit you with anything?
Mr. Goths—Sure, she did, with anything!

It takes a lot of salve to turn a human crank.

Up to Dad.
She—"What will our income be when we are married?" He—"Whatever your father thinks best."—Lamb.

Quite Naturally.
"How did the play about the amateur cook pan out?"
"Oh, it had a lot of good roles."

"Meats in Storage"

Every working day of the year 75,000,000 pounds of meat are required to supply home and export needs—and only 10 per cent of this is exported.

These facts must be kept in mind when considering the U. S. Bureau of Markets report that on June 1, 1919, there were 1,348,000,000 pounds of meats in cold storage. If the meat in storage was placed on the market it would only be 20 days' supply.

This meat is not artificially withheld from trade channels to maintain or advance prices.

Meats in storage consist of—

- 65 per cent (approximate) hams, bacon, etc., in process of curing. It takes 30 to 90 days in pickle or salt to complete the process.
- 10 per cent is frozen pork that is to be cured later in the year.
- 6 per cent is lard. This is only four-fifths of a pound per capita, and much of it will have to go to supply European needs.
- 19 per cent is frozen beef and lamb, part of which is owned by the Government and was intended chiefly for over-seas shipment. If this were all diverted to domestic trade channels, it would be only 1½ lbs. per capita—a 3 days' supply.

From this it will be seen that "meats in storage" represent merely unfinished goods in process of curing and the working supply necessary to assure the consumer a steady flow of finished product.

MODERN BARN FOR THE SMALL DAIRY

Building to House 18 Cows and Feed Supply Is Described.

GOOD PROFIT IN MILK HERD

Up-to-Date Housing and Silo Are Positive Necessities—They Keep High-Priced Animals Healthy, Save Labor and Conserve Food.

Mr. William A. Radford will answer questions and give advice FREE OF COST on all subjects pertaining to the subject of building work on the farm, for the readers of this paper. On account of his wide experience as Editor, Author and Manufacturer, he is, without doubt, the highest authority on all these subjects. Address all inquiries to William A. Radford, No. 1327 Prairie avenue, Chicago, Ill., and only inclose three-cent stamp for reply.

Housing the dairy herd in the winter so that the cows will be most productive and most profitable is not much of a problem for the modern dairyman. The present-day methods of designing and constructing dairy barns have been brought to a science by farm building architects and the comfort

and health of the animals, two things necessary if they are to be profitable, are provided for.

Keeping a dairy herd is one of the most profitable parts of the farming business. Not only are the cows revenue producers, but they supply the farm owner with fertilizer that is necessary to keep the soil at its best. For these reasons the farmers who keep good-sized herds of cows are increasing in numbers each year.

Seven months in the year in the corn belt the cows are fed and housed in a barn. And to feed them and water them and milk them and do the other work that is necessary requires a considerable amount of time. At the present price of farm labor, time really is money and the modern barn is designed and equipped so that all this work can be done with the least amount of effort.

Barns of Several Types.
Dairy barns are of several types, but the farm owner with a herd of eighteen or twenty cows wants a building that can be constructed economically and will be weather-proof and arranged conveniently. Such a barn is shown in the accompanying design. This

barn is planned for a herd of 20 cows, their calves and one bull, with storage room for the feed supply.

The dimensions of the building are 36 by 60 feet. It is of standard plank frame construction, set on a concrete foundation. The gambrel-trussed roof, which eliminates all posts in the hayloft, permits the storage of a maximum amount of roughage, while the silo at one end provides the animals with fresh feed all winter.

There are many interesting features—features that make this a modern, efficient barn—shown in the floor plan of the dairy stable that accompanies this article. Through the center of the barn there is a driveway, 6 feet 6 inches wide, while on either side are litter alleys, 5 feet 2 inches wide.

Arrangement of Stalls.
The single cow stalls are ranged along the driveway, which also is used as the feed alley. Single stalls facing the feed alley provide for 16 cows, eight on each side. At the front of the building are two stalls, a bull pen and a pen for the calves. At the rear of the building are feed rooms and, supplied by the farm water system. There are ten windows on each side of the barn and a ventilation system leading to the ventilators on the roof.

All of these features will have an immediate appeal to the dairyman who

has made a study of the best method of housing his stock and of caring for the animals.

The feed alley is equipped with an overhead carrier system that leads from the silo and feed rooms to each stall. The ensilage and grain are placed in the carrier and taken to each manger, which, it readily will be seen, eliminates many steps and much time. Carriers are over each litter alley and lead to the manure pit or pile on either side of the silo at the rear of the barn. Here again the work is done easily and with a minimum expenditure of time.

Tanks Do Not Freeze.

The stall floors as well as the stable floor are constructed of concrete. At the rear of each row of stalls is a gutter, with a drain at one end. It is the work of but a few minutes to flush these gutters after the manure has been removed. The indoor water tanks will not freeze in the winter and water always is available for the stock. With a small additional expense the water can be piped to individual drinking cups at each stall.

