

LABOR EXCHANGE

The following will co-operate with the Farm Bureau in maintaining a free labor exchange for the county. Persons who want work or persons who wish to employ help, should apply there, or register in advance. The Farm Bureau office will serve as a clearing house to keep the different communities in touch, so that a surplus of men in one community can be moved to a point where there is need for them. Make use of this service and get others to make use of it, and the labor problem will not be near so serious, and the men will be helped to keep employed.

Ontario, Toggery Hill.
Vale, J. A. Smith, Pool Hall.
Nyssa, Dolan Pool Hall, Pastime.
Adrain, Holley Bros. Store.
Brogan, J. F. Reed, Pool Hall.

Last publication, July 6th, 1920.

A Portable Granary

Saves Time and Money

The economy of this granary is easily understood when we realize it can be drawn to any point on the farm. When the threshers are in action in the field this granary will save time, and the use of high priced sacks. It is an inexpensive, convenient and efficient way of handling grain during the harvest season.

EASY TO BUILD

We will furnish free of charge complete drawings and specifications for the kind and amount of lumber to be used in the construction of this portable granary. It can be built in any size best adapted to your purpose. The work of constructing is simple—requiring only a short time and little skill.

CAREFULLY PLANNED

Our knowledge of your needs, combined with our experience in all phases of building, has enabled us to design a portable granary that will give long and satisfactory service.

Notice the heavy skids that are built as a part of the entire structure. The interlocking corners provide smooth inside walls and with great strength. No bulging or falling apart in this granary—consequently no loss. Convenient upper and lower doors. Easily filled, easily emptied, easily ventilated.

Make better use of your harvest help by having this modern granary

Come in and talk it over.

ELECTRIC RANGES

Make Cooking A Delight

Have you ever cooked a meal on a modern electric stove? It's truly a pleasure. The radiated heat will hardly raise the temperature of your kitchen a single degree. And this clean, cool way of cooking, means freedom from the nuisance of matches, ashes and all the disagreeable features of ordinary stoves.

The ovens have double walls that are separated by efficient heat insulating material. This means the conservation of heat, baking temperature reached quickly and freedom from the sickening atmosphere of the average kitchen.

There are many more important features about electric stoves that we would like to tell you when you call, and we have accurate figures on the economy of electric cooking.
