LIVE STOCK

LESS FARM ANIMALS IN 1919

Interesting to Note That Mules and Milch Cows Show Slight Increase in Numbers.
A slight increase in the number of milch cows and mules and a moderate decrease in the number of other cattle (calves, steers, bulls, and cows not for milk), horses, sheep, and swine are the outstanding features of a survey of live stock on farms and ranges of the United States on January 1, as compared with a year ago, made by the bureau of crop estimates, United States department of agriculture.
Milch cows have increased about 272,000 head, or 1.2 per cent; mules increased 41,000 head or 0.8 per cent; "other" cattle (as designated above) decreased 700,000 head, or 1.6 per cent; horses decreased 373,000 head, or 1.7 per cent; sheep decreased 251,000 head, or 0.5 per cent; and swine decreased 1,675,000 head, or 2.2 per cent.

The estimated number of animals on farms and ranges January 1 are 21,100,000 horses, 4,905,000 mules, 23,747,000 milch cows, 44,885,000 other cattle, 48,615,000 sheep, and 72,300,000 hogs. The total of all animals is 215,700,000, which is 2,086,000 head, or 1.2 per cent, less than a year ago.
The total value of all farm animals on January 1 was about \$8,561,000,000, which is a shrinkage of \$208,000,000, or 3 per cent, compared with a year ago. It is an interesting observation that mules and milch cows which in-

creased in numbers also increased in value per head; whereas all other classes of animals decreased in value per head, as well as in total numbers.

RULES FOR LIVE STOCK MEN

Satisfied Purchaser Is Best Advertisement and Breeder Should Live Up to Guarantees.

Here are ten good rules for live stock breeders, vouched for by the animal husbandry men at the New York State College of Agriculture at Ithaca:

Be honest.
Choose a breed, and stick to it.
Breed with the correct type in mind.
Study pedigree for inherited characteristics, relative merit and value.
Keep your herd or flock free from disease.
Develop the young animals and maintain the breeding animals through wise feeding and management.
Boost better live stock in your community.
Advertise judiciously.
Exhibit at the county, state and other live stock shows.
Remember that a satisfied purchaser is your best advertisement. So be prompt in registering and transferring animals, and make good all guarantees.

BUSINESS OF FEEDING STOCK

Frequent Shifts and Changes Require One Should Be Alive to Keep Up With Progression.

The business of feeding livestock is a shifting, changing, sort of thing which requires that one should be alive if he is going to keep up with the progression. If you wish to make the most profit you must use economy in production and in feeding. If you do this, and profit to the greatest extent from the experience of your neighbors and from the experiment stations, your chances of success are good.

CARING FOR PREGNANT SOWS

Animal Should Not Be Fed So Heavily That She Is Too Fat to Take Sufficient Exercise.

Pregnant sows should not be fed so heavily that they become too fat or refuse to take sufficient exercise. The amount fed is as important as the kind of food supplied. A mature sow should gain as much during the breeding and gestation periods as she normally loses during the farrowing and suckling periods. On the average this will be from 65 to 85 pounds.

If You Need a Medicine You Should Have the Best

Have you ever stopped to reason why it is that so many products that are extensively advertised, all at once drop out of sight and are soon forgotten? The reason is plain—the article did not fulfill the promise of the manufacturer. This applies more particularly to a medicine. A medicinal preparation that has real curative value almost sells itself, as like an endless chain system the remedy is recommended by those who have been benefited, to those who are in need of it.
A prominent druggist says: "Take for example Dr. Kilmer's Swamp-Root, a preparation I have sold for many years and never hesitate to recommend, for in almost every case it shows excellent results, as many of my customers testify. No other kidney remedy has so large a sale."
According to sworn statements and verified testimony of thousands who have used the preparation, the success of Dr. Kilmer's Swamp-Root is due to the fact, so many people claim, that it fulfills almost every wish in overcoming kidney, liver and bladder ailments; corrects urinary troubles and neutralizes the uric acid which causes rheumatism.
You may receive a sample bottle of Swamp-Root by Parcel Post. Address Dr. Kilmer & Co., Binghamton, N. Y., and enclose ten cents; also mention this paper. Large and medium size bottles for sale at all drug stores.—Adv.

Catarhal Deafness Cannot Be Cured by local applications as they cannot reach the diseased portion of the ear. There is only one way to cure Catarhal Deafness, and that is by a constitutional remedy. HALL'S CATARRH MEDICINE acts through the Blood on the Mucous Surfaces of the System. Catarhal Deafness is caused by an inflamed condition of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result. Unless the inflammation can be reduced and this tube restored to its normal condition, hearing will be destroyed forever. Many cases of Deafness are caused by Catarrh, which is an inflamed condition of the Mucous Surfaces. ONE HUNDRED DOLLARS for any case of Catarrh that cannot be cured. HALL'S CATARRH MEDICINE. F. J. DADDY'S EVENING FAIRY TALE

MOTHER TOAD.

"There are some creatures," said Mother Toad, "who are most peculiar, but in spite of that fact I like them."
"What is peculiar about them and who do you mean?" asked Mrs. Teddy Toad.
"Well, people are funny," said Mother Toad. "Mothers only have a mere handful of children about them, a mere handful."
"I've never seen them carrying their children upon their hands," said Mrs. Toad. "Sometimes I've seen them carrying one baby in the arms, or one child upon the shoulders, but a lot of children in the hand—never."
"How then do you say that they have a handful of children?"
"I mean," said Mother Toad, "that they don't have thousands of children like I do. I didn't mean they carried their children around in their hands, but that they don't have enough to count so that they would amount to a good number."

