**GENUINE IHC REPAIRS**

**THAT** means that the repairs having this trade-mark were made in the factory where the original machine came from. It also means that these repair parts were made by the same workmen who made similar parts for new machines and that they are made of the same materials.

Genuine IHC Repairs fit closer, wear better and last longer than "Will-Fit" or "Made-For" substitutes. A machine that is part genuine and part imitation is a hybrid, a mongrel. Come to us and get genuine IHC repairs, and you will also get the McCormick-Deering repair service, which is worth while.

**Nature's Busy Workers.**  
In the great office of nature there are innumerable departments with endless work going on, and the fine flower that you behold there, gaudily attired and scented like a dandy, is by no means what it appears to be, but rather is like a laborer toiling in the sun and shower, who has to submit a clear account of his work and has no breathing space to enjoy himself in a playful frolic.

**After Studying the Sparrow.**  
We spend considerable time observing the English sparrows and studying their character and have about reached the conclusion that, even if that well meaning but misguided British cousin had had sense enough not to bring them over, they would have got here somehow anyway.—Ohio State Journal.

**PERFECT?**

---of course not.

No bank's service is perfect because human beings render it. And as soon as we attain to what we presently think is "perfection" we see other "perfections" ahead to be worked for.

Yet our customers do not hesitate to recommend this bank to their friends, for they know that we are constantly striving to make our service as nearly "perfect" as we possibly can.

In fact, three-fourths of all our depositors came here as a result of such recommendations.
