BEAUTIFUL ISLE IS TOBAGO

Cruise's Famous Abode, in the Caribbean, Described as a Place of Many Attractions.

Tobago, the scene of Robinson Crusoe's story, and the one-time residence of John Paul Jones, is an island of supreme beauty nestled in the Caribbean, whose stormy history is without parallel in the blood-stained annals of the West Indies. History says it was fought over for centuries by French, Spanish, British, Dutch and savage Caribs and often deserted for scores of years at a time. The Detroit News recalls, "The title of Tobago's claim to be called Cruise's island is unquestionable. Defoe's hero was one Alexander Selkirk in real life. That he was marooned as related is an historical fact. The natives can even show the caves in which he dwelt, and from one other hole could the runaway have peered forth across the waters of the 'Gulf of Grenada,' to which he refers, and see the faint outlines of the 'Island of Trinidad,' as stated in his story. Wonderfully varied and beautiful is Tobago and the visitor is inclined to wonder why Cruise ever deserted it. Its coast line has crescent moon beaches bordering sheltered coves; outlying verdure-draped rocky islets and wooded bays; surf-washed reefs protecting secluded lagoons. Everywhere wonderfully luxuriant vegetation covers the land. It has a delightful climate, there are no snakes, and it would be an ideal winter resort if its attractiveness were known. There is one village of 2,000 people on the island.

APPLY NAMED 'MOLTEN SEA'

High Priests' Swimming Pool in Solomon's Temple Most Wonderful 'Tub' Ever Constructed.

How many persons ponder, while "tubbing" in the midst of modern conveniences, on how the rest of the world performs this same art of personal cleanliness? The stolon pleasures of the "old swimmin' hole," the wooden tub in the kitchen surrounded by that questionable curtain of privacy—a sheet over the clothes horse—a real sea bath or swim in a "gym" pool here are the stepping stones of progression for most of us to the modern conveniences.

This bathing idea started with Bible folk, who built the most wonderful swimming pool the world has ever seen in Solomon's temple. This "molten sea" measured two cubits from brim to brim, five cubits in height and was round in compass; the thickness was a hand's breadth, and the brim, shaped like that of a teacup, was carved with lilies and leaves. The immense basin was borne aloft by 12 carved oxen, three each facing north, south, east and west. The pool received and held 2,000 bathers at one time and was designed for and used by high priests, there being 20,000 baths of oil provided for the laymen.—Indianapolis Star.

Beautiful St. Sophia.

St. Sophia's church at Constantinople is one of the most remarkable buildings in the world. In architectural features the structure has a 107-foot dome carried on four pillars, one at each corner, and composed of light pumice stone, with the apex 175 feet above the floor.

So extraordinary is the appearance of the church that the awe-stricken Sultan Mohammed is reported as having stopped at the door when the building was taken over by the Moslems and, seeing a soldier bowing at the floor "For the faith," exclaimed, "We have the whole city to pillage and enslave; leave ye me the buildings!"

The Mohammedans have never destroyed the treasures of art they found upon taking Constantinople, but have preserved whole-christens or cellars full of priceless manuscripts of Greek and Byzantine literature, and writings belonging to the early part of the Gospel age.

How Oysters Grow Shells.

Young oysters float on the surface of the water for a time, then sink and fasten themselves to the bottom. Thus attached, they extract lime from the water and deposit it as shell about their bodies.

Court of Lions.

The Court of Lions is the most famous court of the Alhambra, in Spain. It takes its name from 12 white marble lions from whose mouths streams of water flowed into a central alabaster basin.

FARM STOCK SHEEP SCABIES ERADICATED

More Than Ten Million Dippings Made by Employees of the Department of Agriculture.

In the work of eradicating sheep scabies from the United States employees of the United States department of agriculture made more than 22 million dippings and supervised more than ten million dippings during the last fiscal year. The work was conducted in cooperation with state officials. No cases of sheep scabies are now known to exist in Montana or North Dakota, in addition to numerous other states where the disease had previously been eradicated. In Idaho a spread of the disease was reported.

Dipping Sheep for Scabies.

fection during the previous year has been brought under control. Sheep scabies is a disease that has been prevalent chiefly in the western part of the United States.

