Why Be Deprived of the Joy of Electric Cooking?

The Electric Range is one of the modern time and labor saving devices that turn the task of keeping house into a pleasure. It is as essential in the home as the adding machine or typewriter are in the busy office. It means greater efficiency, better food and a great saving of time.

Electric Cooking Is More Economical

The cost of electric fuel is low and there is never a shortage of it. Another material saving is realized, too, in the saving of food--there is so much less shrinkage of meats that are cooked electrically.

But, perhaps the thing that every woman appreciates most of all is the coolness and cleanliness of the Electric Range. Even on the hottest day your kitchen will be as cool as any other room in the house.
