The second recommended method of taxation is upon tangible property only and that the rate be made as low as possible. The question of whether tangible property be removed entirely from the tax roll is left to the circumstances in the state.

The third source of tax revenue commended in the report is from profit in the state and several recommendations are made replacing the business tax known as license which is collected in many states.

The association believes, the re-continues, if these three meth-odations are justly carried out, a state that the tax burden be heavy upon any one property, as it now is upon realty, and that sufficient will be collected for all governmental demands.

HONEY AS FOOD

Do you know anything about the wonder of honey and how important and large the honey business has grown to be?

Very few people realize on what a large scale honey is produced today, and that the production of this "safer sweet" has become an important industry. This is true not only of the United States but also of Canada and of practically every other civilized country.

In the instance, along with other countries, a few persons in Canada have been producing honey during the winter months.

One of the few persons in Canada who has been producing honey during the winter months is a man named J. H. Smith, of Osgood, Ontario.

Mr. Smith has been producing honey during the winter months for several years, and his honey is of the highest quality.

Mr. Smith's honey is produced in a special way, and it is of the highest quality.

Mr. Smith's honey is produced in a special way, and it is of the highest quality.

Mr. Smith's honey is produced in a special way, and it is of the highest quality.

Mr. Smith's honey is produced in a special way, and it is of the highest quality.

Mr. Smith's honey is produced in a special way, and it is of the highest quality.

Mr. Smith's honey is produced in a special way, and it is of the highest quality.

another both exported and imported by the ton. There are between 800,000 and 1,000,000 people in the United States alone who keep bees. The average annual value of honey produced in this country is \$90,000,000, while wax, as a by-product, brings about \$3,000,000. There are men who support their families, educate their children, own their homes, take trips, and lay something aside for their old age, from the honey they produce.

There are localities that measure their crops, not by the pound, but by the ton or even by the carlot.

Did you ever stop to think

By E. R. Waite.

That the cities that know what they are doing and where they are going generally get somewhere.

That many cities need team thinking and team working.

That it is time some cities removed their smoke screens and let the world know where they are and where they stand.

That a man should not pretend to be one thing and be another.

That quality merchandise is sold in the stores of your city, and advertised in your papers. Read the ads.

That your city is the natural shopping center for your section. It has all the public conveniences of a live city.

That a clean city is always a very healthy city. Keep your city clean.

That your city should set the pace for all cities in your section. Be first in everything.

That every citizen should wear the smile of optimism, show commercial courage and faith, and keep everlastingly boosting your city.

That if you do all this, you will have personal success, civic success and your city will grow and develop.

Haggling Habits.

This story is told of a tightwad who was prevailed upon one Sunday morning by his wife to go to church. Not only was he very busy reading the program of the services when the collection basket was passed, but when the minister announced that the congregation would all join in singing three stanzas of Old Hundred the man from his seat and from force of habit raised the minister if he wouldn't make the Ninety and Now. This article was first published in the Columbus Dispatch.

Pictures of Moon.

CLUB NEWS NOTES

ITEMS OF INTEREST ABOUT THE BOYS AND GIRLS.

Drafts Cause Disease

Watch the ventilator and sky light in the poultry house and keep them closed to avoid drafts which result in roup, leg weakness, and colds. If the birds are affected with colds, tincture of iodine injection into the nostrils by means of a medicine oil can, after squeezing out the mucus, will prevent the cold from developing into canker or roup.

Feed Mash for Layers

See that the pullets consume as much mash as possible as this will make them lay. The tendency is to eat too much scratch feed which causes them to stop laying. They should have all the green feed they will take, plenty of fresh buttermilk and as much mash as scratch grain.

Sodium Flouride Kills Lice.

Dust the pullets with sodium flouride if troubled with lice. This is best done at night as less disturbance is caused among the birds.

Garden Tract Needs Shift.

It is well to pick out a new spot for the home vegetable garden at this time of the year since one of the best ways to prevent the increase of vegetable diseases from year to year is to rotate the soil in order that parasites that get established with one crop may have a chance to die out before the crop is again grown on the same land. This often takes several years. Potato ground especially should be rotated on account of wilt and rhizoctonia.

Roof Hen House Now.

Now is the time to fix the roof of the poultry house if it has not already been done.

Hens Peck Pen Mates

Birds just off the range and confined in small quarters, as they are during the winter, should be carefully watched, for they are likely to develop the habit of pecking each others feathers. The new feathers have blood at the base which gives them the taste of blood and causes this habit to develop. The best of remedies is to keep the birds busy and hungry working for feed, which will keep away this depraved appetite. Raw bones with a little meat on them, placed where the pullets can get them, will help. Care must be exercised to keep the bones from getting stale by providing fresh ones from day to day.

IRONSIDE

After spending a few weeks with their sister, Mrs. Herman Rise, Mrs. Pierce, and Mrs. Swaker returned this week to their home in Burns.

F. Smith of Brogan was a Sunday visitor here.

Lee Thompson and Alec Murray of Jamieson have been hauling posts this week from the Smith farm for the Eastern Oregon Lumber Co.

Ernestine and Carol Looney and Fred Grabner attended the dance at Brogan Saturday night.

Miss Sylvia Grabner of Brogan visited Miss Ernestine Looney Sunday.

Mr. and Mrs. Floyd Howard were dinner guests of Mrs. Nick Washam Sunday.

Mr. and Mrs. Ray Wise made a business trip to Brogan Sunday.

Mrs. Ike Powers returned home Sunday from Ontario where she has been visiting with her parents, Mr. and Mrs. Henry Westfall.

