

MRS. WM. BUTTS WAS VERY SICK

Gives Full Credit to Lydia E. Pinkham's Vegetable Compound for Remarkable Recovery

Wellston, O.—"I took Lydia E. Pinkham's Vegetable Compound to make me strong. I was troubled with my back and sides hurting me till I could not do my work, and whenever I caught cold it made me irregular. Since I have taken the Vegetable Compound my side and back don't bother me and I can do my housework and care for my children now, where before I did not feel like doing anything or going around. After my first child was born about four years ago I saw an advertisement in the paper about the Vegetable Compound. I knew it would help me, but I was afraid to try it because people said it would help you to have children and I knew I was having children fast enough. But I thought if it would help me it would be better to have a whole house full of children and have good health. I became stronger from taking it and my husband says I look like a live woman instead of a dead one. When Spring comes I am going to take your Blood Medicine as I am very thin. I will answer letters from any woman who wishes to ask about your medicine."—Mrs. WILLIAM BUTTS, Wellston, Ohio.

COLOR IT NEW WITH "DIAMOND DYES"

Just Dip to Tint or Boil to Dye.

Each 15-cent package contains directions so simple any woman can tint soft, delicate shades or dye rich, permanent colors in lingerie, silks, ribbons, skirts, waists, dresses, coats, stockings, sweaters, draperies, coverings, hangings—everything!

Buy Diamond Dyes—no other kind—and tell your druggist whether the material you wish to color is wool or silk, or whether it is linen, cotton or mixed goods.

Explains How Oil "Puts Out" Wigglers

Mosquito "wigglers," or larvae, are not smothered by the oil sprayed on their pools; they simply drown. The researches of Dr. David Keilin, working at the Molteno institute in South Africa, and just announced in London by Sir Arthur E. Shipley, run counter to the older and commonly accepted notion.

Mosquitoes and their larvae, like all insects, have no lungs or gills to breathe with, such as higher animals have. They get the oxygen they require through systems of tubes opening directly to the outside air and branching inward to all parts of their bodies. Doctor Keilin discovered that mosquito larvae had certain cells in these tubes that secreted a fatty substance, which served to keep the water out. But upon experimenting with them, using oil, liquids that dissolve fats, he found that if these protective secretions were thus dissolved, the breathing tubes of the larva filled up with water and the hapless "wigglers" drowned.

DEMAND "BAYER" ASPIRIN

Take Tablets Without Fear if You See the Safety "Bayer Cross."

Warning! Unless you see the name "Bayer" on package or on tablets you are not getting the genuine Bayer Aspirin proved safe by millions and prescribed by physicians for 25 years. Say "Bayer" when you buy Aspirin. Imitations may prove dangerous.—Adv.

South African Gold

Although more gold was taken from South African mines this year than last, the yield in the last six months was valued at nearly \$1,000,000 less because of the decline in the value of the metal.

Ulster's Patriotism

Ulster was the best recruiting ground for the British army in 1924. There were 241 recruits for every 100,000 of population. London came next with 229 per 100,000.

When one sees a grouch trying to be agreeable, the temptation is to help him.

CROSS-WORD PUZZLE

(Copyright, 1925.)

- Horizontal.**
- 1—Version
 - 2—To adjust or mend
 - 11—To talk extravagantly
 - 12—Procured
 - 13—A preposition
 - 14—Masculine descendants
 - 15—A container
 - 17—A fastening implement
 - 18—A man's name
 - 20—To proceed
 - 21—To shorten by cutting
 - 22—Something connected with winter
 - 23—A habitual drunkard
 - 24—A domestic animal
 - 25—A this rain
 - 26—Part of an umbrella
 - 27—A preposition
 - 28—A public conveyance
 - 29—A representative of the earth's surface
 - 31—To decay
 - 32—A water vehicle
 - 34—In such a manner
 - 35—A large wagon
 - 36—A quantity, as of a liquid
 - 37—A dirty animal
 - 38—A kind of fruit
 - 39—A story
 - 40—A crib
 - 41—Part of the verb "to be"
 - 42—A prefix meaning "against"
 - 43—Triumphed
 - 45—An insect
 - 46—A woody perennial
 - 48—A three-toed sloth
 - 49—Finish
 - 50—Parts of the face
- Vertical.**
- 1—Price
 - 2—The complete self
 - 3—A negative
 - 4—A kind of metal
 - 5—A color
 - 6—State of being without feeling
 - 7—Old Testament (abbr.)
 - 8—A state of mental confusion
 - 9—That thing
 - 12—A illuminating mixture
 - 14—To drink in small quantities
 - 15—An ornamental slipknot
 - 16—A small bed
 - 17—Pull (Scottish)
 - 18—A negative
 - 20—A sailor (slang)
 - 21—A great deal (slang)
 - 22—A number
 - 23—Same as 14 vertical
 - 24—A domestic animal
 - 25—A rug before a door
 - 26—A rodent
 - 28—A measure, as of coal
 - 29—Same as 25 vertical
 - 30—A mire or marsh
 - 31—A tatter
 - 32—Transgression
 - 34—A small mass of butter
 - 37—A fastening implement
 - 38—To fire
 - 39—Explosive
 - 40—A colonist or farmer in South Africa of Dutch or Huguenot descent
 - 42—Also
 - 43—A fabric woven by an insect
 - 44—Belonging to him
 - 45—One
 - 47—Regarding (abbr.)
 - 49—Awe (reformed spelling)

Solution will appear in next issue.

