Prompt and understanding service and our desire to promote prosperity; to help you get your share of it and to use that share with wisdom is our desire.

Homicides fell off ten percent last year, but the fatalities were 100 per cent for the victims.

We may not be able to imitate Lindbergh's flying feat but we might emulate his example in short speeches.

We may have milk from contented cows, but Wall Street doesn't get wool from contented lambs.

If politics makes strange bedfellows it is due to their fondness for the same bunk.

An Alabama lady wrote to the sheriff telling where 50 gallons of moonshine mash might be found. A sort of a mash note.

A preacher at Milton Fla., has raised a chicken with three legs. If tradition is to be believed, that kind would just suit a preacher.

A Britisher wants a course in laughter introduced into the schools. We used to see results gotten in this line with no more equipment than a bent pin.

A shipment from Montreal, billed as whiskey, was found to be water after it got across the line. The Federal Trade Commission should look into this.

If Coolidge economy had been in vogue at the time, there probably would have been only one Walla in Walla Walla and only one Sing in Sing Sing.

Advocating needlework for men, the Chicago Art Institute declares that Charlemagne and William the-Conquer were expert needlemen But why did they overlook Dr. Cook?

From all part of Malheur county we hear reports of excellent crops and better feeling about the immediate future. The county is on the up-grade. All sections appear to share in this optimistic view.

It is predicted that rosy apples will be dollars this fall. All of our growers around Brogan, Jamieson and Nyssa are looking for the best prices paid for a number of years-which means good times for everybody in fruit growing communities this fall. Statistics say that at least 50 percent of the apple crop of the United States this season will be grown in Idaho, Oregon and Washington.

NON-ADVERTISERS

Ample statistics have been published from time to time to demonstrate that among businesses which fail the vast majority are those which have refused to avail themselves of the benefit of advertising.

A check of the records of the Federal bankruptcy courts in Los Angeles has just disclosed that 92 per cent of the firms that failed this year were non-advertisers. The average for 32 cities covered by a survey was 83 percent of failures occurring among concerns which did not advertise. In Troy, N. Y. not a single advertising firm failed.

There is a significant hint in these figures for the business man who is wise enough to profit by it.

CLUB WOMEN AND GIRLS

Rapid extension of the club movement for farm women and girls is reported from many states, a particularly encouraging result of this activity having been shown recently in North Carolina.

Home demonstration work began in North Carolina in 1910 with the growing of a ten-acre garden and the canning of the products raised. There are now home demonstration agents in 52 counties. Last year farm women of the state sold \$250,000 worth of produce at curb markets alone, while home demonstration workers took part in 120 fairs for white and 12 for colored.

Club members have a definite program of work, extending over periods varying from two to four years including instructions in planning and preparing meals preserving of fruits and vegetables for winter use, household managing, clothing, dressmaking, millinery, home furnishing beautifying the home and premises, gardening and poultry and dairy work.

Better roads, labor-saving machinery and modern conveniences have aided the movement, and all possible means have been employed to promote greater comfort and beauty in rural homes.

The unselfish and often arduous labors of home demonstrations agents throughout the country are resulting in greater opportunities and better conditions for farm women and girls which tend to raise the standards of rural living wherever club activities have been undertaken with enthusiasm and zeal.

"OLD GLORY"

The Stars and Stripes as the standard of the republic has been for one hundred and fifty years the symbol of liberty and union, freedom of thought and speech, of justice and all democratic high ideals. It is to be cherished in our heart of hearts. It is respected and high-honored among the flags of the Christendom. Each star in its field of blue is a star of glory. It breathes of valor, hope and truth, of loyalty, sincerity and justice. We doff our hats to its splendor and majesty. It is beautiful. It stirs the soul. It stands, distinct and distinguished, among all other flags. It is the emblem of the greatest nation in the world. It commands our reverence. It symbolizes the Constitution, the greatest constructive political work of man. It is both battle and peace flag. We are ready to defend it, to follow it wherever it may lead in the cause of justice and righteousness.

CHIEF SCOUT HONORED

It is of interest to all Boy Scouts and their friends that Lieut.-Gen. Sir Baden-Powell, founder of the scouting movement, was recently further honored by King George V. by having conferred upon him the knighthood of St. Michael and St. George.

Retiring after a distinguished career in the British Army, Gen. Baden-Powell organized the first troops of Boy Scouts in England in 1908 and has headed the organization ever since, being now 70 years old.

Similar organizations were formed in America under various names, resulting in the incorporation of the Boy Scouts of America in 1910. There are now about 840,000 active scouts in the United States.

A recent official report recounts the valiant services rendered by the scouts in relief work after disasters like the Florida hurricane and the Mississippi flood, besides innumerable beneficial activities such as first aid life-saving, tree planting, fighting forest fires, cleaning up streets and parks, acting as guides for convention delegates, directing traffic and making themselves helpful whenever called upon.

The idea of scouting, as developed by Gen. Baden Powell and his followers, has spread to every civilized land, and has potent force for good. The latest honor bestowed upon the founder of this great movement is a fitting recognition of his distinguished labors in behalf of boyhood and good citizenship.

WHAT'S NEW?

Waterproof paper is being used in making raincoats, school bags, beach slippers, kitchen aprons and a variety of other useful articles.

Liquid oxygen for use by aviators in altitude flights is contained in a new vacuum bottle invented in France. An improved variety of flax, which it is believed will reduce the cost of linen, is being tested in Ireland.

The rate of speed at which blood passes through the body can be measured by means devised by doctors at the Boston City Hospital.

A dog owned by scientists at Northwestern University has lived for more than two years with its stomach removed.

Pictures may be enlarged by a new German elastic photographic film which can be stretched to ten times the original size and then dried on a glass plate.
