Our objection to work is there are many other things to do.

Things are beginning to be pretty bad for a lot of yellow rods in Russia.

The oil promoter with the most cash usually has the most of it to his sell.

Being minister of finance in Russia about the height of official uselessness.

The length of the grass in the lawns suggests that some men lack lush.

Women would do better in business if they were not afraid of every new wrinkle.

The bookmaker drives a horseless carriage because the books bet him on horses.

It is easy for all to reach a high station in life at the present price per gallon.

On the other hand, wouldn't a photo sent by radio give one that far-away look?

Many who are shy of blue sky lands still believe what they read in the vacation folders.

Too many people are trying to "express themselves" who have nothing whatever to express.

No woman candidate will throw her hat into the ring if she has been told it looks well on her.

Try to get the same father who used to put his foot down to put the radio receivers down.

The undertakers report that it now costs less to die, but who wants to save money that way?

Germany's floating debt of 288,000,000,000 marks is about as buoyant as a string of grindstones.

Some day there will be a political convention without speeches and it will last almost an hour.

What has become of the old-fashioned citizens who used to be run down by bicyclists all the time?

Liberty bond issues selling above par are not as cheap as they were below 90, but they are just as sure.

The cruelties of warfare remain in evidence so long as there is anything that remains to be investigated.

It is still a tie score between an empire and a woman. Neither of them has lost an argument yet.

A biologist asserts that blondes are dying out, which no doubt is due to the difficulty of keeping the dyeing in.

America is still regarded by Europe as "the land of the dollar," though with more respect than formerly.

The radio is termed a luxury. However, in most homes father has made a second set of receivers a necessity.

It may be culturally disheartening that farmers care more for the value of plant sales than plant research—but true.

Europe will affect surprise, perhaps, as Uncle Sam mows out to make a touch to pay some of his pressing bills.

Doctors testified that a woman subjected to a sanity test played the piano. Presumably some one of the popular crazes.

Paris reports an adjustable skirt that may be worn long or short by pulling a string. But they may be "stringing" us.

One reason why a woman goes to her husband so often for advice may be that advice is about all she can get out of him.

General Wood wants more economy in the Philippines. For instance, the islands could get along with less wind in their typhoons.

Yes, great wonders will be worked by the radio. For one thing, the next time we may have wireless national party conventions.

A drapery house advertises that it has something interesting in silk stockings. Nearly everything in silk stockings is interesting.

By killing the "is-it-hot-enough-for-you" pest now, you probably will rid yourself of several million of his ancestors next summer.

Coming suddenly into possession of \$100,000 a woman dropped dead. Health authorities say there is no danger of it becoming epidemic.

"Woman Escapes Serious Operation," according to a headline. A more careful headline should disclose that

Every dog has his day and every cat its "week."

You can't get to easy street by looking for soft things.

The fear is that the millennium may beat normalcy to it.

About the greenest thing in most gardens just now is the gardener.

It would seem that Mr. Tchitcherina is chertarily taking a lot of chances.

The main trouble with those Russian "replies" is that they do not answer.

The Tenna-Arica parley must have been named after a patent medicine controversy.

## ONE JOURNAL IN GREENLAND

And the Editor of That One Had to Teach His Subscribers How to Read It.

Journalism in Greenland is in rather a primitive stage, according to the captain of a British bark. The captain makes frequent voyages to Greenland and is held to be an authority on conditions in that country.

The one editor in Greenland is a Dane named Moeller, who conducts the only newspaper and enjoys the singular distinction of printing the paper for the natives and teaching them to read it.

Mr. Moeller is not only the editor and proprietor; he is the reporter, printer, distributor and business manager, and every two weeks he makes a long journey on skates to dispose of his journal.

Originally it contained only a few crude illustrations, but gradually other matter was introduced, until now it contains articles on the affairs of the day.

This man actually taught his subscribers to read his paper, first introducing words, then sentences, until now his subscribers are able to read articles on any topic he cares to write about.

## FORMED NEW VOCAL CORD

Tissues, After Operation, Grew Together, and Voice is Said to Be Improved.

In three out of four cases in which Dr. H. Burger resected the vocal cords the tissues grew together to form a new vocal cord. He reports to the Nederlandsch Tijdschrift v. Geneeskunde (Amsterdam) that the more radical the operation on the side wall of the throat the more the new cord approximated normal.

In all these cases the diagnosis of malignant tumor was beyond question, and the operation was done through a slit in the thyroid cartilage. No attempt was made to suture this afterward. The voice is good in all but one, who still is hoarse. The voice is very much better than in other cases in which merely the growth itself was resected and the rest of the vocal cord left. The repair after this is much less perfect. In one of his cases the repair was so perfect that in examining with the laryngoscope a year later there was some doubt as to the operated side.—New York World.

## Did you ever stop to think

By E. R. Waite.

That nothing is more necessary to a community than cooperation.

