## Poultry, Drainage and Marketing

### MONTHLY REPORT OF THE COUNTY AGRICULTURAL AGENT FOR THE PERIOD SEPT. 5 TO OCT. 1

The major projects for the periods of this report; were in poultry, drainage and marketing. Some time was devoted to farm records, crop improvement, fairs, and in conference with official visitors.

**POULTRY.** The first meetings of a series of demonstrations in poultry keeping were given during the month. The instructional work at these meetings was conducted by Herbert Casby, Extension specialist in poultry husbandry and consisted of a lecture on the principles of selection of high laying hens, followed by a demonstration of culling into three classes: culls, medium or commercial layers, and high layers or breeders. Three such meetings were held, one each at Adrian, Cairo and Oregon Slope.

Plans were made with Mr. Casby for the establishment of a poultry demonstration farm and the holding of regular demonstration meetings on timely topics for the benefit of the poultry industry. Arrangements were also made to extend the benefits of the culling demonstrations to the Vale and Brozan-Jameson sections with the assistance of Graham Park and arrangements made for meetings at those points in October.

**DRAINAGE.** One drainage demonstration meeting was held at Vale for the purpose of inspecting the drainage and alfalfa removal experiments in progress on the tract established there earlier in the year, under direction of the Oregon Experiment Station, and to witness a demonstration of the sluicing method of drainage canal construction worked out by W. W. Johnston and Percy Pervus in connection with this work during the summer. The meeting was attended by 29 persons representing seven or eight contemplated drainage projects. Following Director Jardine of the Oregon Experiment Station, and other members of the party.

The agent made preliminary arrangements toward the close of the period covered by this report, for the organization of four drainage projects.

**MARKETING.** Work in this department consisted of a continuation of effort toward the organization of the Oregon Cooperative Wheat Growers Association and the Pacific Poultry Producers Association, in the county along lines reported heretofore. Assistance was given to the wheat growers association in planning its membership campaign. The organizer succeeded in signing up approximately fifty per cent of the principal growers during the month.

Assistance was given in making preliminary arrangements for a membership drive early in October for the poultry association, the drive to be made by teams consisting of one Malheur county business man with his automobile, one Caldwell business man as solicitor, and one or more local poultrymen as guides and assistants. This plan was suggested as a result of meetings between Caldwell, Ida., business men and business men of Ontario and Nyssa.

Other marketing work of a preliminary nature was done, principally of an investigational nature in connection with the Oregon Wool and Mohair Growers Cooperative Association.

**OTHER PROJECT WORK.** A farm record survey of wheat yields to obtain first hand information direct from the farms about the Spring wheat yields with relation to varieties, time of heading, rate of heading and number of irrigations, was undertaken. Scientific data had been secured at the end of the month, to make it apparent that some very valuable information would be available as a result when the survey is completed. This work will be reported later in more detail.

Some time was spent in locating seed potatoes, for next year's crop, particular emphasis being placed on the purchase of some extra good certified seed for planting seed plots. Some time was also devoted to fair work in connection with the Oregon Slope Community fair, the Malheur County fair, N. W. Grain and Hay Show and in helping the club leader instruct corn club members in the selection of exhibits. The farm bureau news was edited and the usual reports prepared. Assistant county agent leader, F. L. Ballard, was in conference with the agent during the month, as was also Director Jardine of the Oregon Experiment Station and Director Paul V. Marks of the Extension Service.

**MISCELLANEOUS.** During the period covered by this report, approximately 70 persons called at the office on business; the agent made 9 visits at farms and 14 visits at demonstrations; 6 project meetings with a total attendance of 188 were

held and 2 other meetings attended; three articles were prepared for the local press; 15 for the Farm Bureau News; 114 personal business letters and 14 circular letters of 879 copies were written; 11 days were spent in the field, 10 in the office, and three on vacation.

### SUMMONS FOR PUBLICATION IN THE CIRCUIT COURT OF THE STATE OF OREGON FOR MALHEUR COUNTY

WALLACE BURNS, Plaintiff,  
vs  
EVA BURNS, Defendant.

To Eva Burns, the above named defendant:

IN THE NAME OF THE STATE OF OREGON, You are hereby commanded to appear in the above entitled Court and cause within six weeks after the first publication of this summons, which date of first publication is October 7th, 1921, then and there to answer or otherwise plead to the complaint filed herein. And if you fail so to do, for want thereof, plaintiff will apply to the Court for the relief demanded in said complaint, to-wit: For a decree of this Court dissolving the bonds of matrimony heretofore and now existing between plaintiff and defendant, and for such other and further relief as to the Court may seem just and equitable.

Service of this summons is made upon you by publication thereof in the Gate City Journal, a weekly newspaper published at Nyssa, Malheur County Oregon, for six successive weeks commencing with the 7th day of October, 1921, by order of the Honorable Dalton Biggs, Judge of said Court, made and entered herein on the 19th day of September, 1921.

# Fordson TRACTOR

\$625  
F. O. B. Detroit

"Yes I've more Time for Myself Since I Got a Fordson"

The Fordson Tractor is taking much of the drudgery out of farm life; it is solving the labor problem; it is reducing the cost of preparing land by almost one half of what it was with horses; and it is saving one third to one half of the farmer's time and making farm life more attractive.

The Fordson will run your threshing machine—and at the most opportune time for you. It will operate the milking machines, saw your wood, fill your silo, pump the water, and take care of every kind of light work—And don't forget—it will plow six to eight acres in a ten hour day, handling two plows with ease.

Thus the Fordson is the ideal year-round tractor. It will pay for its fall and winter keep in many ways.

There's a big story to tell you about the Fordson—and a true one—come in and get the facts. Or, if you prefer, telephone or drop us a card and we will bring them to you.
