Cat's "Nine Lives"

Why a cat is said to have "nine lives" is really—save that nine was one of the sacred numbers—nothing but a tribute to its body. Its spine is very tough; its paws are thickly padded; and its body is extraordinary flexible.

Upheld Monroe Doctrine

Germany, in 1874, was about to buy the island of Porto Rico from Spain, but was dissuaded by a warning from the United States, declaring that it was ready to stand behind the Monroe doctrine.

Traveling Libraries

The traveling library we know today was begun in 1893 in the state of New York under the leadership of the great librarian, Melvil Dewey. New York sent books largely to supplement or strengthen libraries already in existence.

WILL ROGERS

Another "Bull" Durham advertisement by Will Rogers, Ziegfeld Follies and screen star, and leading American humorist. More coming. Watch for them.

Who Won the War?

England and France, smoking ready made Cigarettes fought two and a half years and couldn't make the first down on Germany. Germany smoking old tow lines off Ships, Sawdust, Cabbage leaves, Horse Blankets, and second hand Gun Powder couldn't make the grade. But when Americans arrived with no equipment and no training, but plenty "Bull" Durham, and Nerve to burn it with, in Two weeks the French were trading Legion of Honor Medals for a sack of "Bull." One sack was worth two quarts of Iron Crosses. Englishmen have even been known to sacrifice their afternoon tea for a puff of "Bull" Durham. Even after the war an American private, occupying the Ruhr, went into a German Restaurant and asked for a glass of Milk. He couldn't make the Waiter understand so he drew the Picture of a Cow, and a Milk Pail. The Waiter immediately returned with a Bucket of Beer and a Sack of "Bull" Durham Tobacco. That Private was a better Artist than he thought he was.

Will Rogers

P. S.—There will be another piece here two weeks from now. Look for it.

Need for Relaxation

Some relaxation is necessary to people of every degree. The head that thinks and the hand that labors must have some little time to recruit their diminished powers.

He was informed that it was owned by John Jones and Jane Jones as joint tenants. "Oh, no, that cannot be," he protested. "That's just a vacant lot."

Discovery of Brazil

Brazil, the largest of the South American countries, was discovered on January 26, 1500, by Vincent Pinzon. A Portuguese named Pedro Alvarez de Cobrae, driven upon its coast by a storm in April, 1500, called the region the Land of the Holy Cross, but it was subsequently named Brazil, on account of its red wood.

Few Tired Feet Now

"What's become of old George Hadalott?" asked the visitor to the old home town. "Oh, his business failed and he's in the poorhouse now," replied the native. "Too bad, sorry to hear it. What business was he in?" "He manufactured a powder to shake in the shoes to ease tired feet. He did pretty well, too, until the automobile ruined his business."—Cincinnati Enquirer.

Deadly Bowie Knife

The bowie knife is named for Col. James Bowie, who introduced it in Texas. According to one account, Colonel Bowie had occasion to fight with a broken sword and found it so effective that he equipped his men with long, dagger-shaped knives. They were, however, sharp on one edge only. Since knives quite similar in design were in use in Mexico it is probable that the idea was gained from them.

Laying Up Gladness

All men are glad to have pleasant memories, but not all are providing the material for such memories. If you would look back by and by to something that you will be glad you said or did, now is the time to do or say something which will give you food for gladness.—Henry Clay Trumbull.

Wanted a Change

Dorothy yawned and announced: "I do wish that school was over, and summer was over, and I had a new teacher." Her mother looked up and smiled. "Why do you wish all that?" she asked. Dorothy yawned again. "Well," said she, "I'm so tired of despising the same teacher!"

Swimmingest Porpoise

The world's "swimmingest" porpoise died recently in an aquarium at London. During the three years he was in the tank no one ever saw the fish when it was not swimming. "Then it'll be perfectly safe for me to order onions for the dinner table."

Looking Ahead

"Yes. Ask the minister who preaches my funeral sermon not to say I am better off."

"But you will be better off."

"I know it, but my wife will think I told him to say it."

Business Done by Checks

The term "bank clearings" relates to the aggregate amount of checks and drafts exchanged between members of a clearing house association and carried there daily for an adjustment of the differences. In large cities more than 90 per cent of the commercial business is done by means of checks and drafts and less than 10 per cent is done with cash.

The Ideal Homeless

Men go out into the world with stronger home-ties than women, and struggle back to them with fumbling hands that do not know how to build for themselves. It is women who must make a home. If the wife will not do it, the man is homeless.—From "The Second Establishment" by Dolf Wyllarde.

Glasgow an Old City

According to tradition, the city of Glasgow, Scotland, was founded as early as 560 A. D. It owes its industrial and commercial importance to its situation in a district abounding in coal and iron, to its location near the mouth of the Clyde and to its wonderful harbor of 200 acres.

Experienced miners were engaged three days blasting the rock, and after that it took nine men to remove the big bowlders. Food had been lowered to the dog by means of a rope.

Holes in Cactus

The forest service says that authorities do not agree as to why holes are found in cactus wood; however, a scientist gives the following explanation which is generally accepted: Cactus cannot afford to have solid wood because there is not enough fertility and rain water in the soil to provide for it. Therefore, it is an economy of nature.

Matter and Energy

The naval observatory says that until recently it was considered firmly established that matter cannot be destroyed, but, according to recent theory, matter can be changed into energy. Matter does not leave a star as matter, but it is changed into energy and the energy leaves the star.
