Fighting Weeds.

In sections of the Northwest the fruit growers cover the fields with rotting paper, cutting out round holes for the melon hills. It has been found that by this practice all weeds are smothered and there is a big saving in labor for cultivation and irrigation.

Did you ever stop to think

By E. R. Waite.

That with keen business competition prevailing, most business men are prone to increase their business by increased advertising.

That they realize that the people owe it to themselves and to their pocket books to read the advertisements.

That the thrifty people read the advertising columns because it is a business proposition to do so. Advertise.

That advertising goods are best by test, they protect the buyer. Advertise.

That the merchant who builds his business by advertising, quality and service is the successful business man of today. Advertise.

That the consistent advertiser always keeps clean, up-to-date stocks. Advertise.

That if he has not lived up to his advertising and his business dealings he would not be in business today. Advertise.

That progressive business men are insuring the soundness of their future growth by advertising.

That it pays to be known as a live business man, they are judged by their advertising.
