Noise or Music—

Which do you want from your Radio?

\$125.00 Complete with all Accessories including OZARKA Loud Speaker

ALMOST any set of coils, tubes, condensers and rheostats can be made to get some results some of the time, but—is that enough?
Isn't it good music and speaking, faithfully reproduced that you want and pay for?
Then, why not get a genuine OZARKA—the last word in scientific radio receiving sets at a reasonable price? Moreover, through training under OZARKA factory engineers, I know the instrument thoroughly; know how to install, how to adjust and how to service it so as to assure best possible results.
When may I bring an OZARKA to your home for a practical demonstration? I'll not touch the instrument after it is installed. Instead, you will operate it yourself in order that you may realize how easily it tunes; what distance you can bring in with surprising volume and the superb quality of its tone. You'll readily admit it to be the most perfect radio reception you ever listened to.
Phone or write me when I may come, remembering that it will place you under no obligations of any kind.
