## Where is Relief From Blazing Skin Diseases?

### Must I Endure Forever the Torturous Itching?

The skin is fed from the blood, and upon the condition of the blood depends whether or not your skin will be healthy and free from boils, pimples, scaly irritations, red eruptions and other disfiguring and unsightly disorders. The sensible treatment that will show real results is a remedy that

will cleanse the blood thoroughly and kill the germs that cause the trouble. And for this purpose no remedy ever made can approach the record of S. S. S. which cleanses the blood of the disease germs, at the same time building up the general health.

### Hard to Believe.

A workman in a factory on the West side received a bad cut on the face. Before they could get him to the doctor's office he fainted. The first thing the doctor did was to pour a large drink of bottled-in-bond down him. The doctor then dressed his wound and the man went his way. But in about a half hour the man was back at the office with his wife, and as he came in he said:

"She won't believe me."

"Won't believe what?" exclaimed the doctor.

With that the wife cried out: "I've lived with this man too long not to know when he's drunk and been fighting!"—Indianapolis News.

## West Is Magnet For Immigrants

Majority of Ellis Island Arrivals Drawn to Industrial Centers by Higher Wages.

### IRISH GO TO NORTHWEST

Women and Children Predominate—Work Increased by New Laws Governing Aliens—Europe Loath to Let Them Go.

New York.—The stream of immigration flowing through Ellis island has been noticeably deflected from New York city to inland centers during the last twelve months, and officials give this as one explanation for the fact that the city's 1920 census was only 5,621,121 instead of the 6,100,000 expected.

Official statistics regarding the destination of arriving aliens are sent to Washington to be tabulated and digested. For this reason destination figures for the last twelve months were not available. One who most closely watches alien arrivals is J. F. Rowe, official money changer. He is quick to notice any unusual movement in the flow of immigration.

To the Manufacturing Centers. Mr. Rowe asserted that money exchanged for immigrants whose destination is New York city does not amount to 1 per cent of the amount exchanged for those giving other parts as their destination.

"In former years," said Mr. Rowe, "immigrants poured into New York city by the hundreds of thousands. They are now going to manufacturing centers such as Pittsburgh, Detroit and Akron, Ohio, or to the coal and iron mining regions.

"For the most part those arriving here now were in America before the war, and are acquainted with the country and attracted to sections where the best wages are paid. Before the war a majority of the arrivals had only hazy ideas as to where they were going or what wages they were to receive.

"Another interesting fact is the change of location of some of the races. Not so many years ago most of the Irish arrivals flowed into Massachusetts or scattered along the North Atlantic seaboard. Now they are going into Oregon. It is noticeable, too, that more aliens are going to California than ever before."

In January 24,000 aliens arrived here; February, 22,000; March, 20,000; April, 36,000; May, 40,000, and in June up to and including the 19th, 31,000. Superintendent Baker of Ellis island said this immigration was made up mostly of women, children and returning residents. These latter are mostly Italians, and the figures for this month will show that most of those who left America to fight for Italy have returned.

The fact that no great number of male aliens is arriving here does not

mean a lack of desire to come to America, the immigration officials say. Rather, it means that European governments are not willing to further deplete the male adult population by allowing it to emigrate. The intending emigrant is finding it difficult to get passports under the new immigration laws. Also ship accommodations are harder to obtain.

Before the war from four to five thousand aliens arrived at this port each day, or about 150,000 a month. Notwithstanding the falling off in arrivals, however, Superintendent Baker said the work probably increased. This is because of the changes in the law. Not only do arriving aliens have to pass examinations as to moral and physical fitness, but they must pass a literacy test and be armed with passports issued by the American consular agent nearest their home and endorsed by the American authority at the port of embarkation.

Under amendments to the law certain persons are now exempt from the literacy test and all of these must be detained to prove that they are entitled to exemption. Again, many women and children are coming to relatives here, and these must be detained until such relationship is proved.

### SPECIAL SEATS FOR WOMEN

Only the Very Old Men Rash Enough to Sit Down in the Same Car Seat With a Turkish Woman—Leaders Educated.

