ENTENTE REFUSES TO CHANGE POSITION

French and English Premiers Reject Proposal From President Wilson.

Paris. — Premiers Millerand and Lloyd George have sent a reply to President Wilson's note relative to the Adriatic compromise and hold to their position expressed in the note sent to the Jugo-Slav government on January 20, giving that government a choice between the compromise or the execution of the treaty of London, according to the Echo de Paris.

Hugh C. Wallace, the American ambassador, delivered to the foreign office a memorandum from President Wilson, according to the Temps, in which the president said he could not approve of Premier Lloyd George's proposed settlement of the Adriatic question, which has been submitted to the Jugo-Slavs.

The newspaper says that an identical memorandum was delivered to the British foreign office in London.

In his memorandum President Wilson criticizes Premier Lloyd George's plan as communicated to the Jugo-Slavs by the supreme council on January 20. The president examined the plan, but declares he cannot approve of its tenor. He particularly opposes the idea of giving the Jugo-Slavs the choice between this plan and execution pure and simple of the league pact.

PREPARE TO RETURN DEAD

Men Named to Return Americans Buried in France.

Washington. — Definite steps looking toward the return of America's soldier dead from France were taken when Secretary Baker appointed Colonel Henry Rethers, head of the graves registration service in Europe, and Colonel Bentley Mott, military attaché at Paris, as American members of the Franco-American commission, which will have charge of the work.

The appointments were made in accordance with an agreement with the French government, concluded in August, 1918, providing for the creation of the commission immediately after the repatriation of all American troops in France.

The French government in the opinion of state and war department officials will be bound by the agreement to permit the return of the bodies buried in France, although up to this, disinterment in the battle zone has been refused.

FIVE REASONS Why You Should Buy AMERICAN QUALITY Wood Pipe

1.—The lumber used in making American quality wood pipe is of best grade Washington yellow fir and is free from flaws. It is thoroughly seasoned by kiln drying, which makes it strong and durable.

2.—American quality wood pipe is banded with galvanized steel wire. While a tension is maintained to impress it into the wood it cannot break the fibre of the staves.

3.—Our wood pipe is treated with a preparation of tar and asphaltum to insure it against decay and leakage.

4.—Each length of pipe has an inserted joint. This makes the installation of our pipe easy and inexpensive.

5.—All material and workmanship entering into the manufacturing of American quality wood pipe is guaranteed to be free from defects and the pipe is guaranteed to withstand the high pressure for which it is built.

When this superior wood pipe is used for irrigation purposes there is little waste of water through evaporation and seepage—as is always the case with open ditches. It minimizes the carrying of noxious weed seeds and is guaranteed against all defects and flaws.

Ask at any local Boise Payette yard about American quality wood pipe and let us show you how it can serve you in meeting your irrigation problems.