KEEPING CATTLE AND SWINE

It Remains to Be Determined What Are Most Common and Best-Paying Propositions.

The keeping of cattle and of swine appear to be almost inseparable operations. This fact is being brought out in the returns of the "Better Stock—Better Stock" crusade of the agricultural colleges, the United States Department of agriculture and co-operating agencies. This general practice has long been known, but much more definite information is being gathered, and the purpose is to extend it to such an extent as to determine the relationships among all meat animals.

If nearly every man who keeps cattle also keeps hogs, and if nearly every man who keeps hogs also keeps cattle, the inevitable conclusion is that the combination pays, especially when purebred sires are used. But it remains to be determined what are the most common and the best-paying propositions. The same thing applies also to combinations of cattle and sheep, or swine and sheep, or cattle and sheep and swine. One benefit of the work will be that it will enable the man of small personal experience to avail himself of the wide experience of a great number of men in working out the combinations of meat animals that he will carry on his farm.

ECONOMICAL FEED FOR BEEF

As Silage Becomes Better Known Feeders Will Better Appreciate Its Feeding Value.

There is no doubt but that silage is an economical feed in the beef-cattle ration and as its value becomes better known feeders will better appreciate its merits. In spite of the fact that it is an unbalanced feed itself, it can be fed with one of the highly concentrated feeds, such as pig meal or, cottonseed meal, and makes a ration, which is surely hard to beat in fattening cattle.

CARE OF EWE IS IMPORTANT

Machine Through Which Lamb Will Obtain Qualities to Enable It to Top Market.

What is done for the lamb is not so important as the care and liberal feeding of the ewe. The ewe must be regarded as the machine through which the lamb will obtain the qualities that will enable it to top the markets.

LIVE STOCK NOTES

It is very essential that ewes should be properly fed.

A self-feeder can be used to excellent advantage for fattening hogs and pigs.

Better live stock aids the breeder both in direct returns and by giving a locality a favorable reputation.

In the cold months, many farmers fail to give the stock enough salt. Salt is a vital part of each animal's ration.

DUTCH COLONIAL TYPE OF HOME

Seven-Room House Adapted for the Average Family.

BEAUTIFUL AND INEXPENSIVE

Modern Adaptation of Old Architectural Type of Home is Exceptionally Popular With Home Builders.

By WILLIAM A. RADFORD. Mr. William A. Radford will answer questions and give advice FREE OF CHARGE on matters pertaining to the subject of building, for the readers of this paper. On arrival of his wife experience paper. On arrival of his wife experience paper. On arrival of his wife experience paper.

No type of home architecture is more popular with present-day home builders than the Dutch Colonial home. While the name, Dutch Colonial, suggests architecture of a couple of centuries ago, modern architects have taken the beauty of the old design and added to it the comforts and conveniences of the twentieth century. Exterior balance that denotes the colonial and the roof line of the Dutch architectural school, are about all that a left of the two types of homes from which the name is derived. But this sort of home is popular, and many hundreds of them are being erected in all parts of the country.

An example of the Dutch Colonial home is shown in the accompanying illustration.

Illustration. In this design the colonial balance is maintained both in the exterior and interior. It will be noted by comparing the exterior view and the floor plan, that the entrance is in the center of the building; that the windows on either side are duplicate, and that there is a similar open porch at either end. This same balance is carried out on the second floor. The gambrel roof, and the long sweep that the roof makes to the second floor sill are graceful. Taken all together this is a mighty handsome home from the exterior.

This house is of standard frame construction, with exterior walls of stone or other masonry or wood lath. The dimensions are 40 by 30 feet. The entrance also is unusual. The small porch with the fan-shaped window above it is found in the best colonial designs. Here, the porch is shown glassed in, but the glass frames often are removed, especially in the summer.

It is the interior, however, that interests the women members of the family most. How the rooms are arranged after their size are shown by the floor plan. The entrance leads to a central hall, out of which runs the stairs. To the right is a large living room, 15 feet wide and 20 feet long.

The house is of standard frame construction, with exterior walls of stone or other masonry or wood lath. The dimensions are 40 by 30 feet. The entrance also is unusual. The small porch with the fan-shaped window above it is found in the best colonial designs. Here, the porch is shown glassed in, but the glass frames often are removed, especially in the summer.