That nothing can help more for the progress and common welfare of all than for a community to move forward in spirit of harmony toward the goal of greater development.

That backward citizens must get down to brass tacks, come out of the clouds, brush the fog from their brains look a few hard facts in the face and then co-operate.

That every city offers many opportunities to the man of energy and thrift.

That business houses furnish a bulwark of confidence, strength and permanency.

That these institutions that enjoy a steady growth in keeping with the wealth and development of their communities.

That they are sound, conservative, courteous city builders and eager to render services to their cities.

That all citizens should have a thrill of pride when they think of them, for they are the backbone of a city.

That they are taking a determined forward stride for their city.

That if they are loyally supported they will keep a city climbing to prosperity.

That it sometimes happens that if this guiding force has not proper support that when it looks like clear sailing the support gets careless, it gets on a toboggan slide and gets wrecked.

## CRESTON

Alvin Spurlock passed through Creston the first of the week.

Peirce Shrader and Bert Avery have been gathering Shrader's cattle and taking them to winter quarters.

Mr. Nickles who was thrown from the wagon when his team ran away is much improved at present and is able to be taken home.

T. R. Beers made a business trip to Ontario the first of the week.

Jack McConnell made a business trip to Creston one day this week.

Mrs. Guy Shumway gave a party for the school children last Saturday. Many were present and a very pleasant time was had by all.

Rev. Baird held services in the school house Sunday and a large crowd enjoyed the sermon.

## MALHEUR

Neil M. Morfitt of Portland is the guest of his father, C. H. Morfitt, here this week.

The weather has been quite cold here the past week. The stockmen are busy gathering their stock. The ranges and pastures are so short they will soon have to start feeding.

Chas. Wendt of Baker was a business visitor here Friday.

Mr. and Mrs. R. W. Worsham, Mrs. Geo. N. Dotson and Mrs. James Warren of Hereford, visited with relatives and friends here Sunday.

Mrs. F. H. Howard and son Eldred returned home from Baker Friday.

Guy Woodcock took a load of hogs to Baker for market Saturday.

Mrs. Alice Williams spent the week end with relatives at Ironsde.

Machine-Made Sea Air.

## NOT PRETTY MUSIC

Dorothy, three years old, lives at New Albany. Her father took her to the barber shop to have her hair trimmed, and the electric clippers almost drove the little girl into spasms of fear despite the kind assurances that they would not hurt her. She had a big audience before the task was completed.

Next day Dorothy went to visit a neighbor who lived near the barber shop. Shortly after her arrival she heard music and inquired its location. On being informed that it was at the barber's she replied:

"Well, I don't think his music is pretty."—Indianapolis News.

## AMERICAN MONEY IN CANADA.

It is estimated that American investments in Canada for 1920 amounted to \$325,000,000—more than half of the previous Canadian investment. Some of the items of investment during the period under review are:

Bonds purchased, \$237,000,000; industrial investment, \$50,000,000; western lands purchased, \$7,000,000. It is also estimated that \$30,000,000 of the \$50,000,000 invested in industries went into the pulp and paper business.

## IMMEDIATE RESULTS.

"Did you give your wife that lecture on economy you said you were going to?"

"Yes, I did."

"Have any effect?"

"Yes; I'm going to make my last summer's suit do for this summer."—Stray Stories.

## MUCH HARM DONE BY SMOKE.

It may sound an extreme statement, but there is reason to think that a smokeless atmosphere would do more to rid us of our diseases than any other conceivable means of prevention.

We should in summer have a daily flushing of our streets and houses with the great antiseptic, and even in winter the unfiltered rays would "keep down the vermin" which threaten us. We cannot make our winters warmer

## GEM OF THOUGHT.

If it be my lot to crawl, I will crawl contentedly; if to fly, I will fly with alacrity; but as long as I can possibly avoid it I will never be unhappy. If, with a pleasant wife, three children, a good house and farm, many books, and many friends who wish me well, I cannot be happy, I am a very silly, foolish fellow, and what becomes of me is of very little consequence.—Sydney Smith.

## PICTURES OF MOON.

A French scientist has performed a wonderful work which he has devoted himself to for five years in making a complete map of the moon in the shape of 8,000 photographs. He was assisted in the work by the photographers of another astronomer who had been making snapshots of the moon for 16 years.

## JOAQUIN MILLER ON POETRY.

Why, the true poetry is nothing but the common sense. Truth, beauty and again truth—the right heart! No poet can create or destroy one particle of truth or beauty or common sense, any more than he can create or destroy a particle of gold. He can

GOOD way to determine how much it costs to rot a building is to find out how much lumber, needed to repair or rebuild, would cost.

You'll find that it costs several times as much as the paint which repairs. Paint your buildings when they need it. Rotting property is wasteful and extravagant.

The most economical paint, in the long run, is the best paint. It is easy to apply—saves labor. It covers more area per gallon than "cheap" paint.

The best paint serves five or more years longer than "cheap" paint.