Mr. and Mrs. James Derve returned from Ontario where they have spent the last few days on business.

Ben Jones and family from Bonita were over night visitors at the Eli Rose place Sunday.

Mr. and Mrs. Perkins of Canyon City are visiting their daughter, Mrs. Fred Lawrence this week.

Mrs. Alvin Busby and Mrs. Lance Stout visited their parents, Mr. and Mrs. James Elms, this week.

Mr. McCray of Vale installed an electric washing machine for A. E. Nichols Thursday.

Eli Rose and niece, Mrs. Dave Lawrence motored to Vale this week.

Guy Wise and Nora Lathrop who were quietly married in Weiser last week returned home Thursday.

I. H. Laurence and family moved to Unity where they have leased a piece of land from Hall Laport for the coming season.

Mr. and Mrs. Sylvester Rose and Mr. and Mrs. Elmer Laurence motored to Ontario Tuesday on a business trip.

Mr. and Mrs. A. E. Nickles returned from Ontario Thursday, having spent some time there.

Mrs. Bert Laurence and Mrs. Frank Jones motored to Brogan Thursday for fruit.

Mrs. B. Plummer and son Edison drove to Brogan this week for their winter apples.

A. E. Nickles and Arthur Van Buren motored to Malheur River this Friday to look at some beef cattle belonging to Wm. Tureman.

Ellen Smith of Brogan spent the week end with her grandparents, Mr. and Mrs. J. J. Smith.

Maude Plummer, who was kicked by a horse at school Monday but not seriously injured, returned home Saturday.

Major Moore and Scott Davis of Ontario were dinner guests at the J. A. Smith home Saturday.

Major Moore and Scott Davis of Ontario were dinner guests at the J. A. Smith home Saturday.

Major Moore and Scott Davis of Ontario were dinner guests at the J. A. Smith home Saturday.

Department of Justice Makes Best Record in Its History

Has Performed Prodigious Amount of Work, Successfully Defended Government and Instituted Proceedings Against War Frauds.

U. S. REPRESENTATIVE JOSEPH WALSH (MASS.), MEMBER HOUSE COMMITTEE ON JUDICIARY

The activities and accomplishments of the Department of Justice during the past 15 months comprise the most successful record that department has made since its establishment. The largest amount of business in the history of that department has been transacted for the current year on less money than was appropriated for the preceding year.

A veritable avalanche of business was closing the dockets in nearly every United States District Court and new cases being entered in unprecedented numbers when Attorney General Daugherty took charge of the Department of Justice March 4, 1921. He found the department disorganized. It was necessary to make a survey not only of his own force but of the various cases pending in the several United States Courts throughout the country. This gigantic task was accomplished with thoroughness and dispatch.

Early in his incumbency Attorney General Daugherty began an investigation of the so-called War Fraud cases. After he had thoroughly surveyed the situation and he and his staff were ready to proceed he asked for an appropriation of half a million dollars to enable him to employ additional and competent special attorneys to conduct the actual work of grand jury investigation and prosecution. The men whom he selected for this task are skilled lawyers: Former Senator Charles S. Thomas, of Colorado, a Democrat who was conspicuous in the Senate investigation of the aircraft scandal; former Congressman C. F. Teavis, of Nebraska, who was a member of the House Committee which investigated the expenditures of the War Department; former Congressman R. D. MacCallum, of Ohio, also a member of that committee, and Mr. Meier Stohrbrink, of New York, who assisted Charles E. Hughes in the famous aircraft inquiry of 1918, and who was also employed as Special Counsel for the House Committee on investigating war expenditures. It is

safe to say no staff could have selected who were better qualified than their legal attainments and their particular experience and knowledge of the war graft scandal.

Never in the history of the Department of Justice, have the laws been so vigorously prosecuted during the last 15 months. The first time jail sentences were imposed as a punishment for violation of the Sherman Anti-Trust Act in the United States was in the case of United States vs. Alexander et al. The department has since that time has under investigation more cases of alleged violations of anti-trust Act and has pending in the courts 26 such cases. From October 4, 1921, the Attorney General's office has won 109 cases in the States Supreme Court and has tried the various United States cases won 110. The department is very successful in defending government in the United States.

Of Claims where litigation has increased as a result of the war. The department was decided in this court 12, in which the Attorney General's department appeared for the government. In these 20 cases judgment was for the government 619,693. The total of the allowed was only \$523,340.

This, in brief, is an outline of the more important activities of the Department of Justice since 1921. An enormous amount has been performed and one of the judicial services rendered by energy intelligence and patch. The record of the department under the present administration only reflects great credit on the General Daugherty and his staff. Harding, but it is a record of respect of our people in the courts and in the responsibility and administering the law in a government of laws and

business visitor in Brogan Sunday.

Frank Hardman from Unity was a Brogan visitor Saturday.

Mr. Brown and Mr. Stewart of Payette were Brogan business visitors Monday.

Mr. Wadford of Fruitland was a Brogan visitor Saturday.

There will be a dance at the Brogan Community Hall Saturday, October 14.

There will be Sunday school at the Brogan Community Hall every Sunday. Everyone is invited to attend.

This Bird is Fat.

Young chabrosses are so laden with their own fat that one of them may go five months without taking any nourishment, says the American Forestry Magazine. This is likewise true of young pigeons and of other sea fowl.

Fighting Weeds.

In sections of the state where fruit growers cover their orchards with straw, cutting up the straw for the melon hills has been suggested as a method of fighting weeds and there is labor for cultivation.