HOW TO SOLVE A CROSS-WORD PUZZLE

When the correct letters are placed in the white spaces this puzzle will spell words both vertically and horizontally. The first letter in each word is indicated by a number, which refers to the definition listed below the puzzle. Thus No. 1 under the column headed "horizontal" defines a word which will fill the white spaces up to the first black square to the right, and a number under "vertical" defines a word which will fill the white squares to the next black one below. No letters go in the black spaces. All words used are dictionary words, except proper names, abbreviations, slang, initials, technical terms and obsolete forms are indicated in the definitions.

DIFFICULTIES

By THOMAS ARKLE CLARK
The paper from my home town came in today containing an account of a recent educational institute which had been held there under the direction of a distinguished educator from the East.

"Dr. George Hilton," the news item stated, "is beyond question a scholar, a student of present-day conditions, as he views them, a great thinker, a man of keen intellect, and a public speaker and an orator who has few peers."

It was the name and the last clause which caught my eye. I had not heard of Hilton for 20 years. I could imagine him "a student of present-day conditions"; one must be a half-wit not to give some thought and attention to our present generation, but "a public speaker and an orator," was almost inconceivable to me.

Hilton had come to college during my early teaching experience. His family was without education or social standing. I have known poor boys who have struggled through college without help from home and without personal talent, but I have never known one prouder or poorer than Hilton.

He had no manual or mechanical talent; the simple work at which all indigent undergraduates keep soul and body together he did badly, so that often he was without sufficient to eat and went for days with very little. Toward the close of the first year he had no lodging place, and as spring came on he slept out under the shrubbery or crept into one of the college recitation rooms and stretched himself out upon one of the benches, creeping out again before the janitor arrived in the morning.

In addition to his lack of manual adeptness and financial resources, he was handicapped by a wretched inhibition of speech. He was the worst stammerer I have ever known, and my acquaintance with stammerers is not limited. I never knew him to make a recitation when called on in class. When he attempted it, his jaws would set, his eyes became glassy and he could do nothing for a minute or two. He always tried, but he usually had to give up in despair. It seemed a hopeless barrier between himself and any educational progress. He drifted on in college for two years,

I think, fighting against poverty, picking up an uncertain living in various corners of the campus, never decently dressed and never able without a grotesque physical struggle to utter an intelligible sentence. Then he disappeared and left us wondering what had become of him.

But he was persistent; he was ambitious. With the dullest physical tools he was willing to work without stint to accomplish his purposes. Like Demosthenes he was determined to become an orator. I learned later that he had gone into the ministry, that he had to a large degree overcome his impediment in speech and that he was developing a wide influence. And now here he was, so the paper said, "a public speaker and an orator who has few peers."

A man can do anything if he has persistence and courage.

Oriental Tobacco Legend

In the Orient there is a lengthy pipe tradition. It traces the water pipe back into ancient times. One story of its origin is romantic. If nothing else, it is said that a wealthy prince lost his favorite wife and went to a priest for consolation. The priest made him a bowl much like the present water pipe and told him to go to his wife's grave, pluck weeds he found there, put them in the top of the bowl, apply fire and draw on them through a stem. The process was designed to provide the prince with solace.—Detroit News.

Electric Steam Radiator

An electric steam radiator is one of the latest developments in modern heating of the home. The heating element extends throughout the radiator in a protective seamless brass tube, which assures an even heat in every column and provides a large radiating surface for heating the water surrounding.—Popular Science Monthly.

Primitive Bread Making

Perhaps the earliest form of bread, if that word may be used, was prepared from acorns and beechnuts. The Roman philosopher, Pliny, speaks of a similar crude process in connection with wheat. The grain was evidently pounded, and the crushed remnants soaked into a cake and dried in the sun.

The DAIRY

RAPID DECLINE IN MILK PRODUCTION

The rapid decline in milk production as the summer advances is the result of a combination of factors, says C. B. Bender, assistant dairy husbandman at the New Jersey College of Agriculture, New Brunswick. Chief among these is the poor condition of pasture.

In many regions a drought in mid-summer causes tough and woody pasture. The result is that the cow, especially if producing a liberal amount of milk, doesn't get sufficient food and loses flesh by trying to keep up production. Finally the production declines, slowly at first and then more rapidly as conditions become extreme. Records from creameries show that for 100 pounds of milk delivered June 1 there are only 46 pounds delivered August 1.

Filices may be a slight factor, but their importance is overestimated. The flies and the hot weather are factors in so far as they both discourage the animals from grazing.