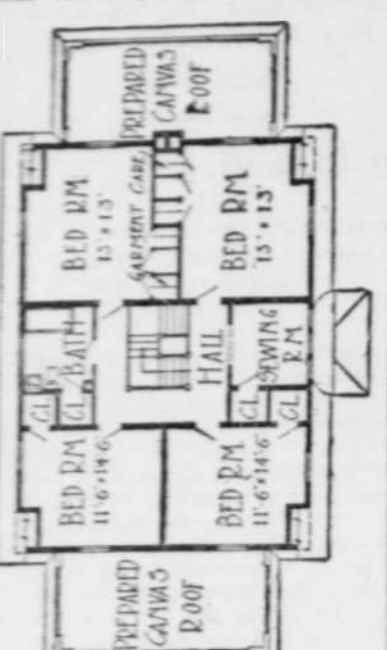

First Floor Plan.

In the center of the end wall is a large, open fireplace, with double French doors on either side, opening onto the porch. The latter is practically inclosed and built so that the openings may be screened in summer and glassed in winter, making an additional sitting room that is most pleasant.

To the left of the hall is the dining room, also a front room. The size is 15 by 18 feet, and with the triple windows at the front and the French doors hat open to the second porch is a beautiful room. Back of the dining room is a wood-sided kitchen, 9 by 10 feet 8 inches. Adjoining the kitchen, with double windows looking onto the porch is a breakfast nook, for informal family meals. At the other side of the kitchen is a good-sized pantry, and off the short hall that leads to the basement stairway is a lavatory.

The stairs lead to a double "L"-shaped hall on the second floor, the hall extending around the stairway.

Second Floor Plan.

On this floor are four good-sized bedrooms, well-ventilated and sunny. Two of the bedrooms are 15 by 18 feet, and the other two slightly smaller, 13 feet 6 inches by 14 feet 6 inches. At the head of the stairs at the front of the house is a large sewing room, and in the corresponding position at the back is the bathroom.

All of the bedrooms look out on the roofs of the porches, which the architect has specified to be covered with prepared canvas deck cloth, making the floors less noisy and more easily kept clean. Each of the bedrooms has a series of closets adjoining it. These closets are to be equipped with space-saving clothes-hangers, which save a great deal of closet space and keep the clothes in excellent condition.

The basement extends under the whole of the building proper. Here are located separate rooms for the heating plant, the fuel storage, cold storage of fruits and vegetables, and space for the storage of tools and other garden and lawn utensils.

One of the strongest attractions of this design is that it can be built at a comparatively low figure. The shape of the house lends itself to economical construction; the dimensions are not large considering the number and sizes of the rooms, and the materials are medium priced.

One of the first questions that home builders, or rather those expecting to build, ask nowadays when they look at a home design is: "What will it cost?" Building costs are not stable; they are more in one location than in another, depending on the labor situation, the distance from the source of material supply and other local conditions. It is an easy matter, however, to get a fair estimate of cost from the local architect, contractor and material dealer. All of these men are in touch with market prices of materials and labor, and can give a pretty accurate estimate, if they are convinced that the inquirer is in earnest.

In this connection it will be found that the Dutch Colonial type of home is one of the least expensive types of homes to build. Also the Dutch Colonial, in the writer's way of thinking, is one of the best, both from exterior appearance and interior arrangement. In other words, they give the home builder the very best in comfort, convenience and satisfaction.

Tomb of Saladin.

In the ancient Syrian city of Damascus lies one of the great figures of the middle ages—Saladin, the pagan cavalier and warrior. Damascus had been the capital of this Moslem chief. There he died and there many years later a fitting tomb was erected by his followers and orders were given that prayer for his soul be made continually as a signal mark of honor.

The Moslem leader's tomb lies in a quiet, short-in corner of Damascus, in the shadow of a great mosque. Within the little temple is the marble sarcophagus of Saladin and by his side another, said by some to contain the body of his son.

Precautionary.

Treaties are becoming exceedingly voluminous affairs.

"I think," commented Senator Sorghum, "the idea is to make them large enough to prevent the possibility of their ever being referred to as 'scraps of paper.'"

