Caravan Coming to Investigate the Alfalfa Weevil Here

The Canyon County Farm Bureau is arranging a tour into Malheur county to be held on June 2 to investigate the alfalfa weevil. This pest has not yet become general over Canyon county like it has in Malheur, Payette and Washington counties, but is gaining a foothold quite rapidly. The farmers up that way at least are beginning to worry about it and want to know just what it means to have a real infestation weevil in their fields. Also they are looking for the best way to control the pest.

The Canyon county caravan will come by the way of Nyssa, leaving high school building at 10 a. m., stopping at points along the road to examine fields. They will go as far north as Ontario at which point dinner will be taken in the park near the depot. County agricultural agent Brothaupt is assisting in arranging a short program which will come immediately after the lunch hour and will cover such points as the life history of the weevil, the rapidity of its increase and extent of damage and various control measures which are recommended. The field entomologist of Idaho is expected to be present and several persons who have had practical experience in fighting alfalfa weevil have been invited to give their views on spraying and other measures.

At 3 p. m. a spraying demonstration will be given at the Hofer Utley farm just east of town. This demonstration will be put on by Don Whelan of the Idaho extension service, who is in charge of alfalfa weevil work in that state. The machine will be a two-horse tractor type sprayer such is now recommended and sold by the Iron Age Company for use on alfalfa, potatoes and other field crops. It covers a wide strip, using liquid spray made of two pounds of calcium arsenate to 100 gallons of water.

The farmers of Malheur county are welcome to attend this meeting and demonstration. Also residents of the towns who may wish to do so. Parties may bring basket lunch with them and eat in the park if desired. The program will start about 1 p. m. and the spraying demonstration as noted at 3 p. m.

Turning Back the Leaves of History

ON May 20 we turn back the pages of history to 1861-65 and honor those who, as young men and boys, wrote large their names in American annals.

History's latest chapter gives to all of us a broader conception of what War is and enables us to understand more fully the deeper meaning of Memorial Day.

On that day this institution will remain closed in honor of our Soldier Dead

Nyssa Takes Another One From Vale

The baseball boys rematched themselves in the game Sunday, winning from Vale by a score of 11 to 9. This puts Nyssa at the head of the list, having lost one out of four games Ontario and Huntington are tied, having each won two and lost two.

The game Sunday was marred by an unfortunate accident by which a member of the Vale team suffered a fractured leg while sliding to the home plate. Woodruff of the home team was struck on the wrist by a hot one, while at the bat and was incapacitated for further action in the pitcher's box. Dewey Hoxie was substituted and acquitted himself with honor.

Nyssa will play Ontario at Ontario next Sunday.

Fire at Pastime Pool Hall

Fire broke out in the Pastime pool hall Monday night at 12:30 and did considerable damage to stock and fixtures before it was extinguished.

Mr. Takahara who sleeps in the back end of an adjoining room discovered the blaze and gave the alarm, which quickly brought the fire company to the scene and after some fast work the boys got the fire under control. The pool hall was conducted by Felton Duncan who carried some insurance on the stock and fixtures. The building is owned by Sharp Brothers and will require considerable repair work before it is ready for occupancy again.

Sheriff Lee Noe Makes Successful Raid

The people of Nyssa were treated to a genuine thrill last Friday evening when Sheriff Lee Noe and a deputy sheriff rode into town with a prisoner and an auto load of apparatus captured in a raid on a liquor manufacturing plant in the Big Bend country. The officers parked their auto in front of the Silver Grill while they and the prisoner were at supper. The auto was quickly surrounded by an admiring populace composed of men, women and children, who examined the captured paraphernalia, which consisted of two complete 10 gallon distilling outfits, with kettles, copper wire 'n everything, with much interest. Female curiosity was aroused to a high pitch and innumerable were the questions asked by the fair spectators. The consensus of opinion, however, was that the apparatus was too dirty and they wouldn't drink the nasty stuff made by it, while the male portion of the audience cast longing glances at it and surreptitiously searched for any samples that might be lurking around in the vicinity.

The prisoner's name was Gabino Ocanica, who was taken to Vale, where he pleaded guilty and was sentenced to 30 days in jail and to pay a fine of \$850.

When the man's house was entered two still of 10 gallon capacity each were found, together with 22 gallons of moonshine, 100 gallons of fig mash, 700 pounds of figs and 900 pounds of sugar.

Rev. C. E. Wharton, writing to the Journal from Glasgow, Montana, says:

"We are very nicely settled in this city and are being well received and well cared for. While I am not a pastor of any regular work, not a Sunday passes but that I preach at least once in one or other of the several churches of the city. Have preached twice for the Holiness people, twice for our own Methodist church and am to preach for them next Sunday.

"We are well, and since we have received our goods are beginning to feel at home.

"We are hoping that by this time a pastor has been appointed for our Methodist church that the good work begun by Bro. Kendall's assistance will not be lost.

"Weather here is fine. More rainfall has been experienced already this spring than in the total period of five years past. Farmers are as busy as bees getting in crops and all are happy in the fine prospect of excellent crops."

Dairy Cattle Need Grain.

High producing dairy cattle need grain even when on good pasture. Barley or corn mixed with equal parts of oats or mill run makes a good mixture. If cows on pasture less weight it is a sign that grain is needed. Ordinarily one pound of grain to six to eight lbs. of milk is required, but when pasture is short more is needed.—O. A. G.