Constantinople.—Turkish women are no longer the shy, veiled creatures who passed their time in the seclusion of the harem and were never seen by foreign men. They still cling to the veil. But the streets in Constantinople and other larger Turkish cities are filled with women who have their veils thrown back from their faces. They are highly ornamental and becoming. Most Turkish women don't want to abandon them in favor of hats. But there are many sorts of veils and the smart, black silk veils which some of the women wear are very fetching when draped artistically over their hair.

Car Seats for Women. In the railway and street cars there are special seats for women, but the stony cushions which are supposed to screen them from the gaze of men are usually drawn back and it is not uncommon to see men standing in the

### Mother Found Two Children Playing With Blacksnake

Missing her two children, Mrs. George Mead of Susquehanna, Pa., located them in a field nearby. Her four-year-old son was astride a blacksnake more than three feet in length, and his sister, Gladys, three years old, was striking the snake on the head with a stick.

The youngsters were laughing, and the woman said the snake seemed to be contented. The reptile glided away at sight of the mother.

### MADE TOMBSTONE OF ROCK

Probably New Yorker Will Investigate Before He Carves His Name on Another Boulder.

It was quite a while before a prominent lawyer in New York related to his friends a personal experience which he had one summer when, being somewhat run down in health, he went into the Adirondacks to rest.

One day, as he was wandering aimlessly through the woods, he came upon a huge boulder not far from the railroad that runs along the shore of a lake. Listlessly he began to carve his name on the rock, but gradually warmed to the task and chiseled zealously away until he had wrought both name and date with various embellishing flourishes.

As he was proudly surveying the result of his labor, an elderly backwoodsman appeared on the scene. After the customary greeting, he dexterously shifted his pack to the ground, then with a somewhat quizzical air surveyed the lawyer's work.

"Quite a bit of art you've got there," he observed gravely.

The lawyer accepted this tribute complacently.

"Kind of curious how things come about," he went on. "Now, the first time a train was run into these here woods it came in contact with a tramp, long about here; and that there boulder marks the spot where we buried him. Now, here he is provided with a first-class tombstone and an inscription that anybody might be proud of. Kinder curious, ain't it?"

### MOST POPULAR GIVEN NAME

"John," or Its Derivative, Common in All Languages—Explaining Size of Jones Family.

John is the most common given, or Christian, name we have. Its history is curious. It came originally from the Hebrew Jehohanan, "God is gracious." The Greeks made it Iohannan, and in the feminine it became Anna and Hannah. The name was unknown in Saxony, England and was seldom used among the Normans. In the Doomsday book, the record of the inhabitants of England which William the Conqueror had compiled, only two Johns are listed, and one of them is a Dane. The German form is Hans, and sometimes Johan. From these we have the surnames Hansson and Johanson. The diminutive is found in Hanks, Hankin, Hankinson, Jankin, Jenkins, Jenison and Jennings. Shane is the Irish form of John and Jean the French. Considering the popularity of the name John and the fact that at this time it was spelled "J-o-n" and pronounced "Jones," the size of the Jones family will be explained. The name means "son of John." John Jones is found in almost every community.

### New Thread Has Fine Qualities.

A sea grass that grows abundantly about the shores of Japan has been found to yield fiber which, properly mixed with cotton, forms a thread much cheaper and stronger than one of all cotton. The process of removing the rind of the weed, which has been patented by its Japanese inventor, is to dry the plant, boil it in lye for two hours and cool slowly. Washing it in water then separates most of the coverings, and the rest comes off when it is soaked in water containing rice bran and brought to the boiling point. The resulting fiber, after rinsing, resembles cotton, and is ready for use. The grass is harvested in the fall and the fiber can be prepared by fishermen. It is expected to have a marked effect on the price of cheap clothing, and to improve the durability of fishing nets.

### Atmosphere Above Earth's Surface.

The atmosphere is believed to extend much more than 100 miles above the earth's surface. Its density decreases rapidly for the first few miles of ascent, then much more gradually. From the phenomena of twilight, due to refraction of light, it may be demonstrated that the air extends up to a height of 45 miles; but other phenomena, such as the behavior of meteors and the aurora, show that rare air exists at a much greater height.