Sunshine and fresh air are two of the things that keep the cows healthy and productive. The windows in this barn permit the sunshine to fall on the litter alleys and gutters. Sunshine kills germs and keeps the barn air wholesome. The windows also admit plenty of fresh air, the foul air being drawn out of the stable through the shafts and out of the ventilators on the roof.

Just a word about the silo. One-third of the feed value of corn is in

the stalk. Consequently one-third of the productive value of each acre planted to corn is conserved when the stalks are chopped and stored in the silo. This is the only fresh feed that can be provided for cows in the winter, and there is not only a saving in money, but the cows fed on ensilage produce a larger amount of milk, that is heavier in butterfat.

Positive Necessities.
A modern barn and silo are positive necessities in modern dairy farming. They keep high-priced animals healthy and productive, save labor, and conserve feed, which at its present price is good business.

In planning a dairy barn, or general purpose-barn, it is always well to consult the local architect, builder and material dealer before deciding on the design. These men know how a barn should be built to supply the needs of the individual. They also can tell what such a building will cost, and will help finance the building should it be necessary.

Dairy products are high in price now, just as are other farm products. And they will continue so for some years to come, according to those who are in

Wrapped to insure its perfect condition in all climates and seasons. Sealed tight—kept right. The perfect gum in the perfect package.

New Mineral Found.
A new mineral has been discovered in Siberia. The discovery was made by a hunter on the shore of Lake Balkash, and the mineral has been named balkashite. It has the appearance of dark brown hard rubber, and when ignited it burns with a strong flame, leaving about 2 per cent ash. When placed in water it becomes a mass very much like paraffin.

It is for want of application rather than of means that men fail of success.—Rochefoucauld.

Backyard Pigs.
One town of 2,000 people in Georgia produced 35,000 pounds of pork from pigs raised in back yards during 1918. The production of this meat was stimulated largely by pig club work conducted by the state college of agriculture, in co-operation with the United States department of agriculture.

It is easier to want things than it is to get them.

And there never was a story without two sides to both sides of it.

OLD AGE STARTS WITH YOUR KIDNEYS

Science says that old age begins with weakened kidneys and digestive organs. This being true, it is easy to believe that by keeping the kidneys and digestive organs cleansed and in proper working order old age can be deferred and life prolonged far beyond that enjoyed by the average person.

For over 200 years GOLD MEDAL Haaslem Oil has been relieving the weaknesses and disability due to advanced years. It is a standard old-time home remedy and needs no introduction. GOLD MEDAL Haaslem Oil is enclosed in odorless, tasteless capsules containing about 5 drops each. Take them as you would a pill, with a swallow of water. The oil stimulates the kidney

action and enables the organs to throw off the poisons which cause premature old age. New life and strength increase as you continue the treatment. When completely restored continue taking a capsule or two each day. GOLD MEDAL Haaslem Oil Capsules will keep you in health and vigor and prevent a return of the disease. Do not wait until old age or disease have settled down for good. At the first sign that your kidneys are not working properly, go to your druggist and get a box of GOLD MEDAL Haaslem Oil Capsules. Money refunded if they do not help you. Three sizes. But remember to ask for the original imported GOLD MEDAL brand, in sealed packages.

Hard to Learn Golf.
"How long have you played golf?"
"About 15 years."
"You must play it mighty well by now."
"Not at all. But after I've played it 15 or 20 years more if I keep on improving at the same rate as I have been in the past, I expect to be able to shoot a fairly decent game."

WHY DRUGGISTS RECOMMEND SWAMP-ROOT

For many years druggists have watched with much interest the remarkable record maintained by Dr. Kilmer's Swamp-Root, the great kidney, liver and bladder medicine.

It is a physician's prescription. Swamp-Root is a strengthening medicine. It helps the kidneys, liver and bladder do the work nature intended they should do.

Swamp-Root has stood the test of years. It is sold by all druggists on its merit and it should help you. No other kidney medicine has so many friends.

Be sure to get Swamp-Root and start treatment at once. However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

BAD BREATH

Often Caused by Acid-Stomach

How can anyone with a sour, gassy stomach, who is constantly belching, has heartburn and suffers from indigestion have anything but a bad breath? All of these stomach disorders mean just one thing—Acid-Stomach.

EATONIC, the wonderful new stomach remedy in pleasant tasting tablet form that you eat like a bit of candy, brings quick relief from these stomach troubles. EATONIC sweetens the breath because it makes the stomach sweet, cool and comfortable. Try it for that nasty taste, congested throat and "heavy feeling" after too much smoking. If neglected, Acid-Stomach may cause you a lot of serious trouble. It leads to nervousness, headaches, insomnia, melancholia, rheumatism, sciatica, heart trouble, ulcer and cancer of the stomach. It makes the millions of victims weak and miserable. Listless, lacking in energy, all tired out. It often brings about chronic invalidism, premature old age, a shortening of one's days.

You need the help that EATONIC can give you if you are not feeling as strong and well as you should. You will be surprised to see how much better you will feel just as soon as you begin taking this wonderful stomach remedy. Get a big 50 cent box from your druggist today. He will return your money if you are not satisfied.

EATONIC (FOR YOUR ACID-STOMACH)