Thousands of Women

Owe Their Health To

Lydia E. Pinkham's Vegetable Compound—overshadowing indeed is the success of this great medicine. Compared with it, all other medicines for women's ills seem to be experiments.

Why is it so successful? Simply because of its sterling worth. For over forty years it has had no equal. Women for two generations have depended upon it with confidence.

Here Are Two Sample Letters:

Mother and Daughter Helped. Middleburg, Pa.—"I am glad to state that Lydia E. Pinkham's Vegetable Compound did me much good when I was 55 years old. I was run down with female trouble and was not able to do anything, could not walk for a year and could not work. I had treatment from a physician but did not gain. I read in the papers and books about Lydia E. Pinkham's Vegetable Compound and decided to try it. I continued taking it for some time. Last year I gave birth to a baby boy and had a much easier time as I took the Vegetable Compound for four months before baby came. On getting up had no pains like I had before, no dizziness, and in two weeks felt about as well as ever."—Mrs. THOMAS WILKINSON, 363 Columbia Street, Fall River, Mass.

Wise Is the Woman Who Insists Upon Having

Lydia E. Pinkham's Vegetable Compound

The Present Need. Max Eastman said at a Greenwich village tea: "A millionaire business man lectured me about my discontent the other day. He said there was never such a chance for bright men as now. He said there were any number of \$50,000 openings for bright men. 'Of course there are,' said I. 'You need the very brightest men to get to think up new reasons for boosting your prices still higher.'"

CrUEL Comment

"Mr. Johns says he would do me." "He can't. He hasn't got enough."

The Right Course.

"I am all up in the air about this letter." "Then why not forward it to flying mail?"

Sad Confession.

"The officer says you are a flying parallel." "I—I—" "Don't you know?" "I can't be sure." "What is your business?" "I am a professor of grammar."

Women with Backache

Angela, Wash.—"I was troubled for a long time, causing backache and those heavy bearing pains, and my blood was in bad condition. I had no appetite and was generally run-down. I used Dr. Pierce's Favorite Prescription in connection with his 'Pleasant Pellets' and was completely restored to health. I always recommend Dr. Pierce's medicines to all my friends."—A. Kansas, Gen. Del.

NERVOUS PROSTRATION

Angela, Cal.—"I suffered from nervous prostration for several years. Various remedies furnished by the doctor. At last I tried Dr. Pierce's Favorite Prescription, together with Dr. Pierce's Golden Medical Discovery, at the advice of a friend who had used it and been cured, and my recovery prompt and permanent. I cheerfully recommend Dr. Pierce's medicines."—F. PAULSEN, 232 So. Grand Ave.

CONSTIPATION AND BOWEL TROUBLE

Angela, Wash.—"I had constipation nearly bad, and had tried different but got little help. I remembered my grandmother always used Dr. Pierce's medicines and always vowed that was nothing like them, so I decided to try the 'Pleasant Pellets' for my bowels. I did so with wonderful results, never without them now."—Mrs. DEMARAT, 2902 Hewitt Ave.

Might Help

had many scraps in the house days," remarked the parliamentarian.

USES OF ASPIRIN

Company, who introduced Aspirin 18 years ago, give advice.

Aspirin created a sensation when introduced by Bayer over eighteen years ago. Physicians at once proved its efficiency in the relief of the genuine, world-famous Aspirin (Bayer Tablets of Aspirin) is taken by millions for Colds, Coughs, Rheumatism, Neuralgia, Toothache, Aching Joints, Headache, and Pain generally.

Aspirin is the trade mark of Bayer Manufacture of Monoacetic Salicylic Acid. Aspirin is the trade mark of Bayer Manufacture of Monoacetic Salicylic Acid.

game herds are increasing rapidly on the four United States big reservations.

T FADED FROCK WILL DYE LIKE NEW

mond Dyes" Freshen Up Old, Discarded Garments.

It's worth about perfect results. "Diamond Dyes" guaranteed to give a new, rich, fadeless color to any color, whether it be wool, silk, linen, or mixed goods—dresses, neckties, stockings, skirts, children's wear, everything! Reaction Book in package tells how to dye over any color. To buy any material, have dealer show "Diamond Dye" Color Card.—Adv.
