**Every Oregon Boy and Every Oregon Girl Is a possible College Student**

Oregon sends a bigger percentage of its children to college than any other state, without exception.

**That is one of the State's proudest records**

No state can have too much education. Education is the safeguard of freedom and of right, and higher education is the capstone of the public school system. But higher education in Oregon is in great danger. The State University and the Agricultural College have twice as many students as they have income to train.

**Protect these Schools and their great work**

by voting on May 21 for the Higher Educational relief measure. Higher Education pays the state in dollars and cents, in improved living, in scientific progress, in farm, orchard, garden, and stock each development, and in the better quality of its public and high school teaching.

Mrs. Gus Schweizer and family, of Ontario, spent the week end at the ranch, as usual.

While showing two "greenies" just how to sack wool, To pack it in tight add fill the sack full,

He got into the sack to tramp the wool down

And furnished the "greenhorns" more fun than a clown

For he couldn't get out as easy as in

And the "green" ones were guilty of one little sin,

For they left the noor fellow to stuggle alone.

The pity they had for him simply was none,

For Ernest, his son, and Clive Williams, as well,

The "green" ones in question this story do tell.

The man who was packed in the sack with the fleece

Was no other person than Mr. John Reece.

Mrs. Fred Klingback is the proud possessor of a fine new refrigerator. Union church services will be held at the school house Sunday evening with several denominations represented.

**Aids to Home Life Happiness**

There is no one thing that will bring you so much comfort, and reduce the drudgery of housework, as electric range.

A turn of the switch brings the radiated heat to the oven or hot plate. Cooking is simplified for this reason may be absolutely regulated at low, medium or high.

Waiting for the fire to come up, the constant adding the nuisance of ashes, soot, smoke and poisonous vapors completely eliminated.

The result is a neat, constantly clean kitchen that is cool. The radiated heat is absorbed by the contents of the cooking vessel, and the oven and broiler are so insulated the heat is contained, and not distributed in the room.

**Electrical Appliances for Many Purposes**

Doing your work electrically is economical from every point of view. It is the ideal of the modern housewife to add one appliance after another until her home is so equipped that housework is remarkably simplified. To do the washing and ironing, cleaning and cooking by electricity, can only be fully appreciated by experience.

We will gladly explain the method and cost of operation of all electrical appliances if you will call at the shop.