"I, you see, have thousands, and so do you."
"But even though I am so different from people I like them. They're strange and tall and they walk instead of hop and they eat roast beef and ice cream instead of slugs and worms and little insects, but still I like them."
"So do I," said Mrs. Teddy Toad.
"You see," said Mother Toad, "I think creatures are absurd who only like those who do just the same and think just the same as they do themselves."
"That's where I am different and I love folks lots better and have lots better a time because of that. Just suppose I said, 'No, I don't like her; she wears dresses, whereas I, the toad, do not.' Now, wouldn't that be absurd?"
"Toads help people because they like them. They do a lot of good work in the gardens, just quantities of good work, and upon the farms, too."

"But I haven't much use for folks who're always disliking everyone who doesn't think the same and dress the same and eat the same as they do."
"They miss so much joy out of life, and, besides, people who want everyone else to agree with them are so conceited. They have the manner as though they knew it all and were the only ones who were right."
"But I was saying how different people are from toads. I presume they think they're pretty different, too," she laughed.
"I guess they do," said Mrs. Teddy Toad.
"Oh, well, no matter; they think the truth," said Mother Toad.
"Now I lay eleven thousand eggs as a rule in a pool. Sometimes they change right into toads in a few hours. We don't wait for months like the frogs in order to become something."

"Just think of being the mother of eleven thousand children all at once. That is something to be proud of. And everyone of the eleven thousand children helps on farms and in gardens."
"Did you ever hear of Mother Kangaroo, by the way? I heard of her the other day when some children were talking. It seems she has a little sack under the front of her, where she keeps her children for protection when danger is near—sort of swallows them, you know."
"Now, that is an interesting thing if it is true, and I fancy it must be, for I've heard it from so many different people, though I will admit I've never seen it happen myself."
"Of course, I suppose it is because I'm not around where kangaroos are. But, oh dear, oh dear, how I love to think of eleven thousand little toads! It must be awful to think of only a half dozen children. But, I suppose, their mothers feel that it would be horrible to think of eleven thousand children to wash and to put to bed, or to send to bed when they got older and could go by themselves. And they need several schools for one family."

And they need several schools for one family."

"So I suppose it is all right that they have their own ways, but I'm glad I'm a mother toad, and have a mother toad's ways!"

The Reason Why.
My sister, aged five, had come to the table with very dirty hands, and mother said to her: "Mabel, go and wash your hands immediately. Did you ever see me come to the table with hands like that?" "No, mother, of course not," answered Mabel, "but I didn't know you when you were five years old."—Illustrated News.

Welcome Relief From the Tortures of Rheumatism

Can Come Only From the Proper Treatment.

Many forms of rheumatism are caused by millions of tiny germs that infect the blood, and until the blood is absolutely freed of these germs, there is no real relief in sight.
The most satisfactory remedy for rheumatism is S. S. S. be-

cause it is one of the most thorough blood purifiers known to medical science. This fine old remedy cleanses the blood of impurities, and acts as an antidote to the germ of rheumatism.

S. S. S. is sold by druggists everywhere. For valuable literature and advice address Chief Medical Adviser, 107 Swift Laboratory, Atlanta, Ga.

Songs Up to Date.
Bishop Theodore S. Henderson, general superintendent of the Methodist Episcopal church in the Detroit area, who has become associated with the Interchurch world movement, said at a recent conference that ten years ago one of the favorite hymns was "When the Roll Is Called Up Yonder I'll Be There." Now that hymn has been displaced by "The Son of God Goes Forth to War." "In other words," said the bishop, "the young people of the present day are singing songs of service. Many of them who are still singing the old song should change it to express the idea that 'When the job of saving the world is on, I'll be there.'"

Burying and Burying.
It was in the blueberry season, and she was showing him around the small town.
"That," she said, as they drove along, "is the burying ground," pointing to the cemetery.
"I noticed a number of people with pails, going that way," he remarked absent-mindedly.
"Perhaps you thought they kicked the bucket," she said flippantly, as she skidded round the corner into the road leading to the State hospital.

The mightiness of the pen is due to the ink.

Some men's ideas of reciprocity are rather one-sided.

Really "Bored to Death."
The expression, "bored to death," is no mere fanciful figure. A person may actually die from boredom. The Medical Press, in commenting upon this subject, refers to a statement by Dr. W. H. H. Rivers, that "interest in life is the primary factor in the welfare of the people." Doctor Rivers contends that the dying out of native races is due not so much to what the white man has introduced in the shape of new diseases and new modes of clothing, housing and feeding, as to the fact that by uprooting native institutions, without providing adequate substitutes, he has "deprived them of nearly all that gave interest to their lives."

She Had It Buried.
In illustration of the extent to which gold and silver are being hoarded in China, the far eastern division of the bureau of foreign and domestic commerce gives currency to an incident reported of an old woman paying for her purchase of a cotton mill with \$500,000 worth of gold bars, which she had dug out of its hiding place. It is estimated that, due to the disturbed political conditions and lack of adequate banking facilities throughout China, at least a billion dollars' worth of silver is similarly hoarded, which may partially account for the present exchange situation.