If kept on pasture the cows should be turned out to graze during the early morning and late evening. The growing of rolling crops may be a good practice. Grain is an effective means of holding up production, but it is an expensive practice to the extent that the grain replaces grass. Silage is not a complete ration, but it may be used alone to supplement pastures. If conditions are such that most of the feed has to be supplied outside of pastures, then the feeding should be practically the same as in winter.

If the production of the herd drops to a marked degree during the summer it cannot be brought back to the point where it should be. Therefore, to insure a paying fall production, it is highly important to keep up the milk flow during the summer, even though there may be no immediate profit.

Records of Cow-Testing Association Are Exact

Yearly milk and butterfat production as determined in cow-testing associations by weighing and testing one day's production each month is accurate within a very small per cent, says the United States Department of Agriculture. To determine the accuracy of the cow-testing association method of calculating yearly production, the department made a study of the actual yearly production records of 70 cows of the Minnesota experiment station. These Minnesota records gave the production of milk and butterfat for each milking throughout the year.

By systematically picking out the weights and tests for one day each month as they would have been obtained by cow-testing association methods and thus calculating the yearly production it was found that the association method was accurate within 2 per cent on milk production and within 3 per cent on production of butterfat.

A tabulation was also made of 100 yearly individual cow records from the department farm at Beltsville, Md. These records gave only the milk production night and morning for each day in the year. A yearly total, calculated from one day's record each month, when compared with the actual milk production showed an accuracy within 1.99 per cent. These comparisons indicate that the method used in cow-testing association work gives a very accurate record of production.

Alfalfa and Clover Are Good for Dairy Heifers

That alfalfa or clover hay fed with corn to dairy heifers produces good growth and favors early maturity, was shown by recent feeding tests at the Ohio experiment station. In the tests, continued through two winters, alfalfa hay and corn were fed to one lot of Holstein and Jersey heifers and clover hay and corn to a similar lot.

Without other feed both lots made more than average normal growth. Alfalfa hay did not prove greatly superior to clover hay for growth when fed liberally with corn, but it did prove superior to clover hay for fattening, or gain in weight. The tests showed that either alfalfa or clover fed with corn furnishes sufficient protein and other essential materials to produce excellent growth.

The liberal use of legume hays favors early maturity of heifers. This permits early breeding with a consequent saving in time and cost. The legumes carry more calcium, or lime, than the grasses, and good alfalfa, clover, or other legume hay, is therefore better than timothy or other grass hay for growth.

Dairy Hints

Keep the drinking water supply for the dairy herd clean and wholesome.

Ship your cream at least three times a week during this hot weather. Keep it cool.

Buy that new herd sire while the demand is slack and you can get better bulls for your money.

Why That Bad Back?

Is backache keeping you upset? Feel all tired out—so nervous and dispirited you can hardly keep going? Then look to your kidneys! Your kidneys rid the body of poisonous waste. But if they lag, impurities accumulate and poison the whole system. Then one is apt to suffer backache, stabbing pains, headaches, dizziness and other annoying kidney irregularities. If your kidneys are sluggish, help them with a diuretic. Use Doan's Pills. They are praised the world over. Ask your neighbor!

A Utah Case

Mrs. R. H. Wilson, 335 Fifth East North St., Payson, Utah, says: "My back became lame and when I stooped I could hardly breathe a yard or so. My back ached constantly and my kidneys acted too freely. I had dizzy spells and severe headaches. I used Doan's Pills and they practically cured me."

Put one on—the pain is gone

Boschee's Syrup for Coughs and Lung Troubles

Successful for 59 years. 30c and 50c bottles—ALL DRUGGISTS

A great deal of "luck" is in having the judgment to know what to do.

A great mind treats little minds as such and is never belittled by them.

HOSTETTER'S CELEBRATED STOMACH BITTERS

Feel Young

Take care of your stomach and preserve your health.

HOSTETTER'S Celebrated Stomach Bitters tone up the digestive organs, stimulate the appetite and promote a feeling of physical fitness. At all druggists.

Look Younger

WAKE up your sleeping youth! Look younger! Be younger! Age has little to do with your looks or your feelings. It's the condition of your blood that counts!

And blood will tell! It tells in a hundred ways. If your system is starving for rich, red blood, you may look and feel old at thirty. But if you build up the red-blood-cells with S. S. S., you'll quickly see the wrinkles fade away—the sagging pouches give way to firm, solid flesh—and the fresh, glowing beauty of youth take the place of a skin sallow and disfigured with blemishes.

Rich, red blood means youth, vim and energy! S. S. S. helps Nature build red-blood-cells by the millions. For generations S. S. S. has been keeping people looking and feeling young.

Fresh, cleansing, purifying, rich, red blood that S. S. S. helps Nature build, nourishes every muscle, organ and tissue of the body. Pimples, blotches and blackheads disappear. Boils, eczema and rashes dry up. Your face—your body—your whole being takes on the look and power of youth.

Wake up your system with S. S. S. Build red blood and you rebuild youth! Get S. S. S. from any druggist. The larger bottle is more economical.
