Foolish Despair

Despair is like forward children, who, when you take away one of their playthings, throw the rest into the fire for madness. It grows angry with itself, turns its own executioner, and revenges its misfortunes on its own head. It refuses to live under disappointments and crosses, and chooses rather not to be at all, than to be without the thing which it hath once imagined necessary to its happiness.—Charron.

Warning to Parents

Agent Miller of the O. S. L. wishes to notify Nyssa parents of the habit young boys have of gathering at the depot after school hours. They make a specialty of climbing around over moving cars, stealing rides, etc., and are continually running serious risks to life and limb. Unless the practice is stopped it is only a question of time until a tragedy will occur, and parents are requested to keep their boys away from the depot except when they have business there.

The green coloring often seen on potatoes is caused by the action of light on the tuber. The potato belongs to the night shade family, and green parts of these plants often contain poison.
